

T-Mobile myTouch 3G LE Fender with Google™ User Guide

October 2009

Android™ mobile technology platform 1.6.0

AUG-1.6.0-003

Please Read Before Proceeding

THE BATTERY IS NOT CHARGED WHEN YOU TAKE IT OUT OF THE BOX.

DO NOT REMOVE THE BATTERY PACK WHEN THE DEVICE IS CHARGING.

YOUR WARRANTY IS INVALIDATED IF YOU OPEN OR TAMPER WITH THE DEVICE'S OUTER CASING.

PRIVACY RESTRICTIONS

Some countries require full disclosure of recorded telephone conversations, and stipulate that you must inform the person with whom you are speaking that the conversation is being recorded. Always obey the relevant laws and regulations of your country when using the recording feature of your device.

Limitation of Damages

TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, IN NO EVENT SHALL HTC OR ITS PROVIDERS BE LIABLE TO USER OR ANY THIRD PARTY FOR ANY INDIRECT, SPECIAL, CONSEQUENTIAL, INCIDENTAL OR PUNITIVE DAMAGES OF ANY KIND, IN CONTRACT OR TORT, INCLUDING, BUT NOT LIMITED TO, INJURY, LOSS OF REVENUE, LOSS OF GOODWILL, LOSS OF BUSINESS OPPORTUNITY, LOSS OF DATA, AND/OR LOSS OF PROFITS ARISING OUT OF, OR RELATED TO, IN ANY MANNER, OR THE DELIVERY, PERFORMANCE OR NONPERFORMANCE OF OBLIGATIONS, OR USE OF THE WEATHER INFORMATION, DATA OR DOCUMENTATION HEREUNDER REGARDLESS OF THE FORESEEABILITY THEREOF.

Important Health Information and Safety Precautions

When using this product, the safety precautions below must be taken to avoid possible legal liabilities and damages.

Retain and follow all product safety and operating instructions. Observe all warnings in the operating instructions on the product.

To reduce the risk of bodily injury, electric shock, fire, and damage to the equipment, observe the following precautions.

ELECTRICAL SAFETY

This product is intended for use when supplied with power from the designated battery or power supply unit. Other usage may be dangerous and will invalidate any approval given to this product.

SAFETY PRECAUTIONS FOR PROPER GROUNDING INSTALLATION

CAUTION: Connecting to an improperly grounded equipment can result in an electric shock to your device.

This product equipped with a USB Cable for connecting with desktop or notebook computer. Be sure your computer is properly grounded (earthed) before connecting this product to the computer. The power supply cord of a desktop or notebook computer has an equipment-grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet which is properly installed and grounded in accordance with all local codes and ordinances.

SAFETY PRECAUTIONS FOR POWER SUPPLY UNIT

- **Use the correct external power source**

A product should be operated only from the type of power source indicated on the electrical ratings label. If you are not sure of the type of power source required, consult your authorized service provider or local power company. For a product that operates from battery power or other sources, refer to the operating instructions that are included with the product.

This product should be operated only with the following designated power supply unit(s).

AC Adapter

1. Phihong, Models PSAA05A-050, PSAA05C-050, PSAA05E-050, PSAA05K-050 and PSAA05S-050.

2. HTC, Model TC P300

Car Adapter

Phihong, Model CLA05D-050

- **Handle battery packs carefully**

This product contains a Li-ion polymer battery. There is a risk of fire and burns if the battery pack is handled improperly. Do not attempt to open or service the battery pack. Do not disassemble, crush, puncture, short external contacts or circuits, dispose of in fire or water, or expose a battery pack to temperatures higher than 60°C (140°F).

WARNING: Danger of explosion if battery is incorrectly replaced. To reduce risk of fire or burns, do not disassemble, crush, puncture, short external contacts, expose to temperature above 60° C (140° F), or dispose of in fire or water. Replace only with specified batteries. Recycle or dispose of used batteries according to the local regulations or reference guide supplied with your product.

Note This product should be operated only with the following designated Battery Pack(s): HTC, Model **SAPP160**

- **Take extra precautions**
 - Keep the battery or device dry and away from water or any liquid as it may cause a short circuit.
 - Keep metal objects away so they don't come in contact with the battery or its connectors as it may lead to short circuit during operation.
 - The phone should be only connected to products that bear the USB-IF logo or have completed the USB-IF compliance program.
 - Do not use a battery that appears damaged, deformed, or discolored, or the one that has any rust on its casing, overheats, or emits a foul odor.
 - Always keep the battery out of the reach of babies and small children, to avoid swallowing of the battery. Consult the doctor immediately if the battery is swallowed.
 - If the battery leaks:
 1. Do not allow the leaking fluid to come in contact with skin or clothing. If already in contact, flush the affected area immediately with clean water and seek medical advice.
 2. Do not allow the leaking fluid to come in contact with eyes. If already in contact, DO NOT rub; rinse with clean water immediately and seek medical advice.
 3. Take extra precautions to keep a leaking battery away from fire as there is a danger of ignition or explosion.

SAFETY PRECAUTIONS FOR DIRECT SUNLIGHT

Keep this product away from excessive moisture and extreme temperatures. Do not leave the product or its battery inside a vehicle or in places where the temperature may exceed 60°C (140°F), such as on a car dashboard, window sill, or behind a glass that is exposed to direct sunlight or strong ultraviolet light for extended periods of time. This may damage the product, overheat the battery, or pose a risk to the vehicle.

PREVENTION OF HEARING LOSS

CAUTION: Permanent hearing loss may occur if earphones or headphones are used at high volume for prolonged periods of time.

SAFETY IN AIRCRAFT

Due to the possible interference caused by this product to an aircraft's navigation system and its communications network, using this device's phone function on board an airplane is against the law in most countries. If you want to use this device when on board an aircraft, remember to turn off your phone by switching to Airplane Mode.

ENVIRONMENT RESTRICTIONS

Do not use this product in gas stations, fuel depots, chemical plants or where blasting operations are in progress, or in potentially explosive atmospheres such as fuelling areas, fuel storehouses, below deck on boats, chemical plants, fuel or chemical transfer or storage facilities, and areas where the air contains chemicals or particles, such as grain, dust, or metal powders. Please be aware that sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

EXPLOSIVE ATMOSPHERES

When in any area with a potentially explosive atmosphere or where flammable materials exist, the product should be turned off and the user should obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death. Users are advised not to use the equipment at refueling points such as service or gas stations, and are reminded of the need to observe restrictions on the use of radio equipment in fuel depots, chemical plants, or where blasting operations are in progress. Areas with a potentially explosive atmosphere are often, but not always, clearly marked. These include fueling areas, below deck on boats, fuel or chemical transfer or storage

facilities, and areas where the air contains chemicals or particles, such as grain, dust, or metal powders.

ROAD SAFETY

Vehicle drivers in motion are not permitted to use telephony services with handheld devices, except in the case of emergency. In some countries, using hands-free devices as an alternative is allowed.

SAFETY PRECAUTIONS FOR RF EXPOSURE

- Avoid using your phone near metal structures (for example, the steel frame of a building).
- Avoid using your phone near strong electromagnetic sources, such as microwave ovens, sound speakers, TV and radio.
- Use only original manufacturer-approved accessories, or accessories that do not contain any metal.
- Use of non-original manufacturer-approved accessories may violate your local RF exposure guidelines and should be avoided.

INTERFERENCE WITH MEDICAL EQUIPMENT FUNCTIONS

This product may cause medical equipment to malfunction. The use of this device is forbidden in most hospitals and medical clinics.

If you use any other personal medical device, consult the manufacturer of your device to determine if they are adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.

Turn your phone OFF in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

HEARING AIDS

Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your service provider, or call the customer service line to discuss alternatives.

NONIONIZING RADIATION

Your device has an internal antenna. This product should be operated in its normal-use position to ensure the radiative performance and safety of the interference. As with other mobile radio transmitting equipment, users are advised that for satisfactory operation of the equipment and for the safety of

personnel, it is recommended that no part of the human body be allowed to come too close to the antenna during operation of the equipment.

Use only the supplied integral antenna. Use of unauthorized or modified antennas may impair call quality and damage the phone, causing loss of performance and SAR levels exceeding the recommended limits as well as result in non-compliance with local regulatory requirements in your country.

General Precautions

- **Avoid applying excessive pressure to the device**

Do not apply excessive pressure on the screen and the device to prevent damaging them and remove the device from your pants' pocket before sitting down. It is also recommended that you store the device in a protective case and only use your finger when interacting with the touch screen. Cracked display screens due to improper handling are not covered by the warranty.

- **Device getting warm after prolonged use**

When using your device for prolonged periods of time, such as when you're talking on the phone, charging the battery or browsing the web, the device may become warm. In most cases, this condition is normal and therefore should not be interpreted as a problem with the device.

- **Heed service markings**

Except as explained elsewhere in the Operating or Service documentation, do not service any product yourself. Service needed on components inside the device should be done by an authorized service technician or provider.

- **Damage requiring service**

Unplug the product from the electrical outlet and refer servicing to an authorized service technician or provider under the following conditions:

- Liquid has been spilled or an object has fallen onto the product.
- The product has been exposed to rain or water.
- The product has been dropped or damaged.
- There are noticeable signs of overheating.
- The product does not operate normally when you follow the operating instructions.

- **Avoid hot areas**

The product should be placed away from heat sources such as radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.

- **Avoid wet areas**

Never use the product in a wet location.

- **Avoid using your device after a dramatic change in temperature**

When you move your device between environments with very different temperature and/or humidity ranges, condensation may form on or within the device. To avoid damaging the device, allow sufficient time for the moisture to evaporate before using the device.

NOTICE: When taking the device from low-temperature conditions into a warmer environment or from high-temperature conditions into a cooler environment, allow the device to acclimate to room temperature before turning on power.

- **Avoid pushing objects into product**

Never push objects of any kind into cabinet slots or other openings in the product. Slots and openings are provided for ventilation. These openings must not be blocked or covered.

- **Mounting accessories**

Do not use the product on an unstable table, cart, stand, tripod, or bracket. Any mounting of the product should follow the manufacturer's instructions, and should use a mounting accessory recommended by the manufacturer.

- **Avoid unstable mounting**

Do not place the product with an unstable base.

- **Use product with approved equipment**

This product should be used only with personal computers and options identified as suitable for use with your equipment.

- **Adjust the volume**

Turn down the volume before using headphones or other audio devices.

- **Cleaning**

Unplug the product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning, but NEVER use water to clean the LCD screen.

- **Small Children**

Do not leave your phone and its accessories within the reach of small children or allow them to play with it. They could hurt themselves or others, or could accidentally damage the phone. Your phone contains small parts with sharp edges that may cause an injury or which could become detached and create a choking hazard.

- **Repetitive Motion Injuries**

To minimize the risk of RSI, when Texting or playing games with your phone:

- Do not grip the phone too tightly.
- Press the buttons lightly.

- Make use of the special features in the handset which minimize the number of buttons which have to be pressed, such as message templates and predictive text.
- Take lots of breaks to stretch and relax.

- **Bright Light**

This phone is capable of producing flash of light or use as a torch, do not use it too close to the eyes.

- **Operating machinery**

Full attention must be given to operating the machinery in order to reduce the risk of an accident.

- **Electrostatic discharge (ESD)**

Do not touch the SIM card's metal connectors.

- **Seizures/Blackouts**

This phone is capable of producing bright flashing lights.

- **Loud Noise**

This phone is capable of producing loud noises which may damage your hearing.

- **Emergency Calls**

This phone, like any wireless phone, operates using radio signals, which cannot guarantee connection in all conditions. Therefore, you must never rely solely on any wireless phone for emergency communications.

About this Guide

This guide describes your phone, its components and accessories, and how to use release 1.6.0 of the Android™ mobile technology platform system and applications.

- Your phone, its parts, preparing it for use, and the accessories that come with it are described in “Getting Started” on page 19.
- Starting Android the first time, signing into your Google Account, and performing basic Android tasks, including using Google™ search and Google search by voice to find information on your phone and on the web, are described in “Android Basics” on page 27.
- Configuring how your phone connects to mobile and Wi-Fi networks, Bluetooth devices, and to a computer is described in “Connecting to Networks and Devices” on page 49.
- Using your phone to place, receive, and manage multiple calls is described in “Placing and Receiving Calls” on page 61.
- Organizing and finding contact information for the people you know is described in “Contacts” on page 73.
- Sending and receiving messages using Gmail™ webmail service is described in “Gmail” on page 81.
- Viewing and creating events on your calendar and synchronizing them with the Google Calendar™ calendaring service on the web is described in “Calendar” on page 95.
- Communicating with friends using the Google Talk™ instant messaging service is described in “Google Talk” on page 107.
- Configuring your phone so you can send and receive email via a conventional email service is described in “Email” on page 117.
- Configuring your phone so you can send and receive email via your Exchange ActiveSync account is described in “Work Email” on page 127.
- Exchanging text and multimedia messages with other phones is described in “Messaging” on page 133.
- Browsing the web on your phone is described in “Browser” on page 139.

- Navigating the world with street and satellite data from the Google Earth™ mapping service, getting directions, finding your location, sharing your location with friends using Google Latitude™ user location service, and the many other features available on your phone in the Google Maps™ mapping service are described in “Maps” on page 153.
- Taking and previewing photos and videos is described in “Camera and Camcorder” on page 163.
- Viewing, sharing, and uploading your photos to the Picasa™ photo organizing software service and the YouTube™ user-generated content website are described in “Gallery” on page 169.
- Viewing YouTube videos is described in “YouTube” on page 179.
- Listening to music is described in “Music” on page 183.
- Setting one or more alarms is described in “Alarm Clock” on page 191.
- Calculating the solution to simple and more complex math problems is described in “Calculator” on page 195.
- Finding new applications on Android Market™ downloadable applications service, purchasing paid applications with Google Checkout™ payment and billing service, and installing them are described in “Market” on page 197.
- Using T-mobile applications to help you manage your account, device, and favorite contacts is described in “T-Mobile Applications” on page 205.
- Opening the settings application and its many tools for configuring and customizing your phone is described in “Settings” on page 209.
- Details about your phone and its features are listed in “Specifications” on page 225.

Getting Started

Inside the Box

The product package includes the following items and accessories:

- Phone
- Battery
- USB cable
- AC adapter
- Wired stereo headset
- 3.5 headset adapter
- Pouch
- 16GB microSD™ card
- Screen protector

Getting to Know Your T-Mobile myTouch 3G LE Fender

Top and bottom panels

Front panel

For more information about the functions of the CALL, HOME, MENU, BACK, SEARCH and END-CALL/POWER buttons, see "Using the Phone's Buttons" on page 32. For more information about the TRACKBALL, refer to "Using the Trackball" on page 31.

Back and left panels

Installing the Battery, SIM Card, and Storage Card

Always turn off your phone before installing or replacing the SIM card, battery, and storage card. You also need to remove the back cover before you can install the SIM card and battery.

To remove the back cover

- 1 Firmly hold the phone with both hands and the front panel facing down.
- 2 Push the back cover down with your thumb until it disengages from the phone.

- 3 Remove the back cover completely.

Battery

Your phone comes with a rechargeable Lithium-ion battery and is designed to use only manufacturer-specified original batteries and accessories. Battery performance depends on many factors, including network configuration, signal strength, and usage patterns. For battery life estimates, see “Specifications” on page 225.

Note Battery life is subject to network and phone usage.

Warning! To reduce risk of fire or burns:

- Do not attempt to open, disassemble, or service the battery pack.
- Do not crush, puncture, short external contacts, or dispose of in fire or water.
- Do not expose to temperatures above 60°C (140°F).
- Replace only with the battery pack designated for this product.
- Recycle or dispose of used battery as stipulated by local regulations.

To install the battery

- 1 Remove the back cover.
- 2 Align the battery's exposed copper contacts with the battery connectors inside the battery compartment.

- 3 Insert the contact side of the battery first, and then gently push the battery into place.
- 4 Replace the back cover.

To remove the battery

- 1 Make sure the phone is turned off.
- 2 Remove the back cover.
- 3 The top side of the battery has a protruding grip. Lift the battery from the grip to remove it.

SIM card

The SIM card contains your phone number, service details, and phone book/message memory. Your phone supports both 1.8V and 3V SIM cards.

Note Some legacy SIM cards may not function with your phone. You should consult your wireless service provider for a replacement SIM card. There may be fees for this service.

To install the SIM card

- 1 Make sure the phone is turned off, and then remove the back cover and the battery.
- 2 Locate the SIM card slot, and then insert the SIM card with its gold contacts facing down and its cut-off corner facing out the SIM card slot.
- 3 Slide the SIM card completely into the slot.

To remove the SIM card

- 1 Remove the back cover and the battery if it is installed.
- 2 Locate the groove below the SIM card slot, and then push the SIM card out of the slot with your finger.

Storage card

To store your pictures, music, and applications, install the supplied microSD card into your phone.

Note You need to install the microSD card before you can use the Camera or Camcorder application.

To install the storage card

- Insert the microSD card into the slot with its gold contacts facing down.

To remove the storage card

- Press the storage card to eject it from the slot.

Note If you want to remove the storage card while the phone is on, see “To safely remove the SD card from your phone” on page 58.

Charging the Battery

New batteries are not charged when shipped. Before you start using your phone, you need to install and charge the battery. Some batteries perform best after several full charge/discharge cycles.

To charge the battery

- 1** Plug the USB connector of the AC adapter to the USB connector at the bottom of your phone.
- 2** Plug in the AC adapter to an electrical outlet to start charging the battery.

Note Only the AC adapter and USB cable provided with your phone must be used to charge the battery.

Charging is indicated by a solid amber light in the Notification LED. As the battery is being charged while the phone is on, the charging battery icon  is displayed in the status bar of the Home screen. After the battery has been fully charged, the Notification LED shows a solid green light and a full battery icon  displays in the status bar of the Home screen. For more information about the Notification LED, refer to “Monitoring Your Phone’s Status” on page 40.

- Warning!**
- Do not remove the battery from the phone while you are charging it using the AC or car adapter.
 - As a safety precaution, the battery stops charging before it overheats.

Turning the Phone On and Off

To turn on the phone

- Press the END-CALL / POWER button.

The first time you turn on the phone, you're welcomed to Android and prompted to sign in to your Google Account (see "Launching Android the First Time" on page 28).

When you turn on the phone, you may be prompted to enter a personal identification number (PIN) for your SIM card, if it's configured to require one.

Note If you entered the wrong PIN three times, the SIM card will be blocked and you will not be able to use your phone. If this happens, you can unblock it with a PUK (PIN Unblocking Key) obtained from your wireless service provider.

To turn off the phone

- 1 Press and hold the END-CALL / POWER button until the menu opens.
- 2 Touch **Power off** in the menu.
- 3 Touch **OK** when asked to confirm that you want to turn off the phone.

For more about working with the touchscreen and menus, see "Android Basics" on page 27.

Android Basics

When you first turn on your phone, you have the opportunity to learn more about it and to sign into your Google Account. It's a good idea to become familiar with the basics of your phone and how to use it: the Home screen, the touchscreen, phone buttons, applications, search, and more.

Launching Android the First Time

The first time you power on your phone (after setting it up, as described in “Getting Started” on page 19), you’re prompted to touch the Android logo to start using your phone.

- 1 After touching the Android logo, touch **Begin** to learn more about using the onscreen keyboard.
- 2 Touch **Next** when you’re ready to set up your Google Account.

Your Google Account

You must sign into your Google Account to use Gmail, Google Talk, Google Calendar, Google Maps, to download applications from the Android Market, and take advantage of other Google services on your phone. When you sign in, your contacts, Gmail messages, Calendar events, and other information from these applications and services on the web are synchronized with your phone.

- If you don’t have a Google Account, touch **Create**.
- Touch **Sign In**, and then enter your username and password using the onscreen keyboard. For information on navigating the touchscreen and entering text, see “Using the Touchscreen” on page 30 and “Using the Onscreen Keyboard” on page 33.

Note If you have a Google Account but have forgotten your password, you must retrieve it before you can sign in. Use a web browser to visit <http://www.google.com>, click **Sign In**, click “Can’t access your account?” in the sign-in box, and then follow the instructions for retrieving a forgotten password.

After signing in, you're asked to decide whether you want to take advantage of certain Google services, such as those that make use of your current location. Whatever you decide, you can change your mind later by changing options in Settings (see "Security & Location Settings" on page 216).

Getting to Know the Home Screen

The Home screen is your starting point for all the features on your phone. It displays application icons on top of its wallpaper. You can customize the Home screen to display other application icons, shortcuts, widgets, and so on (see "Customizing the Home Screen" on page 47).

Along the top of the screen is the Status bar, which displays the time, information about the status of your phone, and icons for notifications you've received. To learn more, see "Monitoring Your Phone's Status" on page 40 and "Managing Notifications" on page 42.

You can touch the Applications tab, at the bottom of the screen, to view all installed applications. See "Opening Applications" on page 37 for details.

To return to the Home screen

- Press the HOME button at any time, in any application.

To view other parts of the Home screen

- Slide your finger left or right across the Home screen.

The left and right extensions to the Home screen provide more space for icons, widgets, shortcuts, and other items.

Using the Touchscreen

You can control Android features by using your finger to directly manipulate icons, buttons, menu items, the onscreen keyboard, and other items on the touchscreen. You can also change the screen's orientation.

Touch When you want to act on items on the screen, such as application and settings icons, and when you want to type letters and symbols using the onscreen keyboard, or press onscreen buttons, you simply touch them with your finger.

Touch & hold You touch & hold an item on screen by touching it and not lifting your finger until an action occurs. For example, to open a menu for customizing the Home screen, you touch an empty area on the Home screen until the menu opens, and then you lift your finger.

Drag Touch & hold an item for a moment, and then without lifting your finger, move your finger on the screen. Lift your finger when you reach the target position. You drag items on the Home screen to reposition them (as described in "Customizing the Home Screen" on page 47) and you drag to open the Notifications panel (as described in "Managing Notifications" on page 42).

Swipe or slide To swipe or slide means to quickly move your finger across the surface of the screen, without pausing when you first touch it (so you don't drag an item instead). For example, you slide the screen up or down to scroll a list.

Rotate the screen On most screens, the orientation of the screen rotates with the phone as you turn it from upright to sideways, and back again. (You can turn this feature on or off as described in “Sound & Display Settings” on page 214.)

Using the Trackball

Some actions, such as opening an event in a crowded calendar or selecting where you want to edit text, can be easier to do with the TRACKBALL than with the touchscreen.

To use the trackball

- Roll the TRACKBALL to select items on the screen. The selected item is highlighted in orange.
- Pressing the TRACKBALL is equivalent to touching the selected item with your finger.
- Pressing and holding the TRACKBALL is equivalent to touching & holding the selected item with your finger.

The TRACKBALL also flashes when you receive an incoming call or a notification.

Using the Phone's Buttons

The phone's physical buttons offer a variety of functions and shortcuts.

Button	Press	Press & hold
HOME	Opens the Home screen. If you're viewing the left or right extended Home screen, press to return to the main Home screen.	Opens the recently used applications screen.
MENU	Opens a menu with items that affect the current screen or application.	Opens or closes the onscreen keyboard.
BACK	Opens the previous screen you were working in. If the onscreen keyboard is open, closes the keyboard.	Returns you to the application's main screen or to the Home screen.
SEARCH	In most application, opens a search box for the information in that application. In other applications, opens the Quick Search Box.	Opens Google search by voice.
CALL	On most screens, opens the Dialer application.	Opens the voice dialer.
END-CALL / POWER	When no call is in progress, turns off the screen. When a call is in progress, ends the call.	Opens a menu with options for airplane mode, silent mode, and for powering off the phone.
VOLUME UP / DOWN	When no call is in progress, increases or decreases the ring-tone volume, or sets the phone to vibrate or silent mode. When a call is in progress, increases or decreases the call volume.	Quickly increases the ring-tone volume to maximum or silences the phone.

Using the Onscreen Keyboard

You enter text using the onscreen keyboard. Some applications open the onscreen keyboard automatically when you need to enter text. In others, you touch in the text field where you want to enter text, to open the keyboard.

To enter text

- 1 Touch a text field where you want to type.

The onscreen keyboard opens.

For most text fields, the keyboard starts with letters displayed. Text fields for phone numbers or other special purposes may display numbers and symbols or other custom keyboards, to make it easier to enter the required information.

You can also use the TRACKBALL to select a text field, and then press the TRACKBALL to open the onscreen keyboard.

- 2 Start typing by touching the keys on the onscreen keyboard.

The characters you've entered appear in a strip above the keyboard, with suggestions for the word you are trying to type to the right. Touch the left or right arrows in the strip to view more suggestions.

- 3 Touch Space or a punctuation character to enter the suggested word in red.

OR

Touch another suggested word to enter it.

OR

Touch & hold the leftmost word to add it to the dictionary.

You can view, edit, or delete the words you add to the dictionary. See “Locale & Text Settings” on page 220.

- 4 Use the Delete key to erase characters to the left of the cursor.
- 5 When you’re done typing, press BACK to close the keyboard.

To enter numbers, symbols, and other characters

- Touch the Symbols key to switch to the numbers and symbols keyboard. Touch the **Alt** key to view additional symbols; press it again to switch back.
- Touch & hold a vowel or the **C**, **N**, or **S** key to open a small window where you can touch an accented vowel or other alternate letter.
- Touch & hold the period (.) key to open a small window, with a set of common symbol keys you can touch to enter.
- Touch & hold almost any of the number and symbols keyboard keys to open a window of additional symbols.

To change the keyboard orientation

Many people find the larger, horizontal onscreen keyboard easier to type on.

- Turn the phone sideways or upright.

The keyboard redraws to take best advantage of the new phone orientation.

Note The **Orientation** check box in HOME > MENU > **Settings** > **Sound & display** needs to be selected for the screen orientation to automatically change.

Editing Text

You can edit the text you enter in text fields and use menu commands to cut, copy, and paste text, within or across applications.

To edit text

- 1 Touch the text field with the text you want to edit.
- 2 Use the TRACKBALL to move the cursor to the location where you want to add or delete text.
The cursor is a vertical bar that indicates where text you type or paste will be inserted.
- 3 Type, cut, paste, or delete text.
- 4 Press BACK when you're done typing, to close the keyboard.

You may also have a **Next** or **Done** button on the keyboard, depending on the application and text field you're typing in.

To select text

- 1 Touch the text field or other portion of the screen that contains the text you want to select.
- 2 Use the TRACKBALL to move the cursor to the beginning or end of the text you want to select.
- 3 Touch & hold the text field.
A menu opens with options for working with text.
- 4 Touch **Select text**.
Or touch **Select all** to select all the text in the text field.
- 5 Roll the TRACKBALL to select the text you want.
- 6 Touch & hold the text field again to open a menu you can use to cut or copy your selection, select all the text, or stop selecting text.

To cut or copy text

- 1 Select the text you want to cut or copy.
- 2 Touch & hold the selected text.
- 3 Touch **Cut** or **Copy** in the menu that opens.

If you touch **Cut**, the selected text is removed from the text field. In either case, the text is stored in a temporary area on the phone, so you can paste it into another text field if you want.

To paste text

- 1 Copy the text you want to paste.
- 2 Touch the text field where you want to paste the text.
You can paste text you copied from one application into a text field in any application.
- 3 Use the TRACKBALL to move the cursor to the location where you want to paste the text.
- 4 Touch & hold the text field where you want to paste the text and in the menu that opens, touch **Paste**.

The text is inserted at the cursor. The text you pasted also remains in a temporary area on the phone, so you can paste that same text in another location if you want.

Opening Applications

The Applications tab, on the Home screen, holds icons for all the applications on your phone, including any applications that you downloaded and installed from Android Market or other sources.

When you open another application, its screens open, but the current application doesn't stop, it remains running (for example, playing music or rendering a webpage). You can quickly switch among your running applications, to work with several at once.

See "Market" on page 197 to learn how to discover and install additional applications and games on your phone.

To open the Applications tab

- On the Home screen, drag  up from the bottom of Home screen. You can also touch the Applications tab to open it.

If you have more applications than what can fit on the tab in one view, you can scroll to view more.

Touch to close the Applications tab.

- Touch an application to open it.
- Touch & hold an application icon until it vibrates, and then drag it to add it the Home screen.

You can add an application icon to the Home screen by touching & holding it on the Applications tab until it vibrates.

To close the Applications tab

- Touch  at the top of the tab.

The Applications tab closes automatically if you touch an icon to open its application or if you move an icon from the Applications tab to the Home screen.

To open an application

- Touch an application's icon on the Home screen.
- OR
- Touch an application's icon on the Applications tab.

To open a recently used application

- 1 Press and hold the HOME button.
A small window opens, with icons of applications you've used recently.
- 2 Touch an icon to open its application.
Or press BACK to return to the current application.

Touch an icon to open an application you've used recently.

Working with Menus

There are two kinds of Android menus: options menus and context menus.

Options menus

Options menus contain tools that apply to the activities of the current screen or application, not to any specific item on the screen. You open options menus by pressing the MENU button. Not all screens have options menus (if you press MENU on a screen that has no options menu, nothing happens).

Some screens have more options menu items than what can fit in the main menu. Touch **More** to open a menu of additional items.

Options menus contain items that apply to the current screen or application as a whole.
Touch to open a menu of additional items.

Context menus

Context menus contain tools that apply to a specific item on the screen. You open a context menu by touching & holding an item on the screen. Not all items have context menus (if you touch & hold an item that has no context menu, no menu opens). You can also open a context menu for an item by selecting it, and then pressing & holding the TRACKBALL.

When you touch & hold some items on screen, a context menu opens.

Monitoring Your Phone's Status

At the top of every screen is the status bar. It displays icons that indicate that you've received notifications (on the left) and icons indicating the phone's status (on the right), along with the current time.

If you have more notifications than what can fit in the status bar, this icon  prompts you to open the Notifications panel to view them all (see “Managing Notifications” on page 42).

Status icons

The following icons indicate the status of your phone.

	GPRS connected		Roaming
	GPRS in use		No signal
	EDGE connected		No SIM card installed
	EDGE in use		Vibrate mode
	3G connected		Ringer is silenced
	3G in use		Phone microphone is mute
	Connected to a Wi-Fi network		Battery is very low
	Bluetooth is on		Battery is low
	Connected to a Bluetooth device		Battery is full
	Airplane mode		Battery is charging
	Alarm is set		GPS is on
	Signal strength		Receiving location data from GPS
	Speakerphone on		

Notification icons

The following icons indicate that you've received a notification. See "Managing Notifications" on page 42 for information about responding to these notifications.

	New Gmail message		3 more notifications not displayed
	New text or multimedia message		Call in progress
	Problem with text or multimedia message delivery		Call in progress using Bluetooth headset
	New Google Talk message		Missed call
	New voicemail		Call on hold
	Upcoming event		Call forwarding on
	Data is synchronizing		Uploading data
	Problem with sign-in or sync		Downloading data
	SD card is full		Download finished
	An open Wi-Fi network is available		Connected to VPN
	Phone connected via USB cable		Disconnected from VPN
	Song is playing		

Notification LED indicators

The Notification LED provides information on the phone status or pending notifications.

- Solid green - Battery is fully charged (when the phone is connected to the AC adapter/computer).
- Solid amber - Battery is charging.
- Flashing amber - Battery is low.
- Flashing green - You have a pending notification.

Managing Notifications

Notification icons report the arrival of new messages, calendar events, alarms, as well as ongoing events, such as when call forwarding is on or the current call status.

When you receive a notification, a brief summary appear in the status bar, and then is replaced just by its icon. For a table of notification icons, see “Notification icons” on page 41.

You can open the Notifications panel to view a list of all your notifications. Depending on your settings, you may also hear a notification sound, the phone may vibrate, and the Notification LED may blink as well.

Adjusting sound volume and other general notifications settings is described in “Sound & Display Settings” on page 214.

Applications whose activities produce notifications, such as Gmail and Google Talk, have their own settings you can use to configure whether and how they send notifications. See the sections on those applications for details.

To open the Notifications panel

- Touch & hold the status bar. When the tab appears below the status bar, drag it down.

On the Home screen, you can also press MENU, and then touch **Notifications**.

The Notifications panel displays your wireless provider at the top, followed by a scrolling list of your current notifications, organized into ongoing and event-based notifications.

To respond to a notification

- 1 Open the Notifications panel.
Your current notifications are listed in the panel, each with a brief description.
- 2 Touch a notification you want to respond to.
The Notification panel closes and then what happens next depends on the notification. For example, new voicemail notifications dial your voicemail box or network disconnect notifications open the list of configured networks so you can reconnect.

To clear all notifications

- 1 Open the Notifications panel.
- 2 Touch **Clear** at the top right of the panel.

To close the Notifications panel

- Drag the tab at the bottom of the Notifications panel to the top of the screen. Or just press the BACK button.
The panel also closes when you touch a notification to respond to it.

Searching Your Phone and the Web

You can search for information on your phone, in your applications, and on the web, by typing in the Quick Search Box for Android or by speaking, with Google search by voice.

You can also dial a phone number by voice, as described in “Dialing by Voice” on page 68.

To search your phone and the web by entering text

1 Press the SEARCH button.

When you press the SEARCH button on the Home screen or in many other applications, the Quick Search Box opens.

Enter what you want to search for here.

Shortcuts to previously chosen search results

Many applications, such as Gmail, Contacts, and Browser, make special use of the SEARCH button, which they indicate with an application icon to the left of the search box. (See the sections about those applications for more information about searching in them.)

To search your phone and the web instead, press the SEARCH button again to switch to the Quick Search Box.

You can also search by simply touching the Search widget on the Home screen, if you have added it there (see “Customizing the Home Screen” on page 47).

2 Type in the Quick Search Box.

As you type, matching items on your phone and suggestions from Google web

search are added to the list of previously chosen search results.

Tip You can use the Search preferences to configure some aspects of Google web search (for example, whether it makes suggestions below the Quick Search Box as you type), and what phone features you want to include in searches. You can also clear the list of recently chosen searches. See “Search Settings” on page 222.

- 3** If what you’re searching for is in the list of suggestions, phone search results, or previously chosen search results, touch it in the list.

The item opens in the appropriate application, such as Contacts or the Browser.

- 4** If what you’re searching for is not in the list, touch  to search the web.

The Browser opens, displaying results of a Google search on the web. (For more information about working with Browser, see “Browser” on page 139.)

To search the web by speaking

- Press and hold the SEARCH button.

OR

- Touch the microphone icon in the Quick Search Box.

A dialog opens, prompting you to speak the words you want to search for.

When you’re done speaking, Google search by voice analyzes your speech and the Browser opens, with results of your search from your web search engine.

Below the Quick Search Box, touch a suggested item in the list of similar-sounding words to search for, if Google search by voice misunderstood you.

You can also say “Call” followed by a name in your Google contacts, followed by the kind of phone number (mobile, work, and so on), and if there is a single match, the number is dialed automatically (see “Dialing by Voice” on page 68).

Locking Your Screen

You can lock your screen so that only you can unlock it, to make calls, access your data, buy applications, and so on. (See “Security & Location Settings” on page 216 for other ways to protect your phone and privacy.)

To lock your screen

- 1 On the Home screen, press MENU, and then touch **Settings > Security & location**.
- 2 Scroll to the Screen unlock pattern section, and then touch **Set unlock pattern**.

The first time you do this, you’re presented with a short tutorial on creating an unlock pattern. Touch **Next**. Subsequently, you can press MENU for a refresher.

- 3 Draw your own unlock pattern, and then touch **Continue**.
- 4 Draw the pattern again, and then touch **Confirm**.

The next time you turn on your phone or wake up the screen, you’re prompted to draw your unlock pattern to unlock the screen.

Customizing the Home Screen

You can add application icons, widgets, and other items to any part of the Home screen. You can also change the wallpaper.

See “Getting to Know the Home Screen” on page 29 for an introduction to working with the Home screen.

To add an item to the Home screen

- 1 Open the Home screen pane where you want to add the item.
- 2 Press MENU, and then touch **Add**.
Or just touch & hold an empty location on the Home screen.
- 3 In the menu that opens, touch the type of item you want to add.

You can add a variety of items to the Home screen:

Shortcuts Add shortcuts to applications, a bookmarked webpage, a favorite contact, a Gmail label, a music playlist, and other items.

Widgets Add a clock, music player, a picture frame, the Google search bar, a power manager, or a calendar that shows upcoming appointments. You can also add widgets you downloaded from Android Market.

Folders Add a folder where you can organize Home screen items, or folders that contain all your contacts, contacts with phone numbers, or starred contacts. Your folders' contents are kept up to date automatically.

Wallpapers Edit the current wallpaper of the Home screen. You can choose a photo from your storage card or the Wallpaper gallery.

To move an item on the Home screen

- 1 Touch & hold the item you want to move until it vibrates. Don't lift your finger.
- 2 Drag the item to a new location on the screen.
Tip Pause at the left or right edge of the screen to drag the item onto an extended Home screen.
- 3 When the item is where you want it, lift your finger.

To remove an item from the Home screen

- 1 Touch & hold the item you want to remove until it vibrates. Don't lift your finger.
The Applications tab icon changes to a trash can.
- 2 Drag the item to the trash can icon.
- 3 When the icon and Application tab turn red, lift your finger.

To change the Home screen wallpaper

- 1 On the Home Screen, press MENU, and then touch **Wallpaper**.
You can also touch & hold an empty area of the Home screen and in the menu that opens, touch **Wallpapers**.
- 2 Touch **Pictures** or **Wallpaper gallery**.
 - Touch **Pictures** to use a picture that you have captured using the camera or copied to your phone as a wallpaper. You can crop the picture before setting it as a wallpaper. Working with pictures is described in "Gallery" on page 169.
 - Touch **Wallpaper gallery** to open a screen where you can sample the wallpaper images that come with the phone. Slide the thumbnails to the left and right to view the samples. Touch a sample to view a larger version.
- 3 Touch **Save** or **Set wallpaper**.

To rename a folder

- 1 Touch the folder to open it.
- 2 Touch and hold the folder window's title bar.
- 3 Enter a new name in the dialog.
- 4 Touch **OK**.

Connecting to Networks and Devices

Your phone can connect to a variety of networks and devices, including Mobile networks for voice and data transmission, Wi-Fi data networks, and Bluetooth devices, such as headsets. You can also connect your phone to a computer, to transfer files from your phone's SD card.

In this section

"Connecting to Mobile Networks" on page 50

"Connecting to Wi-Fi Networks" on page 52

"Connecting to Bluetooth Devices" on page 54

"Connecting to a Computer" on page 57

"Connecting to Virtual Private Networks" on page 59

Connecting to Mobile Networks

When you assemble your phone with a SIM card from your wireless service provider (as described in “Getting Started” on page 19), your phone is configured to use your provider’s mobile networks for voice calls and for transmitting data.

Different locations may have different mobile networks available. Initially, your phone is configured to use the fastest mobile network available for data. But you can configure your phone to use only a slower 2G network for data, to extend the life of your battery. You can also configure your phone to access a different set of networks entirely, or to behave in special ways when roaming.

The status bar indicates which kind of data network you’re connected to and the overall voice and data network signal strength:

	Connected to the fastest 3G networks (UMTS or HSDPA)
	Connected to the second-fastest network (EDGE)
	Connected to a 2G network (GPRS)
	The more bars are lit, the stronger the wireless signal
	Connected to another wireless service provider’s network (roaming)

When you’re connected to slower networks, you may wish to postpone using your phone for data-intensive tasks until you are connected to a faster network again, or find a Wi-Fi network to connect to (see “Connecting to Wi-Fi Networks” on page 52).

To check which provider’s network you’re using

- 1 Press HOME > MENU, and then touch **Settings**, to open the Settings application.
- 2 Touch **Wireless controls** > **Mobile networks** > **Access Point Names**.
The name of the wireless service provider you’re currently registered with is selected in the list.

To disable data when roaming

You can prevent your phone from transmitting data over other carriers' mobile networks, when you leave an area covered by your carrier's networks. This is useful if you chose a cell plan that doesn't include data roaming, to control expenses.

- 1 Press HOME > MENU, and then touch **Settings**, to open the Settings application.
- 2 Touch **Wireless controls** > **Mobile networks**, and then uncheck **Data roaming**.

With Data roaming unchecked, you can still transmit data with a Wi-Fi connection (see "Connecting to Wi-Fi Networks" on page 52).

To limit your data connection to 2G networks

You can extend your battery life by limiting your data connections to 2G networks (GPRS or EDGE). When you are connected to a 2G network, you may want to postpone activities that transmit a lot of data (such as sending, uploading, or downloading pictures or video) until you are connected to a faster mobile or other wireless network.

- 1 Press HOME > MENU, and then touch **Settings**, to open the Settings application.
- 2 Touch **Wireless controls** > **Mobile networks**, and then check **Use only 2G networks**.

To edit or create a new access point

If you and your wireless service provider determine you need to change the settings of your current access point name (APN) or to create a new one, you must obtain the access point name (APN) and detailed settings from your provider.

- 1 Press HOME > MENU, and then touch **Settings**, to open the Settings application.
- 2 Touch **Wireless controls** > **Mobile networks**, and then touch **Access Point Names**.
- 3 Touch an existing APN to edit it. Or press MENU, and then touch **New APN**.
Enter the APN settings you obtained from your wireless service provider, by touching each setting you need to edit.
- 4 When you're done, press MENU, and then touch **Save**.
- 5 If you created a new APN, touch it in the APNs screen to start using it.

Connecting to Wi-Fi Networks

Wi-Fi is a wireless networking technology that can provide Internet access at distances of up to 100 meters, depending on the Wi-Fi router and your surroundings.

To use Wi-Fi on your phone, you should have access to a wireless access point or “hotspot.” Some access points are open and you can simply connect to them. Others are hidden or implement security features, so you must configure your phone so it can connect to them.

Tip Turn off Wi-Fi when you’re not using it, to extend the life of your battery.

The status bar displays icons that indicate Wi-Fi status:

	Connected to a Wi-Fi network (waves indicate connection strength)
	Notification that an open Wi-Fi network is in range

When you connect to a Wi-Fi network, the phone obtains a network address and other information it needs from the network, using the DHCP protocol. You can configure the phone with a fixed IP address and make other advanced settings by pressing MENU, and then touching **Advanced** (see “Advanced Wi-Fi settings screen” on page 211).

To turn Wi-Fi on and connect to a Wi-Fi network

- 1 Press HOME > MENU, and then touch **Settings**, to open the Settings application.
- 2 Touch **Wireless controls > Wi-Fi settings**.
- 3 Check **Wi-Fi** to turn it on.

The phone scans for available Wi-Fi networks and displays the names of those it finds in the Wi-Fi networks list.

If the phone discovers a network you connected to in the past, it connects to it.

Note Secured networks are indicated with a lock icon.
- 4 Touch a network to connect to it.

If the network is open, a dialog prompts you to confirm that you want to connect to that network by touching **Connect**.

If the network is secured, you’re prompted to enter a password or other credentials (ask your network administrator for details).

When you're connected to a network, you can touch its name in the Wi-Fi settings screen to open a dialog with details about the speed, security, assigned address, and related settings.

To receive notifications when open networks are in range

By default, when Wi-Fi is on, you receive notifications in the status bar when your phone detects an open Wi-Fi network.

- 1 Turn on Wi-Fi, if it's not already on.
- 2 In the Wi-Fi settings screen, check **Network notification**.

You can also uncheck this option to stop receiving notifications.

To add a Wi-Fi network

You can add a Wi-Fi network so the phone will remember it, along with any security credentials, and connect to it automatically when it is in range. You must also add a Wi-Fi network to connect to it, if it does not broadcast its name (SSID), or to add a Wi-Fi network when you are out of range.

To join a secured network, you will need to contact the network's administrator to learn what security scheme is deployed on it and to obtain the password or other required security credentials.

- 1 Turn on Wi-Fi, if it's not already on.
- 2 In the Wi-Fi settings screen, touch **Add Wi-Fi network** (at the bottom of the list of discovered networks).
- 3 Enter the SSID (name) of the network and if the network is secured, touch the Security menu and then touch the type of security deployed on the network.
- 4 Enter any required security credentials.
- 5 Touch **Save**.

The phone connects to the wireless network, and any credentials you entered are saved, so you are connected automatically the next time you come within range of this network.

To forget a Wi-Fi network

You can make the phone forget about the details of a Wi-Fi network you added, for example, if you don't want the phone to connect to it automatically or if it is no longer a network you use.

- 1 Turn on Wi-Fi, if it's not already on.
- 2 In the Wi-Fi settings screen, touch & hold the name of the remembered network.
- 3 Touch **Forget network** in the dialog that opens.

Connecting to Bluetooth Devices

Bluetooth is a short-range wireless communications technology that devices can use to exchange information over a distance of about eight meters. The most common Bluetooth devices are headphones, for making calls or listening to music, and hands-free kits for cars.

There are several Bluetooth profiles that define the features and communications standards for Bluetooth devices. For a list of the profiles supported by your phone, see "Specifications" on page 225.

To connect to a Bluetooth device, you must turn on your phone's Bluetooth radio. The first time you use a new device with your phone, you must "pair" them, so they know how to connect securely to each other. Subsequently, you can simply connect to a paired device.

Note Turn off Bluetooth when you're not using it, to extend the life of your battery. You may also be required to turn Bluetooth off in some locations, such as hospitals or airplanes. Bluetooth is turned off in Airplane mode.

The status bar displays icons that indicate Bluetooth status:

	Bluetooth is on
	Connected to a Bluetooth device

To turn Bluetooth on or off

- 1 Press HOME > MENU, and then touch **Settings**, to open the Settings application.
- 2 Touch **Wireless controls**.
- 3 Check or uncheck **Bluetooth** to turn it on or off.

To change your phone's Bluetooth name

Your phone has a generic Bluetooth name by default, which is visible to other devices when you connect them. You can change the name so it more recognizable or unique.

- 1 Press HOME > MENU, and then touch **Settings**, to open the Settings application.
- 2 Touch **Wireless controls** > **Bluetooth settings**.
The Bluetooth settings screen opens.
- 3 If Bluetooth isn't turned on, check **Bluetooth** to turn it on.
- 4 Touch **Device name**, enter a name, and then touch **OK**.

To pair your phone with a Bluetooth device

You must pair your phone with another device before you can connect to it. You only need to do this the first time you connect to a device.

- 1 Press HOME > MENU, and then touch **Settings**, to open the Settings application.
- 2 Touch **Wireless controls** > **Bluetooth settings**.
- 3 If Bluetooth isn't turned on, check **Bluetooth** to turn it on.
Your phone scans and then displays the IDs of all available Bluetooth devices in range.
- 4 If the device you want to pair with isn't in the list, make it discoverable.
See the device's documentation to learn how to make it discoverable by your phone, and for any other instructions for pairing.
- 5 If your phone stops scanning before you make the other device discoverable, touch **Scan for devices**.
- 6 Touch the ID of the other device in the list to pair them.

The devices pair with each other. If you're prompted to enter a passcode, try entering 0000 or 1234 (the most common passcodes), or consult your device's documentation to learn its passcode.

If the pairing is successful, your phone connects to the device.

To connect to a Bluetooth device

Once paired, you can connect to a Bluetooth device, for example, to switch devices or to reconnect after the phone and the device come back into range.

- 1 Press HOME > MENU, and then touch **Settings**, to open the Settings application.
- 2 Touch **Wireless controls** > **Bluetooth settings**.
- 3 If Bluetooth isn't turned on, check **Bluetooth** to turn it on.
- 4 In the list of devices, touch a paired but unconnected device in the list.
If the device you expected isn't displayed, touch **Scan for devices**.

When the phone and the device are connected, the device is displayed as connected in the list.

To configure which features of a Bluetooth device you want to use

Some Bluetooth devices have multiple profiles. Profiles can include the ability to transmit your phone conversations or to play music in stereo. If a device supports multiple profiles, you can select which profile you want to use with your phone.

- 1 Touch & hold the device in the Bluetooth settings screen.
- 2 Touch **Options** in the menu that opens.
A screen opens with a list of the device's profiles.
- 3 Check or uncheck a profile to use it or not.
- 4 When you're done, press BACK.

To disconnect from a Bluetooth device

- 1 Touch the device in the Bluetooth settings screen.
- 2 Touch **OK** in the dialog that asks you to confirm you want to disconnect.

To unpair a Bluetooth device

You can unpair a Bluetooth device, to erase all pairing information about it.

- 1 Touch & hold the device in the Bluetooth settings screen.
- 2 Touch **Unpair** or **Disconnect & unpair** in the menu that opens.

Connecting to a Computer

You can connect your phone to a computer with a USB cable, to transfer music, pictures, and other files between your phone's SD card and the computer.

Warning! When connecting your phone to a computer and mounting its SD card, you must follow your computer's instructions for connecting and disconnecting USB devices, to avoid damaging or corrupting the files on your SD card.

To connect your phone to a computer

- 1 Use the USB cable that came with your phone to connect the phone to a USB port on your computer.

You receive a notification that the USB is connected.

- 2 Open the Notifications panel, and then touch **USB connected**.

For details on working with the Notifications panel, see "Managing Notifications" on page 42.

- 3 Touch **Mount** in the dialog that opens asking if you want to transfer files.

You receive a new notification when the phone is connected as USB storage.

Your phone's SD card is mounted as a drive on your computer. You can now copy files to and from the SD card. For more information, see the documentation for your computer.

Note During this time, you can't access the SD card from your phone, so you can't use applications that rely on the SD card (such as Camera, Gallery, or Music).

To disconnect your phone from the computer

- 1 Unmount the SD card on your computer.
You must carefully follow your computer's instructions to unmount the SD card and disconnect USB devices correctly, to avoid losing information on the card.
- 2 Open the Notifications panel, and then touch **Turn off USB storage**.
- 3 In the dialog that asks you to confirm that you first unmounted the SD card on the computer, touch **Turn Off**.

To safely remove the SD card from your phone

You can safely remove the SD card from your phone any time the phone is turned off, as described in "Getting Started" on page 19. But if you need to remove the storage card while the phone is on, you must unmount the storage card from the phone first, to prevent corrupting or damaging the storage card.

- 1 Press HOME > MENU, and then touch **Settings**, to open the Settings application.
- 2 Touch **SD card & phone storage**.
- 3 Touch **Unmount SD card**.

You can now safely remove the SD card from the phone.

To format an SD card

If you purchase a new SD card, you may need to format it before you can use it with your phone. You can also format an SD card to erase its contents.

- 1 Press HOME > MENU, and then touch **Settings**, to open the Settings application.
- 2 Touch **SD card & phone storage**.
- 3 If necessary, touch **Unmount SD card**.
You can only format an SD card when it is unmounted.
- 4 Touch **Format SD card** and on the screen that warns you that formatting the SD card will erase its contents, touch **Format SD card**.

Connecting to Virtual Private Networks

Virtual private networks (VPNs) are a technology for connecting to the resources inside a secured local network from another network. VPNs are commonly deployed by corporations, schools, and other institutions so their users can access local network resources when not on campus.

There are numerous systems for securing VPN connections, including some that rely on secure certificates and other schemes to ensure that only authorized users can connect. You must obtain the security details from your network administrator to configure VPN access from your phone.

Working with secure certificates

If your organization's VPN access relies on secure certificates, you must obtain the certificates and store them in your phone's secure credential storage, before you can configure VPN access on your phone.

If your network administrator instructs you to download the certificates from a web site, you'll be prompted to set a password for the credential storage when you download the certificates. If your network administrator asked you to obtain the certificates in some other way, you will need to use the Security & location settings to set a password for the credential storage first (see "Security & Location Settings" on page 216).

To add a VPN

- 1 Press HOME > MENU, and then touch **Settings**, to open the Settings application.
- 2 Touch **Wireless controls** > **VPN settings**.
- 3 Touch **Add VPN**.
- 4 Touch the type of VPN you want to add.
- 5 In the screen that opens, follow the instructions from your network administrator to configure each component of the VPN's settings.
- 6 Press MENU, and then touch **Save**.

The VPN is added to the list on the VPN settings screen.

To connect to a VPN

- 1 Open the Settings application.
- 2 Touch **Wireless controls** > **VPN settings**.

The VPNs you've added are listed on the VPN settings screen.

- 3 Touch the VPN you want to connect to.
- 4 In the dialog that opens, enter any requested credentials, and then touch **Connect**.

When you're connected to a VPN, you receive an ongoing notification in the status bar. If you are disconnected, you receive a notification that you can use to return to the VNP settings screen so you can reconnect to it (see "Managing Notifications" on page 42).

To disconnect from a VPN

- Open the Notifications panel, and then touch the ongoing VPN notification to disconnect.

Placing and Receiving Calls

You can place phone calls by dialing a phone number, or from your contacts. When on a call, you can manage incoming calls, by answering them or sending them to your voicemail box. You can even set up conference calls, with several participants.

In this section

"Placing and Ending Calls" on page 62

"Answering or Rejecting Calls" on page 64

"Working with the Call Log" on page 65

"Calling Your Contacts" on page 67

"Listening to Your Voicemail" on page 68

"Dialing by Voice" on page 68

"Options During a Call" on page 69

"Managing Multiple Calls" on page 70

Placing and Ending Calls

You can place calls with the Dialer application. You can also place calls when working in the Call log (see “Working with the Call Log” on page 65) or in Contacts (see “Communicating with Your Contacts” on page 79).

To open the Dialer

- Press the CALL button, and then touch the **Dialer** tab.
- OR
- Touch the Dialer icon  on the Home screen or in the Applications tab.
- OR
- If you're already working with Contacts or the Call Log, touch the **Dialer** tab.

To place a call by dialing

- 1 Open the Dialer.
- 2 Touch keys on the Dialer to enter the phone number.

If you enter a wrong number, touch  to erase digits one by one.

To erase the entire number, touch & hold .

To dial an international number, touch & hold the **0** key to enter the plus (+) symbol. Enter the appropriate international prefix, followed by the full phone number.

- 3 Press the CALL button to dial the number you entered. Or just touch the number on screen.

During a call, you can switch applications, for example, to look up information using the Browser. The green phone icon appears in the Status bar while the call is underway, as a reminder.

Press the VOLUME UP / DOWN buttons to adjust the in-call volume.

Press MENU to place a call on hold, add a caller, and other in-call options, as described in "Options During a Call" on page 69.

To end a call

- Press the END-CALL / POWER button.

To quickly redial the last number you called

- Press the CALL button twice.
- OR
- If you have the Dialer open, touch the **Call log** tab, and then press the CALL button to redial.

To disable phone calls (Airplane mode)

In some locations, such as on airplanes, you must turn off your phone's wireless connections, by placing your phone in Airplane mode.

- 1 Press & hold the END-CALL / POWER button.
- 2 Touch **Airplane mode**.

Answering or Rejecting Calls

When you receive a phone call, the incoming call screen opens with the caller ID and additional information about the caller, depending on how much information about the caller you have entered in Contacts (see “Contacts” on page 73).

All incoming calls are recorded in the Call log (see “Working with the Call Log” on page 65). If you miss a call, you also receive a notification (see “Managing Notifications” on page 42).

Selecting a ringtone and its volume are described in “Sound & Display Settings” on page 214.

To answer a call

- Press the CALL button.
If you were already on a call, the first call is placed on hold while you answer the new call.
To silence the ringer before answering the call, press the VOLUME DOWN button.
- If you’re already on a call, you can also press MENU for other options. See “Options During a Call” on page 69.

← If you’re already on a call, a summary of the current call is displayed.

← Press MENU for options for answering or rejecting the call.

To reject a call

- Press the END-CALL / POWER button to send the caller directly to your voicemail box.

Working with the Call Log

The Call log is a list of all the calls you've placed, received, or missed. It offers a convenient way to redial a number, return a call, add a number to your Contacts.

To open the Call log

- Press the CALL button.

OR

- If you have the Dialer or Contacts open, touch the **Call log** tab.

Calls are listed with the most recent at the top. You can scroll to view earlier entries in the log.

To quickly dial a number in the Call log

- Touch the green phone  icon at the left of the entry.

You can also touch & hold the entry to open a menu with options for communicating with the entry in other ways.

To add an entry's number to your Contacts

- 1 Touch & hold the entry.
- 2 Touch **Add to contacts** in the menu that opens.
- 3 In the list of contacts that opens, touch **Create new contact** at the top, or scroll to find, and then touch an existing contact you want to add the number to.

For more information on creating and editing contacts, see "Contacts" on page 73.

To take other actions on a Call log entry

- Touch a Call log entry to open a screen where you can call the contact again, send the contact a message, add the number to your Contacts, and learn more about the original call.
- Touch & hold a Call log entry to open a menu where you call the contact, view the contact information (if the number is stored in your contacts list), edit the number before you redial, and more.

To clear the Call log

- When viewing the Call log, press MENU, and then touch **Clear call log**.
You can also touch & hold an entry in the log and in the menu that opens, touch **Remove from call log** to remove just that entry from the log.

Calling Your Contacts

You can touch one of your contacts' phone numbers to dial it, instead of entering the number in the Dialer.

Adding, editing, and performing other tasks with your contacts is described in "Contacts" on page 73. If you have contacts on the web, they're synchronized with your phone when you first connect to your Google Account.

To call a contact

- 1 Press CALL, and then touch the **Contacts** tab.
- 2 Touch the contact you want to call.
- 3 Touch the phone number you want to use to call the contact.
See "Communicating with Your Contacts" on page 79 for other options.

To call a favorite contact

- 1 Press CALL, and then touch the **Favorites** tab.
The list of your favorite contacts is followed by a list of the numbers you call most often.
You add and remove favorites by touching the star next to their names, when you're viewing information about the contact. For details, see "Adding a Contact to Your Favorites" on page 77.
- 2 Touch the favorite contact you want to call.
- 3 Touch the phone number you want to use to call the contact.

Listening to Your Voicemail

A voicemail icon  appears in the status bar when you have new voicemail messages.

If you have not set up your voicemail number, or if you need to change it, you can do that with the Call settings (see “Call Settings” on page 213).

To listen to your voicemail

- Open the Notifications panel, and then touch **New voicemail**.
Responding to notifications is described in “Managing Notifications” on page 42.
OR
- Open the Dialer, and then touch & hold the 1 key.
Opening the Dialer is described in “Placing and Ending Calls” on page 62.
Your carrier’s voicemail system guides you through the process of listening to and managing your voicemail. The first time you call your voicemail, it also guides you through the process of recording greetings, setting a password, and more.

Dialing by Voice

You can search for and dial a contact by speaking, rather than by using the Dialer or touching a contact’s number.

To place a call by speaking

- 1 Press and hold the CALL button.
You’re prompted to speak the name of the contact you want to call.
- 2 Speak the name of the contact you want to call.
If the voice dialer finds a match, it dials the contact’s default number.
For details about setting a contact’s default number, see “Editing Contact Details” on page 78.

Options During a Call

When a call is in progress, you can press MENU for a menu of items you can use to put a call on hold, dial another contact for a phone conference, mute your microphone, and more.

During a call, you can also switch between callers and set up conference calls, as described in “Managing Multiple Calls” on page 70.

During a call, press MENU to open a menu of call options.

To place a call on hold

- Press MENU, and then touch **Hold**.

The hold icon  appears in the status bar, to remind you that you have a call on hold.

From any other application, you can open the Notifications panel and touch the entry for the call on hold, to return to the current call screen (for details about notifications, see “Managing Notifications” on page 42).

When viewing the current call screen, you can take the call off hold by pressing the CALL button or by pressing MENU and touching **Hold** again.

To mute the microphone during a call

- Press MENU, and then touch **Mute**.

The mute icon  appears in the status bar, to remind you that the microphone is turned off.

When viewing the current call screen, you can unmute the microphone by pressing MENU and touching **Mute** again.

The microphone is unmuted automatically when your current call ends.

To turn the speakerphone on or off

- Press MENU, and then touch **Speaker**.

The speakerphone icon  appears in the status bar and the sound from your call is played out your phone's speaker.

When viewing the current call screen, you can turn the speakerphone off by pressing MENU and touching **Speaker** again.

The speaker is turned off automatically when your current call ends.

Warning! To avoid damage to your hearing, do not hold the phone against your ear when the speakerphone is turned on.

To switch between a Bluetooth headset and the phone

When a Bluetooth headset is paired and connected to your phone, you can conduct all calls on the headset for hands-free conversation.

For details about configuring the phone to use a Bluetooth headset, see "Connecting to Bluetooth Devices" on page 54.

When using the Bluetooth headset during a call, the current call screen gets a blue border and the ongoing call icon turns blue in the status bar.

- Press MENU, and then touch **Bluetooth** to switch from the headset to the phone, or vice versa.

The current call screen and call icon in the status bar change color to indicate whether you're connected to the Bluetooth headset, or not.

Managing Multiple Calls

When you're on a call, the phone notifies you when you have another incoming call and gives you the option of accepting or rejecting it (as described in "Answering or Rejecting Calls" on page 64). If you accept the new call, you can switch between the two callers or merge the two calls into a single conference call. You can also set up a conference call with multiple callers.

To switch between current calls

- Press MENU, and then touch **Swap calls**.
The current call is put on hold and you join the other.

To set up a conference call

Contact your wireless service provider to learn whether they support conference calls and how many participants you can include.

- 1 Place a first call to the first participant.
See “Placing and Ending Calls” on page 62 for details.
- 2 When you’re connected, press MENU, and then touch **Add call**.
The first participant is put on hold and you’re prompted to dial the second caller.
- 3 Place the next call, using the Dialer, the Call log, or your Contacts.
- 4 When you’re connected, press MENU, and then touch **Merge calls**.
The participant is added to the conference call.
You can add as many callers as your carrier supports.

Tip During a conference call, press MENU, and then touch **Manage conference** to drop a conference call participant or to talk privately to one of the participants.

To end a conference call and disconnect all callers

- Press the END-CALL / POWER button.

Contacts

Contacts application gives you quick and easy access to the people you want to reach. When you first turn on your phone and sign into your Google Account, any Google contacts are downloaded to your phone. Subsequently, changes to either set of contacts are synchronized. Information about your contacts is shared with other applications, such as Gmail, Google Talk, Messaging, Gallery (for sharing photos and videos), and so on.

In this section

"Opening Your Contacts" on page 74

"Adding Contacts" on page 76

"Adding a Contact to Your Favorites" on page 77

"Searching for a Contact" on page 77

"Editing Contact Details" on page 78

"Communicating with Your Contacts" on page 79

Opening Your Contacts

Open Contacts to add, view, and communicate with your friends and acquaintances.

To open your Contacts

- Touch the Contacts icon  in the Applications tab.

OR

- Press CALL, and then touch the **Contacts** tab.

All your contacts are displayed alphabetically in a scrolling list. Each contact is followed by the default phone number.

You can drag the list up and down to scroll it, or slide your finger up or down to scroll quickly. Either way, a tab briefly appears to the right of the list, which you can drag up and down to scroll very quickly, while displaying the letter of the alphabet for the contacts you're scrolling past.

To open a list of your favorite contacts

- Open your Contacts, and then touch the **Favorites** tab.

The Favorites tab lists the contacts you've added to the list (see "Adding a Contact to Your Favorites" on page 77), followed by a list of your most frequently called contacts.

To view details about a contact

- 1 Open your Contacts.
- 2 Touch the contact whose details you want to view.

Entries for communicating with the contact are followed by the other details you've added about the contact.

Touch to add or remove this contact from your favorites.

- Touch a contact method to start communicating with the contact.
- Touch an address to view it on Google Maps.
- Scroll to view other information about the contact.

- You can touch a communication method to start dialing, texting, or emailing the contact using the listed number, address, and so on.
- Touch an address to view it on Google Maps (see “Maps” on page 153).
- You can also press MENU, and then touch **Edit contact** to edit the contact's information (see “Editing Contact Details” on page 78), or touch **Delete contact** to delete all information about the contact from your Contacts.

Adding Contacts

You can add contacts on your phone and synchronize them with your Google contacts on the web. You can also import contacts stored on your SIM card. When you reply to or forward an email message to an email address that is not in Contacts, the email address is added to your contacts list.

To add a new contact

- 1 Open your Contacts.
- 2 Press MENU, and then touch **New contact**.
- 3 Enter the contact's name.
- 4 Touch a category of contact information (such as phone numbers and email addresses) to enter that kind of information about your contact.
Scroll the page to view all categories.
- 5 Touch a category's plus **+** button to add more than one entry for that category (such as more than one phone number).
You can touch the button to the left of the item of contact information to open a menu with some preset labels (such as **Mobile** or **Work** for a phone number), or touch **Custom** in the menu to create your own label.
- 6 Press MENU, and then touch **Add Icon** to pick a picture to display next to the contact's name in your lists of contacts.
- 7 When you're done, scroll to the bottom of the screen, and then touch **Done**.

To import contacts from your SIM card

Your service provider may store some useful contacts on your SIM card (such as customer care and voicemail numbers). You also may have stored contacts on the SIM card if you're moving it from another phone. You can add some or all of these contacts to the Contacts application.

- 1 Open your Contacts.
 - 2 Press MENU, and then touch **Import contacts**.
Each contact on your SIM card is displayed in a list.
 - 3 Touch a contact to enter its details in a new contact screen, which you can edit and then save as you would when adding a new contact.
- OR
- Or press MENU, and then touch **Import all**.

Adding a Contact to Your Favorites

The Favorites tab contains the short list of the contacts you communicate with most often.

To add a contact to your favorites

- 1 Open your Contacts.
- 2 Touch & hold the contact you want to add to your list of favorites.
- 3 Touch **Add to favorites** in the menu that opens.
Favorite contacts have a gold star next to their names, when you view their details (see “Editing Contact Details” on page 78).

To remove a contact from your favorites list

- 1 Open your Contacts, and then touch the **Favorites** tab.
- 2 Touch & hold the contact you want to remove.
- 3 Touch **Remove from favorites** in the menu that opens.

Searching for a Contact

You can search for contacts by name.

To search for a contact

- 1 Open your Contacts.
- 2 Press the SEARCH button.
- 3 Start entering the name of the contact you’re searching for.
As you type, contacts with matching names appear below the search box.
- 4 Touch a matching contact in the list to open its details screen. Or touch the Search icon  to open a screen with a list of matching contacts.
Tip You can also filter a list of contacts by opening the keyboard and entering text.

Editing Contact Details

You can change or add details about one of your existing contacts. You can also set the ringtone for when a contact calls, or divert all calls from a contact to your voicemail.

To edit contact details

- 1 Open your Contacts or Favorites.
- 2 Touch & hold the contact whose details you want to edit and in the menu that opens, touch **Edit contact**.
You can also press MENU, and then touch **Edit contact** when viewing a contact's details.
- 3 Edit the contact information, using the same controls as when you create a contact.
- 4 Scroll to the bottom of the screen and touch **Done**.

To change a contact's default phone number

A contact's default phone number appears below the contact's name in the contacts list. The default phone number is used when you initiate a call or send a text message from the contacts list (by touching & holding a contact).

- 1 Open your Contacts or Favorites.
- 2 Touch the name of a contact in the list to view its details.
- 3 Touch & hold the phone number you want to use as the contact's default phone number.
- 4 Touch **Make default number** in the menu that opens.

The default phone number moves on top of the list and the default number icon  appears next to it.

To divert all of a contact's calls to your voicemail

- 1 Edit the contact's details.
- 2 Scroll to the bottom of the details screen, and then check **Incoming calls**.
- 3 Touch **Done**.

When this contact calls you, your phone won't ring and the caller is sent directly to your voicemail.

To set a ringtone for a contact

- 1 Edit the contact's details.
- 2 Scroll to near the bottom of the details screen, and then touch **Ringtone**.
- 3 In the scrolling list of ringtones that opens, touch the one you want to play when the contact calls.
The ringtone plays a sample.
- 4 Touch **OK**.

Communicating with Your Contacts

From the Contacts or Favorites tab you can quickly call or send a text (SMS) or multimedia message (MMS) to a contact's default phone number. You can also open details about a contact to view a list of all the ways you can communicate with that contact.

This section describes ways to initiate communication when viewing your list of Contacts. Contacts shares your contacts with many other applications, such as Gmail and Messenger. See the sections on those applications to learn how to access your contacts from within those applications.

To communicate with a contact

- 1 Open your Contacts or Favorites.
- 2 Touch the contact you want to communicate with.
- 3 In the contact's details screen, touch the way in which you want to start communicating with the contact.
For phone numbers, you switch to the Dialer as the number is called. For other kinds of communication, you switch to the appropriate application with contact's address entered.

To call a contact's default number

- 1 Open your Contacts or Favorites.
- 2 Touch & hold the contact you want to call.
- 3 Touch **Call** in the menu that opens.
The actual menu item depends on the default number you set for your contact, so it may be **Call Mobile**, **Call Work**, and so on.

You switch to the Dialer as the number is called. For more information on placing phone calls, see “Placing and Receiving Calls” on page 61.

To send a text or multimedia message to a contact’s default number

- 1 Open your Contacts or Favorites.
- 2 Touch & hold the contact.
- 3 Touch **Send SMS/MMS** in the menu that opens.

You switch to the Messaging application with the contact’s phone number entered in a new message. For more information on sending text and multimedia messages, see “Messaging” on page 133.

Gmail

Gmail is Google's web-based email service. When you first set up your phone, you configured it to use an existing Gmail Account, or you created a new account. The first time you open the Gmail application on your phone, your Inbox contains the messages from your Gmail Account on the web.

In this section

- "Gmail is Different" on page 82
- "Opening Gmail and Your Inbox" on page 83
- "Reading Your Messages" on page 84
- "Composing and Sending a Message" on page 86
- "Replying to or Forwarding a Message" on page 87
- "Working with Conversations in Batches" on page 88
- "Labeling a Conversation" on page 89
- "Starring a Message" on page 90
- "Viewing Conversations by Label" on page 90
- "Reporting Spam" on page 91
- "Searching for Messages" on page 91
- "Archiving Conversations" on page 92
- "Synchronizing Your Messages" on page 92
- "Appending a Signature to Your Messages" on page 93
- "Changing Gmail Settings" on page 94

Gmail is Different

Gmail is web-based Your messages are stored on Google servers, but you read, write, and organize messages using the Gmail application on your phone or using a web browser on a computer. Because your mail is stored on Google servers, you can also search your entire message history, backed by the speed and power of Google search.

Actions you take in one place are reflected everywhere: for example, if you read a message in Gmail on your phone, it's marked as read in a web browser; a message you send using a web browser, or even a draft of a message, is visible in Gmail on the phone.

Gmail is conversation-based Each message and all replies to it are grouped in your Inbox as a single conversation. In other email applications, replies to messages are sprinkled across your inbox, typically by date received, so a message and the replies to it are separated by other messages. In this way Gmail makes it easier to follow the "thread" of a conversation.

Gmail is organized by labels, not folders By tagging messages with labels, you can organize your conversations in as many ways as you want. In other email applications, each message can live only in one folder. For example, with Gmail you can label a conversation with your mother about your brother's birthday present with both "Mom" and "Dave." Later, you can look for the message under either label. Using folders, you'd have to store the message in the "Mom" folder or the "Dave" folder, not both.

Gmail for the phone is optimized for mobile: use the web to organize Gmail The best place to organize and learn about Gmail is the web. For example, you can't use the Gmail application on the phone to create the labels and filters you use to organize your messages, but you can label a message. Gmail on the web also offers a host of information about the service, so it's the best place to learn about all of the features of Gmail.

Gmail is for Gmail Of course you can use Gmail to send email to any email address and anyone can send email to you at your Gmail address, but if you want to read messages from another email service provider (using your AOL, Yahoo!, or other email account), use the Email application (see "Email" on page 117).

Opening Gmail and Your Inbox

When you open Gmail, it displays the most recent conversations in your Inbox. Or if you return to Gmail after using other applications, Gmail displays the last screen you were working with.

To open Gmail

- Touch the Gmail icon  in the Applications tab.

See “Opening Applications” on page 37 to learn more about opening and switching applications.

Your Inbox displays conversations with the newest messages at the top. All your conversations are in your Inbox unless you delete, archive, or filter them.

Conversations with new messages have bold subjects. To read a message in a conversation, touch its subject (see “Reading Your Messages” on page 84).

» indicates messages sent directly to you.

» indicates messages you were CC'd on.

Other messages were sent to you as part of a group.

To open your Inbox when Gmail is running

- Press the BACK key until you return to your Inbox.

OR

- When reading a message or viewing a list of labeled conversations, press the MENU key, and then touch **Back to Inbox**.

Note Touch **More** if this option is not displayed.

Reading Your Messages

When viewing a list of conversations in your Inbox or in any list of labeled conversations, you can open a conversation to read its messages.

To read a message

- Touch a conversation that contains the message you want to read.

A conversation opens to the first new (unread) message, or to the first starred message, if you've previously starred a message in the conversation (see "Starring a Message" on page 90).

When reading messages in a conversation, you can use the buttons at the bottom of the screen to archive the entire conversation (see "Archiving Conversations" on page 92), to label it (see "Labeling a Conversation" on page 89), or to delete it.

You can scroll to the bottom of a message to view buttons for replying to or forwarding the message, as described in “Replying to or Forwarding a Message” on page 87.

To reread a message

When you open a conversation, messages you’ve already read are hidden, in a tab that indicates the number of hidden messages.

- 1 Touch the tab that indicates the number of previously read messages.

Touch the tab that indicates the number of read messages to view their summary tabs.

The tab expands into tabs that list the sender and first line of each read message.

- 2 Touch an expanded tab to reread the body of the message.

When reading a message or when its tab is selected, you can press MENU, and then touch **Mark unread** to return a read message to the unread state — for example, to remind yourself to read it again later.

Composing and Sending a Message

You can compose and send a message to people or groups with Gmail or other email addresses.

To compose and send a message

- 1 Press MENU, and then touch **Compose**.
- 2 Enter the message recipient's email address in the **To** field. If you are sending the email to several recipients, separate the email addresses with a comma. You can add as many message recipients as you want.

As you enter text, matching addresses are offered from your Contacts (see "Contacts" on page 73). You can touch a suggested email address or enter a new one.
- 3 Press MENU, and then touch **Add Cc/Bcc** to address a copy or blind copy of the message.
- 4 Enter a subject for the message.
- 5 Enter the text of the message.

For more information about entering and editing text, see "Using the Onscreen Keyboard" on page 33 and "Editing Text" on page 35.
- 6 Press MENU, and then touch **Attach** to send a photo with the message.

See "Gallery" on page 169 to learn more about working with photos.
- 7 Touch **Send**.
 - If you're not ready to send the message, touch **Save as draft** instead. You can read your drafts by openings email with the Draft label (see "Viewing Conversations by Label" on page 90).
 - Touch **Discard** to abandon the message, including any saved drafts.
 - If you aren't connected to a network, for example, if you're working in Airplane mode, the messages you send are stored on your phone with the Outbox label, until you connect to a network again.

Replying to or Forwarding a Message

When reading a message, you can continue the conversation by replying to it or forwarding it.

To reply to or forward a message

- 1 Scroll to the bottom of a message.
- 2 Touch **Reply**, **Reply to all**, or **Forward**.

Replying to messages without changing the subject adds your reply to the current conversation. Forwarding a message or changing the subject starts a new conversation.

The message opens in a new screen where you can add or remove addresses, edit the subject, and add or remove text or attachments, as described in "Composing and Sending a Message" on page 86.

You can add one or more people to an ongoing conversation by replying to all and then adding the new people's addresses to the reply.

All the messages in the conversation, up to the one you are replying to or forwarding, are included in the new message; later messages are omitted.

- 3 Touch **Send**.

Working with Conversations in Batches

You can archive, label, delete, or perform other actions on a batch of conversations at once, in your Inbox or in another labeled list of conversations.

- 1 In the Inbox or other conversation list, check the conversations you want to work with as a batch.

When you check a conversation, the **Archives**, **Labels**, and **Delete** buttons appear at the bottom of the screen.

- 2 Touch **Archive**, **Label**, or **Delete**. Or press MENU and touch **Add star**, **Report spam**, **Mute**, **Mark read / Mark unread**, or **Deselect all**.

Your action affects the entire batch of messages.

You can hide the checkboxes if you never work with batches of messages, to give more room for the subjects of conversations (see "Changing Gmail Settings" on page 94).

Labeling a Conversation

You organize conversations by labeling them. Gmail has several built-in labels. You can also add your own, using Gmail on the web.

Viewing labeled conversations is described, along with a list of standard labels, in “Viewing Conversations by Label” on page 90.

To label a conversation

- 1 When reading a conversation’s messages, touch **Labels**.
- 2 In the dialog that opens, check the labels you want to assign to the conversation. Touch **OK**.

To label a batch of conversations at once

You can assign or change the labels of one or more conversations at once.

- 1 In your Inbox or other conversation list, check the conversations you want to label.
See “Working with Conversations in Batches” on page 88.
- 2 Touch the **Labels** button at the bottom of the screen.
- 3 In the dialog that opens, check the labels you want to assign to the conversation.
- 4 Touch **OK**.

To change a conversation’s labels

- 1 When reading a conversation’s messages, press MENU, and then touch **Change labels**.
You can also change a batch of conversations’ labels, in the same way as you label a batch of conversations, using the **Labels** button.
- 2 In the dialog that opens, check and uncheck the labels you want.
- 3 Touch **OK**.

Starring a Message

You can star a message that is important to you for any reason. Conversations with starred messages display a star in your Inbox and other conversation lists. To view just conversations with starred messages, see “Viewing Conversations by Label” on page 90.

To star a message

- When reading a message, touch the star in its header.
- OR
- When viewing a conversation, touch its star to star the newest message in the conversation.

To unstar a message

- Touch the message’s star again.

To unstar all messages in a conversation

- Touch a star in a conversation list.

Viewing Conversations by Label

You can view a list of the conversations that have the same label, including conversations with starred messages.

See “Labeling a Conversation” on page 89 or “Starring a Message” on page 90 for information on assigning labels and stars.

- 1 When viewing your Inbox or another conversation list, press MENU, and then touch **View labels**.

Your labels are presented in a scrolling list.

- 2 Touch a label to view a list of conversations with that label.

The conversation list resembles your Inbox, but the label replaces “Inbox” in the title bar. You work with labeled conversation lists in the same way as with your Inbox.

You can control how many conversations are kept current on your phone, by label and time, as described in “Synchronizing Your Messages” on page 92.

Reporting Spam

The Gmail webmail service works hard to prevent spam (unwanted and unsolicited “junk” mail) from reaching your Inbox. But when spam makes it through, you can help improve the Gmail service by reporting the conversation as spam.

To report a conversation as spam

- When reading the conversation's messages, press MENU, and then touch **More > Report spam**.
- OR
- Check one or a batch of conversations in your Inbox or other conversation list, press MENU, and then touch **Report as spam**. See “Working with Conversations in Batches” on page 88.

When you report a conversation as spam, the conversation and all its messages are removed from your Inbox. You can view the messages you’ve marked as spam by viewing messages with the Spam label (see “Viewing Conversations by Label” on page 90).

Searching for Messages

You can search for messages that contain one or more words in their contents or in their addresses, subjects, labels, and so on. When you search for messages, all the messages in your Gmail account on the web are included (except those labeled Trash or Spam), not just those you’ve synchronized onto your phone.

You can also use the advanced search options that are described on the Gmail web site.

- 1 In the Inbox, press MENU, and then touch **Search**.
- 2 Enter the word or words you want to search for, and then touch the Search icon.

A conversation list opens, with all the conversations with messages that contain the words you searched for. The words you searched for are displayed in the title bar.

You work with the conversations in this list just as you would with the conversations in your Inbox or any other conversation list.

Archiving Conversations

You can archive conversations, to move them out of your Inbox without deleting them. Archived conversations are assigned the All Mail label and retain any other labels you've assigned to them (see "Viewing Conversations by Label" on page 90). They're also included in search results. If someone replies to a message you've archived, its conversation is restored to your Inbox.

- When viewing a list of conversations, touch & hold a conversation, and then touch **Archive** in the context menu that opens.

OR

- When reading a message, press MENU, and then touch **Archive**.

Synchronizing Your Messages

The Gmail webmail service has enormous resources for storing your messages; your phone does not. Gmail only downloads some of your messages to your phone, to save space. You can set which conversations and labels are kept current on your phone, and how often these are synchronized.

To select which conversations to synchronize

- 1 Open your Inbox.
- 2 Press MENU, and then touch **Settings > Labels**.

The Label synchronization settings screen opens, with a scrolling list of your Gmail labels. Below each label is its current synchronization setting: **Sync all**, **Sync 4 days**, or no label (conversations with that label are not synchronized).

Example of a label with defined synchronization setting.

- 3 Touch a conversation label whose synchronization settings you want to change.

A dialog for that conversation label opens, with the following options:

- **Sync none** Don't download any conversations that have only this label.
- **Sync 4 days** Download the previous 4 (or number of days you set) of conversations.
- **Sync all** Download all conversations with this label.

To set how many days of conversations to synchronize

- 1 Open your Inbox.
- 2 Press MENU, and then touch **Settings > Labels**.
- 3 Touch **Number of days to sync**.
- 4 Enter the number of days, and then touch **OK**.

Appending a Signature to Your Messages

You can append one or a few lines of text to every message you send, such as your name, contact info, or even "Sent by an Android."

- 1 Open your Inbox or another labeled list of conversations.
- 2 Press MENU, and then touch **Settings > Signature**.
- 3 Enter a signature.

Enter a signature to append to your messages and touch **OK**.

- 4 Touch **OK**.

Changing Gmail Settings

You can change a number of settings for Gmail. Notification volumes and some synchronization settings are changed in the Settings application (see “Settings” on page 209).

- To change Gmail settings, open your Inbox, press MENU, and then touch **Settings**.

General Settings

Signature Opens a dialog where you can enter text to append to every message you send. See “Appending a Signature to Your Messages” on page 93.

Confirm delete Check to open a dialog each time you delete messages, asking you to confirm that you want to delete them.

Batch operations When checked, adds a check box to the left of each conversation, so you can add it to a batch. See “Working with Conversations in Batches” on page 88.

Labels Opens the Labels screen, where you can manage which conversations are synchronized. See “Synchronizing Your Messages” on page 92.

Notification settings

Email notifications Check to receive a notification whenever you receive new email. See “Managing Notifications” on page 42.

Select ringtone Opens a dialog where you can select the ringtone to sound when you receive new email notifications.

Vibrate Check to vibrate the phone when you receive a new email notification.

Calendar

Calendar works with Google Calendar web-based calendaring service for creating and managing events, meetings, and appointments.

When you first set up your phone, you configured it to use an existing Google Account, or you created a new account. The first time you open the Calendar application on your phone, it displays any existing calendar events from your Google Account on the web.

Calendar on the phone is optimized for the phone. There are some Calendar features (such as creating Calendars and inviting guests to events) that are only available in Calendar on the web. Be sure to visit Google Calendar on the web (<http://calendar.google.com>) to learn more about the features the web and phone versions share, and to learn about and use web-only features.

"Displaying and Synchronizing Calendars" on page 104

"Changing Calendar Settings" on page 105

Viewing Your Calendar and Events

Open Calendar to view the event you have scheduled in the coming days, weeks, or months.

To open your calendar

- Touch the Calendar icon  in the Applications tab.

See “Opening Applications” on page 37 to learn more about opening and switching applications.

Note If you have created or subscribed to more than one calendar using Google Calendar on the web, events from each calendar are displayed in a different color. For more information about which calendars are displayed on your phone, see “Displaying and Synchronizing Calendars” on page 104.

To change your calendar view

- Press MENU, and then touch **Agenda**, **Day**, **Week**, or **Month**.
Each view displays in the events in your calendar for a period of time. For details, see:
 - “Working in Agenda View” on page 97
 - “Working in Day View” on page 98
 - “Working in Week View” on page 99
 - “Working in Month View” on page 99
- To view more information about an event in Agenda view, touch the event.

- To view more information about an event in Day or Week view, touch the event to open a quick view summary. Touch the quick view for even more information.
- To view the events of a day in Month view, touch a day.

You can also use the TRACKBALL to quickly select events in Agenda, Day, and Week views, and to select days in Month view. Press the TRACKBALL for more information about the selected event or day.

Working in Agenda View

Agenda view is a list of your events of the month in chronological order. All-day or multi-day events are listed at the start of each day.

To switch to Agenda view

- Press MENU, and then touch **Agenda**.

• Touch an event to view more information about it.

• Drag up or down to view earlier or later events.

• This icon indicates that this event repeats.

To learn more about events in Agenda view

- Touch an event.
A screen with details about the event opens. See “Viewing an Event’s Details” on page 100.

Working in Day View

Day view displays a chart of the events of one day, in a table of one-hour rows. All-day or multi-day events are displayed at the top. As much of the title of each event is displayed in the rows corresponding to when it occurs.

To switch to Day view

- Press MENU, and then touch **Day**.

To learn more about events in Day view

- Touch an event to view a quick summary of the event. Touch the summary to view the event’s details.
For more information, see “Viewing an Event’s Details” on page 100.
- Touch & hold an event to open a menu with options for viewing, editing, or deleting the event, and for creating a new event at that time.

To add an event in Day view

- Touch & hold an empty spot or an event in the day to open a menu with the option for creating a new event at that time. See “Creating an Event” on page 101 for details.

Working in Week View

Week view displays a chart of the events of one week. All-day or multi-day events are displayed at the top.

To switch to Week view

- Press MENU, and then touch **Week**.
In a crowded Week view, it can be easiest to select events using the TRACKBALL. Press the TRACKBALL to view more information about the selected event.

To learn more about events in Week view

- Touch an event to view a quick summary of the event. Touch the summary to view the event's details.
For more information, see "Viewing an Event's Details" on page 100.
- Touch & hold an event to open a menu with options for viewing, editing, or deleting the event, and for creating a new event at that time.

To add an event in Week view

- Touch & hold an empty spot or an event in the week to open a menu with the option for creating a new event at that time. See "Creating an Event" on page 101 for details.

Working in Month View

Month view displays a chart of the events of the month. Segments of each day with events are green in each day's vertical bar. Drag up or down to view earlier or later months.

To switch to Month view

- Press MENU, and then touch **Month**.

To view more information about events in Month view

- Touch a day to view its events in Day view. See “Working in Day View” on page 98.

Viewing an Event’s Details

You can view more information about an event in a number of ways, depending on the current view.

To view information about an event

- In Agenda view, touch an event to view its details.
- In Day or Week view, touch an event to open a quick summary. Touch the summary to view details about the event.
- In Month view, touch a day to switch to Day view, and then touch the event whose details you want to view to open a summary, and touch the summary to view the details.

You can change any event reminders or touch the plus + button to add one (see “Setting a Reminder for an Event” on page 102).

If you have permission to change events on the event’s calendar, you can press MENU to edit or delete the event, as described in “Editing or Deleting an Event” on page 101.

Creating an Event

You can use Calendar on your phone to create events that appear on your phone and in your Google Calendar on the web.

To create an event

- 1** On any Calendar view, press MENU, and then touch **New event** to open the Event details screen.
You can also touch & hold a spot in Day, Week, or Month view to open a menu where you can touch **New event**.
- 2** Add details about the event.
Enter a name, time, and additional information about the event, just as you do in Google Calendar on the web.
If you have more than one calendar, you can choose the calendar you want to add the event to.
You can touch the plus **+** button to add additional reminders (see “Setting a Reminder for an Event” on page 102).
- 3** Press MENU, and then touch **Show extra options** to add additional details about the event.
- 4** Scroll to the bottom of the Event details screen, and then touch **Done**.
The event is added to your calendar.
Tip To invite others to the event and configure additional details, open the event in Google Calendar on the web.

Editing or Deleting an Event

You can edit or delete an event you created on the phone or on the web. You can also edit or delete events created by others, if they have given you permission.

To edit an event

- 1** Open the event’s summary.
See “Viewing an Event’s Details” on page 100.
- 2** Press MENU, and then touch **Edit event**.

The Event details screen opens for the event. This is the same screen described in “Creating an Event” on page 101.

You can press MENU, and then touch **Show extra options** to add or edit additional event details.

- 3 Make the changes you want to the event.
- 4 Scroll to the bottom of the screen, and then touch **Done**.

To delete an event

There are a number of ways to delete an event.

- In Agenda view, touch an event to view its details. Press MENU, and then touch **Delete event**.
- In Day or Week view, touch & hold the event, and then touch **Delete event** in the menu that opens.
- When viewing the summary of an event, press MENU, and then touch **Delete event**.
- When editing an event, scroll to the bottom of the Event details screen and touch **Delete**.

If the event repeats, you’re asked whether you want to delete just that occurrence, this and all future occurrences, or all past and future occurrences in your calendar.

Setting a Reminder for an Event

You can set one or more reminders for an event, whether or not you created the event or have permission to edit its other details.

To set a reminder for an event

- 1 Open the event’s summary.
See “Viewing an Event’s Details” on page 100.
- 2 Touch the plus **+** button to add a reminder.
A new reminder is added, for 10 minutes before the event.
- 3 Touch the reminder time and in the dialog that opens, touch the amount of time before the event that you want to be reminded of it.

When the time comes, you're sent a notification that the event is upcoming (see "Responding to an Event Reminder" on page 103).

You can use Calendar on the web to configure additional reminder settings.

To delete an event reminder

- Open the event's summary, and then touch the event's minus **—** button.

Responding to an Event Reminder

If you set a reminder for an event, the upcoming event icon appears in the notifications area of the status bar when the reminder time arrives. (See "Managing Notifications" on page 42 for more information on responding to notifications.)

To respond to an event reminder

- If you receive notifications in the status bar, touch the status bar and slide your finger down to open the Notifications panel. Touch the event notification to open the list of Calendar notifications.
- If you receive notifications with alerts, the Calendar notifications list opens, listing all notifications awaiting your response.

- Touch an event in the Calendar notifications list to view more information about that event.

- Touch **Snooze all** in the Calendar notifications list to snooze all event reminders for five minutes.
- Touch **Dismiss all** in the Calendar notifications list to delete all reminders in the list.
- Press BACK when viewing the Calendar notifications list to keep the reminders pending. The icon remains in the status bar and the reminders remain in the Notifications panel.

Displaying and Synchronizing Calendars

Initially, all calendars you create or subscribe to in Google Calendar on the web are also displayed in Calendar on your phone. But you can pick which calendars you want to show or hide on the phone, and which you want to keep synchronized.

To show or hide calendars

- To show or hide a calendar, press MENU, touch **More > My calendars**, and then check or uncheck a calendar to show or hide it.
Calendars in the My calendars list are kept synchronized on your phone, whether or not you hide them.

To set which calendars are synchronized on your phone

- To stop synchronizing calendars to your phone, press MENU, and then touch **More > My calendars**. Press MENU again, touch **Remove calendars**, check the calendars you want to remove from the My calendars list, and then touch **OK**.
Calendars you remove from the My calendars list are no longer synchronized on your phone, but you remain subscribed to them and can work with them in Calendar on the web.
- To synchronize calendars to your phone, press MENU, and then touch **More > My calendars**. Press MENU again, touch **Add calendars**, check the calendars you want to add to the My calendars list, and then touch **OK**.
Only the calendars you've created or subscribed to on the web, but previously removed from the My calendars list, are shown in the list of calendars you can add.

Changing Calendar Settings

You can change a number of settings for how Calendar displays event and how it notifies you of upcoming events.

- To change Calendar settings, open a Calendar view, press MENU, and touch **More > Settings**.

Hide declined events Check if you don't want to see events you've declined invitations to.

Set alerts & notifications Opens a dialog where you can configure event reminders to open an alert, send you a notification, or turn off event notifications on your phone. See "Setting a Reminder for an Event" on page 102 and "Responding to an Event Reminder" on page 103.

Select ringtone Opens a dialog where you can select the ringtone you want to sound when you receive an event reminder.

Vibrate Check to vibrate the phone when you receive an event notification.

Set default reminder Opens a dialog where you can pick the default time before an event for event reminders.

Google Talk

Google Talk is Google's instant messaging service. You can use it to communicate in real time with other people who also use Google Talk, on a phone or on the web.

In this section

"Signing In and Opening Your Friends List" on page 108

"Chatting with Friends" on page 109

"Changing and Monitoring Online Status" on page 111

"Managing Your Friends List" on page 112

"Changing Google Talk Settings" on page 114

Signing In and Opening Your Friends List

You sign into Google Talk to chat with your friends and to receive invitations to chat. You can do this by opening Google Talk (or by signing in automatically, as described in “Changing Google Talk Settings” on page 114).

You remain signed in even when using other applications, until you deliberately sign out.

To open Google Talk and sign in

- Touch the Google Talk icon  in the Applications tab.

See “Opening Applications” on page 37 to learn more about opening and switching applications.

When you first open Google Talk, you view your Friends list. This list includes any friends you’ve added using Google Talk on the web or on the phone. Adding friends to this list so you can invite them to chat is described in “Managing Your Friends List” on page 112.

Inviting friends to chat and accepting invitations to chat is described in “Chatting with Friends” on page 109.

To return to your Friends list

You can return to your Friends list when chatting with a friend, so you can invite another friend to chat, add a friend, and so on.

- Press MENU, and then touch **Friends list**.

To sign out of Google Talk

You can sign out of Google Talk, for example, if you want to switch the focus of all chats and invitations to Google Talk on a computer. Signing out can also extend your battery life.

- On your Friends list, press MENU, and then touch **More > Sign out**.

You no longer receive chat notifications or see others' Google Talk status in other applications, such as Gmail.

Chatting with Friends

To chat with a friend

- 1 Touch a friend in your Friends list.

If you're already chatting with someone, you can press MENU, and then touch **Friends list** to invite another friend to chat.

The chat screen opens.

- 2 Enter your message, and then touch **Send**.

You can enter an emoticon (or "smiley") on the onscreen keyboard by touching & holding the smiley key, and then touching the emoticon you want. You can also press MENU, and then touch **More > Insert smiley** to open a scrolling list of emoticons, which you can enter by touching.

Your chat session remains open until you end it.

Friends you're chatting with are displayed at the top of your Friends list, with the most recent message displayed in a black-on-white balloon.

To accept an invitation to chat

When a friend opens Google Talk and sends you a message, you receive a notification and their entry in the Friends list turns white and displays the message.

- Touch the friend in your Friends list.

OR

- Open the Notifications panel, and then touch the chat notification.

To learn how to respond to notifications, see “Managing Notifications” on page 42.

A chat window opens where you can exchange messages with your friend.

To switch between active chats

You can switch between chats if you have more than one chat ongoing.

- On the Friends list, touch the name of the person you want to chat with.

OR

- On a chat screen or the Friends list, press MENU, and then touch **Switch chats**. Touch the friend you want to chat with.

To invite a friend to join a group chat

When you’re chatting, you can invite additional friends to join a group chat.

- 1 On a chat screen, press MENU, and then touch **Add to chat**.

- 2 Touch the name of the friend you want to invite.

The friend you invited and the current participants receive an invitation to a group chat. Each one who accepts the invitation joins the group chat.

In a group chat, everyone can see everyone else’s messages.

Group chats appear at the top of your Friends list, with a group chat icon.

To chat on or off the record

Your Google Talk messages are stored, so you can review them later and even search for them in the Chats folder in Gmail. But you can go off the record if you’d rather not store the messages in a chat.

- On a chat screen, press MENU, and then touch **Chat off record**.

If you want to resume saving the messages in the chat, press MENU, and then touch **Chat on record**.

To end a chat

When you're done chatting, you can end the chat so the friend is no longer at the top of your Friends list and the chat is not displayed in the switch chats panel. When you end a chat, the text of the chat is not discarded. If you restart the chat, the conversation is displayed in the new chat window, where you left off.

- In your Friends list, touch & hold the friend you want to stop chatting with and in the menu that opens, touch **End chat**.
- OR
- While on a chat screen, press MENU, and then touch **End chat**.

Changing and Monitoring Online Status

Icons in Google Talk, Gmail, Google Maps, and other applications indicate your and your friends' Google Talk status.

	Available: signed into Google Talk and available to chat
	Away: signed into Google Talk but not active in a while
	Busy: signed into Google Talk but too busy to chat
	Signed out of Google Talk
	Invisible: you're signed into Google Talk but appear signed out to others

You can change your online status and status message. You can also change the picture others see next to your name in their Friends lists and other locations.

To change your online status

- 1 Touch the status icon at the top-right of your friends list.
- 2 In the menu that opens, touch a status or a status-message combination.
In addition to the standard Available, Busy, and Invisible status settings, you can also select a message that you've entered previously. Or touch **Clear custom messages** to erase them and start over.

Your status and any message appear in your friend's Friends lists and in other locations where your status or status message are displayed.

To change your status message

- 1 Touch your current status message at the top of your Friends list.
- 2 Enter a new status message.

To change your picture

- 1 Touch your current picture at the top-left of your Friends list.
The Select picture screen opens with all the pictures on your SD card displayed in a scrolling list of thumbnails.
- 2 Touch the picture you want to use.
- 3 Crop the picture.
Cropping pictures is described in "Working with Pictures" on page 172.
- 4 Touch **Save**.

Managing Your Friends List

Your Google Talk Friends list contains the friends you've invited or accepted invitations from to become friends in Google Talk. Google Talk friends can invite each other to chat in Google Talk and see each others' online status, in Google Talk and other applications, such as in Gmail and Maps.

The Google Talk Friends list is sorted by your friends' online status: active chats, online, busy, and offline. Within each status group, friends are listed alphabetically.

If your keyboard is open, you can type letters to view only friends with matching names.

To add a friend to your Friends list

You can invite anyone with a Google Account to become your friend in Google Talk, so you can chat with each other and view each others' online status.

- 1 In the Friends list, press MENU, and then touch **Add friend**.
- 2 Enter your friend's Gmail address, and then touch **Send invitation**.

You may need to press BACK to close the onscreen keyboard to see the **Send invitation** button.

To view and accept an invitation to become a friend

When one of your friends invites you to become a friend in Google Talk, you receive a notification in the status bar and the invitation appears in your Friends list.

- 1 Touch the invitation in the Friends list.
- 2 Touch **Accept** in the menu that opens.

Or touch **Cancel** if it's an invitation from someone who is not a friend you want to chat with and share your online status on Google Talk.

To view a list of pending invitations to friends

- In the Friends list, press MENU, and then touch **Invites**.
All the friends you've extended invitations to become friends on Google Talk appear in the list, until they accept or cancel your invitation.

To view all friends or only those most popular with you

By default, only the friends that you frequently chat with (the most popular) are shown in the Friends list. But you can view all your friends instead.

- In the Friends list, press MENU and touch **All friends**.
Or to switch back to just the friends you're most popular with, touch **Most popular** in the menu.

To pin a friend

You can pin a friend to make sure they always appears in your Most popular friends list.

- 1 In the Friends list, touch & hold the friend's name.
If you can't see the friend, press MENU, and then touch **All friends**.

- 2 Touch **Pin friend** in the menu that opens.

To unpin a friend, touch & hold the friend's name in the Friends list and in the menu that opens, touch **Unpin friend**.

To block a friend

You can block a friend from sending you messages. When blocked, your friend is also removed from your Friends list.

- 1 In the Friends list, touch & hold the friend's name.
If you can't see the friend, press MENU, and then touch **All friends**.
- 2 Touch **Block friend** in the menu that opens.
You can view a list of your blocked friends by opening your Friends list, pressing MENU, and touching **Blocked**. You can unblock a friend by touching the friend's name in the blocked list and then touching **OK** in the dialog that asks you to confirm you want to unblock the friend.

Changing Google Talk Settings

You can configure Google Talk to send you a notification with the contents of each message you receive in a chat, and to also sound a ringtone or vibrate the phone.

You can also configure Google Talk to sign you in automatically when you turn on your phone, instead of having to open Google Talk to receive chats and share your online status, and you can set whether the mobile indicator is displayed next to your name in other people's Friends lists.

To configure notifications for new Google Talk messages

- 1 In the Friends list, press MENU, and then touch **More > Settings**.
- 2 Check or uncheck **IM notifications** to set whether you receive a notification in the status bar when a new chat arrives.
- 3 Touch **Select ringtone** to open a list of the ringtones you can choose to sound when you receive notification of a new chat.
- 4 Check or uncheck **Vibrate** to set whether the phone vibrates when you receive notification of a new chat.

To show or hide the mobile indicator to friends

- 1 In the Friends list, press MENU, and then touch **More > Settings**.
- 2 Check or uncheck **Mobile indicator**.

When **Mobile indicator** is checked, your friends see an outline of an Android next to your name in their Friends list, when you're signed into Google Talk on the phone.

Your friend is signed into Google Talk on her phone.

To set whether you sign into Google Talk automatically

- 1 In the Friends list, press MENU, and then touch **More > Settings**.
- 2 Check or uncheck **Automatically sign-in**.

When **Automatically sign-in** is checked, you are signed into Google Talk when you turn on your phone, without having to open Google Talk.

Signing in and out of Google Talk is described in "Signing In and Opening Your Friends List" on page 108.

Email

You use Email to read and send email from email accounts other than Gmail. Email includes a wizard that makes it easy to configure it for several popular email service providers.

In this section

“Opening Email and Reading Your Messages” on page 118

“Responding to a Message” on page 120

“Composing and Sending Email” on page 122

“Adding and Editing Email Accounts” on page 123

“Changing Email Account Settings” on page 125

Opening Email and Reading Your Messages

To open Email

- Touch the Email icon  in the Applications tab.

See “Opening Applications” on page 37 to learn more about opening and switching applications.

The first time you open Email, it offers a two-step setup wizard to help you add an email account, as described in “Adding and Editing Email Accounts” on page 123.

Subsequently, Email opens to the last screen you were viewing or, if you have not used Email in a while, it displays the contents of your Inbox in the mailboxes window (if you have only one account) or the Accounts screen.

To open the Accounts screen

The Accounts screen lists your email accounts and how many unread messages each has received. It’s also the quickest way to find and open the mailboxes screens for your accounts.

- When viewing a message, press BACK to return to a mailboxes screen.

OR

- From a mailboxes screen, press MENU, and then touch **Accounts**.

To open an account's mailboxes screen

Each account's mailboxes screen lists its mailboxes (or folders, depending on your email service), with your received and sent emails.

- 1 Open the Accounts screen.

Each account has a separate set of mailboxes, such as an Inbox, Sent, Trash, and other mailboxes.

- 2 Touch the name of the account you want to work with.

The mailboxes screen opens with a scrolling list of the mailboxes in the account. You can touch a mailbox to view a list of the messages it contains, or touch it again to hide its contents.

Only some of your account's more recent emails are downloaded to your phone, but you can touch **Load more messages** to download earlier messages, in batches.

To read a message

- Open a mailbox, and then touch the message you want to read.

You can reply to, forward, delete, or take other actions on a message, as described in “Responding to a Message” on page 120.

Responding to a Message

You can reply to or forward a message you receive. You can also delete messages and manage them in other ways.

To reply to or forward a message

- When reading a message, touch **Reply** or **Reply all**.
- OR
- Press MENU, and then touch **Reply**, **Reply all**, or **Forward**.

A compose message window opens with the addresses (when replying), subject, and a copy of the message you’re responding to filled in.

You can now address, compose, and send this message as you would a new message, as described in “Composing and Sending Email” on page 122.

To mark a message as unread

You can return a read message to the unread state — for example, to remind yourself to read it again later.

- When reading a message, press MENU, and then touch **Mark as unread**.

To delete a message

You can delete a message from its mailbox.

- When reading a message, touch **Delete**.

OR

- Press MENU, and then touch **Delete**.

For most kinds of accounts, deleted messages are moved to a Trash mailbox, so you can retrieve them if you deleted them in error.

Composing and Sending Email

You can send an email to your contacts or to other people or groups.

To compose and send a message

- 1 In your account's mailboxes screen, press MENU, and then touch **Compose**.
- 2 Enter the message recipient's email address in the **To** field. If you are sending the email to several recipients, separate the email addresses with a comma. You can add as many message recipients as you want.

As you enter text, matching addresses are offered from your Contacts. You can touch a suggested address or enter a new one.

See "Contacts" on page 73 for more information.
- 3 Press MENU, and then touch **Add Cc/Bcc** to address a copy or blind copy of the message.
- 4 Enter a subject for the message.
- 5 Enter the text of the message.

For more information about entering and editing text, see "Using the Onscreen Keyboard" on page 33 and "Editing Text" on page 35.
- 6 Press MENU, and then touch **Add attachment** to send a photo with the message.
- 7 Touch **Send**.
 - If you're not ready to send the message, touch **Save as draft**. (Touch a draft message in your Drafts mailbox to resume working on it.) Your message is also saved as a draft if you press BACK before sending it.
 - You can also touch **Discard** to abandon the message, including any saved drafts.
 - If you aren't connected to a network, for example, if you're working in airplane mode, the messages you send are stored in your account's Outbox mailbox, until you are connected to a network again.

Adding and Editing Email Accounts

The first time you open Email, it prompts you to set up an email account. Subsequently, you can configure Email to send and receive email from additional email accounts.

The Email two-step wizard can help you set up your account for many popular email systems. If your service provider requires additional settings, or if your service provider is unknown to Email, you can enter the necessary details manually.

To add an email account

1 Open the Accounts screen.

2 Press MENU, and then touch **Add account**.

In the Setup email screen, enter your email address and password.

If you're adding a second or subsequent email address, you can also check the option to use the new account to send all outgoing messages.

3 Touch **Next**. Or touch **Manual setup** if you need to enter email account settings the two-step wizard can't configure for you.

If you touch **Next**, Email attempts to communicate with your email service provider to validate your account for sending and receiving mail, using just your email address and password.

Depending on service provider, it may ask you what kind of email account you have. If you're not sure, you can check the settings in the application you use to send and receive email on your computer, or ask your email service provider.

If the two-step wizard determines that your service provider requires other information (or if you touched **Manual setup**), you're prompted to enter your email account details. Refer to the settings used by your computer-based email application or your email service provider's support resources.

4 Enter a name for the account, confirm how you want your name to appear in outgoing mail, and then touch **Done**.

Email starts downloading your email and you can start using it to send and receive email using the new account.

To change an account's settings

You can change a number of settings for an account, including how often you check for email, how you're notified of new mail, and details about the servers it uses to send and receive mail.

- 1 In your account's mailboxes screen, press MENU, and then touch **Account settings**. Or press & hold an account's name in the Accounts screen and in the menu that opens, touch **Account settings**.

For descriptions of the settings you can change, see "Changing Email Account Settings" on page 125.

- 2 When you're done changing settings, press BACK.

To delete an email account

- 1 Open the Accounts screen.
On some Email screens, you can press MENU, and then touch **Accounts**. On other screens, you must press BACK until you return to a screen with **Accounts** in its menu (or simply return to the Accounts screen).
- 2 Touch & hold the account you want to delete.
- 3 Touch **Remove account** in the menu that opens.
- 4 Touch **OK** in the dialog that asks you to confirm that you want to delete the account.

Changing Email Account Settings

You can change the following settings for each email account, during or after when you create the account. Creating an account and changing its settings are described in “Adding and Editing Email Accounts” on page 123.

Account name The name of the account as it appears in the Accounts and mailboxes screens.

Your name Your name as it appears to others when they receive email from you.

Email check frequency How often Email checks for new email sent to this account.

Default account Use the this account’s outgoing email server for the email you compose and send.

Email notifications Set whether you want to receive notifications when you receive new email sent to this account.

Select ringtone Pick a ringtone to sound when you receive an email notification for this account.

Vibrate Vibrate the phone when you receive an email notification for this account.

Incoming settings Detailed settings for how you receive email for this account. Refer to the settings used by your computer-based email application or your email service provider’s support resources for details about these settings.

Outgoing settings Detailed settings for how you send email for this account. Refer to the settings used by your computer-based email application or your email service provider’s support resources for details about these settings.

Add another account Touch to add another email account. See “Adding and Editing Email Accounts” on page 123.

Work Email

The Work Email application comes with an email wizard that lets you add your Microsoft Exchange ActiveSync account on your phone.

In this section

“Opening Work Email” on page 128

“Adding a Microsoft Exchange ActiveSync Account” on page 128

“Synchronizing Exchange ActiveSync Emails” on page 128

“Reading Your Messages” on page 129

“Responding to a Message” on page 130

“Composing and Sending Email” on page 131

“Changing Work Email Settings” on page 132

Opening Work Email

- Touch the Work Email icon  in the Applications tab.
See “Opening Applications” on page 37 to learn more about opening and switching applications.
The first time you open Work Email, you can set up your Microsoft Exchange ActiveSync account. Subsequently, Work Email takes you to your Inbox.

Adding a Microsoft Exchange ActiveSync Account

You can only add one Microsoft Exchange ActiveSync account on your phone.

Requirement You can sync with a Microsoft Exchange Server 2003 Service Pack (SP2) or Microsoft Exchange Server 2007.

To set up Work Email

- 1 Open Work Email.
- 2 Enter your email address and password, and then touch **Next**.

Your Work Email Inbox is displayed.

Note Your corporate Exchange Server must support auto-detect for the phone to automatically set up the Exchange ActiveSync account. If your corporate Exchange Server does not support auto-detect, you will need to enter your Exchange Server settings after you touch **Next**. Ask your Exchange Server administrator for details.

Synchronizing Exchange ActiveSync Emails

You can set Exchange ActiveSync to automatically check for new emails.

- 1 Open Work Email.
- 2 Press MENU, and then touch **More > Settings**.
- 3 Touch **Send & Receive > Check frequency**, and then choose the time interval you want to use to check for new emails.

Reading Your Messages

- Open your Inbox, and then touch the message you want to read.

OR

- Open the Notifications panel, and then touch **New mail**.

Responding to notifications is described in “Managing Notifications” on page 42.

You can reply to, forward, delete, or take other actions on a message, as described in “Responding to a Message” on page 130.

To sort messages

- 1 In your Inbox, press MENU, and then touch **Sort**.
- 2 Select from the following sort options:
 - **Date (Most recent/Oldest)** Sorts email messages by the time you received it.
 - **Subject (A-Z/Z-A)** Alphabetically sort email messages by subject.
 - **Sender (A-Z/Z-A)** Alphabetically sort email messages by sender.
 - **Size (Largest/Smallest)** Sort emails by file size.

Responding to a Message

You can reply to or forward a message you receive. You can also delete messages and manage them in other ways.

To reply to or forward a message

- When reading a message, touch **Reply** or **Reply all**.

OR

- Press MENU, and then touch **Reply**, **Reply all**, or **Forward**.

A compose message window opens with the addresses (when replying), subject, and a copy of the message you're responding to filled in.

You can now address, compose, and send this message as you would a new message, as described in "Composing and Sending Email" on page 131.

To mark a message as unread

You can return a read message to the unread state — for example, to remind yourself to read it again later.

- When reading a message, press MENU, and then touch **Mark as unread**.

To delete a message

You can delete a message from your Inbox.

- When reading a message, press MENU, and then touch **Delete**.

Note To view your deleted mails, press MENU from your Inbox, and then touch **More > Folders**. Touch **Deleted Items** to open this folder.

Composing and Sending Email

You can send emails to your contacts or to other people.

To compose and send a message

- 1 In your Inbox, press MENU, and then touch **Compose**.
- 2 When in the Compose screen, press MENU, and then touch **Add recipient > To**.
You can select from your contact list. Or touch the **Company** tab to access your company directory on the Exchange Server. Enter a name, and then touch the Search icon (when in the Company tab). Select a contact, and then touch **Add**.
- 3 Press MENU, and then touch **Show Cc/Bcc** to address a copy or blind copy of the message.
- 4 Enter a subject for the message.
- 5 Enter the text of the message.
For more information about entering and editing text, see "Using the Onscreen Keyboard" on page 33 and "Editing Text" on page 35.
- 6 Press MENU, and then touch **Add attachment** to send a supported file with the message.
- 7 Touch **Send**.
 - If you're not ready to send the message, touch **Save as draft**. (Touch a draft message in your Drafts mailbox to resume working on it.)
 - You can also touch **Discard** to abandon the message, including any saved drafts.

To send a meeting request

- 1 In your Inbox, press MENU, and then touch **More > New meeting**.
- 2 Enter the meeting details, and then touch **Send**.

Changing Work Email Settings

- Open Work Email. Press MENU, and then touch **More > Settings**. Change the general settings, synchronization settings, and notification settings according to your preference.

Account Settings

Change the email account settings such as the email address, password, and server address.

General Settings

Set the font size when reading emails, enable, disable or set the signature, set the account as the default email account, and set where to save email attachments.

Send & Receive

Set the maximum email file size limit when receiving and frequency to check for new emails and how many to check for. You can also set to have emails that you send bcc'd to yourself.

Notification Settings

Email notifications Check to receive a notification whenever you receive new email. See "Managing Notifications" on page 42.

Notification ringtone Check to play a notification ringtone when you receive new email notifications.

Notification vibrate Check to vibrate the phone when you receive a new email notification.

Messaging

You can use Messaging to exchange text (SMS) and multimedia messages (MMS) with your friends' mobile phones.

In this section

"Opening Messaging" on page 134

"Exchanging Messages" on page 135

"Changing Messaging Settings" on page 138

Opening Messaging

To open Messaging

- Touch the Messaging icon  on the Home screen or in the Applications tab. See “Opening Applications” on page 37 to learn more about opening and switching applications.

The Messaging window opens, where you can create a new message or open an ongoing message thread.

Touch to send a new text or multimedia message.

Touch to open an ongoing message thread.

- Touch **New message** to start a new text or multimedia message.
- Touch an existing message thread to open it.

Creating and responding to messages is described in “Exchanging Messages” on page 135.

Exchanging Messages

You can send text (SMS) messages of up to 160 characters to another mobile phone. If you continue to type after the limit is reached, your message will be delivered as a series of messages.

Multimedia (MMS) messages can contain text and a picture, a recorded voice, an audio file, or a picture slideshow.

Messaging automatically converts a text message into a multimedia message if you send it to an email address instead of a phone number, add a subject, or attach a media file.

To send a text (SMS) message

- 1 On the Messaging screen, touch **New message**.
- 2 Enter a mobile phone number in the **To** field.
As you enter the phone number, matching contacts appear. You can touch a recipient or continue entering a phone number.
- 3 Touch the composition text box to start entering your message.

Note As you near the 160-character limit, a counter appears in the top right corner of the text box to tell you how many characters are left. If you go over that limit, a new message is created, which is joined with its predecessors when received.

If you press BACK while composing a message, it's saved as a draft in your Messaging window, where you can touch it to resume composing it.

- 4 Touch **Send**.

The message window opens, with your message after your name. Responses appear in the window. You view and send additional messages, creating a message thread.

To create and send a multimedia (MMS) message

- 1 On the Messaging screen, touch **New message**.
- 2 Enter a mobile phone number or email address in the **To** field.
As you type, matching contacts appear. You can touch a contact or continue typing.
- 3 Touch the composition text box to start entering your message.
- 4 Press MENU, and then touch **Add subject** to add a message subject.
- 5 Press MENU, and then touch **Attach** to open a menu where you can touch the kind of media file you want to attach to the message.
 - If you touch **Pictures**, you're prompted to touch a picture to attach it.
 - If you touch **Capture picture**, Camera opens so you can take a picture and attach it.
 - If you touch **Videos**, you're prompted to touch a video to attach it.
 - If you touch **Capture video**, Camcorder opens so you can shoot a video and attach it.
 - If you touch **Audio**, you're prompted to touch an audio file to attach it.
 - If you touch **Record audio**, a screen opens where you can record a spoken message and attach it.
 - If you touch **Slideshow**, a screen opens where you can assemble photos into a slideshow of up to ten slides, to attach to the message.

Tip You can use the buttons in the Compose message screen to preview or remove the media attachment.

6 Touch **Send**.

To respond to messages you receive

If you're working in a message window, the messages you receive are displayed in it. Otherwise, you receive a new message notification and a new message icon appears in the status bar (see "Managing Notifications" on page 42).

When you touch the new message notification, the message window opens, where you can reply to the message, as you would in a thread you started.

If the message contains a media file, touch **Play** to view, watch, or listen to it. Touch & hold the media file to open a menu with an option for saving the message on your SD card.

Note If you have the Auto-retrieve setting unchecked, you must touch **Download** to view the text and any media files attached to the message (see "Changing Messaging Settings" on page 138).

To view details about a message

- 1** Touch & hold a message in a message window.
- 2** Touch **View message details** in the menu that opens.

To delete a message thread from the Messaging window

- 1** Touch & hold the message thread.
- 2** Touch **Delete thread** in the menu that opens.

You can also press MENU, and then touch **Delete threads** to delete all message threads from the window.

Changing Messaging Settings

You can change a number of Messaging settings.

- To change Messaging settings, open the Messaging window, press MENU, and then touch **Settings**.

SMS settings

Delivery reports Check to receive delivery reports for the messages you send.

Manage SIM card messages Touch to open a window where you can work with messages stored on your SIM card, for example, if you used the SIM card in another kind of phone where you exchanged text messages.

MMS settings

Delivery reports Check to receive a report on the messages you send.

Read reports Check to receive reports when your messages are read or deleted.

Auto-retrieve Uncheck to download only the heading of multimedia messages, which you can then touch to open a menu to download the whole message. This is useful for controlling how much data you download, for example, when connected to a slow data network.

Roaming auto-retrieve Uncheck to download only the header of multimedia messages when connected to other carrier's data networks. This is useful to avoid unexpected charges, if you chose a contract that has limits on data roaming.

Notification settings

Notifications Check to receive a notification whenever you receive a new message. See "Managing Notifications" on page 42.

Select ringtone Opens a dialog where you can select the ringtone to sound when you receive new message notifications.

Vibrate Check to vibrate the phone when you receive a new message notification.

Browser

You use Browser to view webpages and to search for information on the web.

In this section

“Opening Browser” on page 140

“Navigating within a Webpage” on page 141

“Navigating among Webpages” on page 143

“Working with Multiple Browser Windows” on page 145

“Downloading Files” on page 146

“Working with Bookmarks” on page 147

“Changing Browser Settings” on page 149

Opening Browser

Open Browser to start surfing the web.

To open Browser

- Touch the Browser icon  on the Home screen or in the Applications tab. See “Opening Applications” on page 37 to learn more about opening and switching applications.
- Browser also opens when you touch a web link, for example, in an email or text message.

When you open Browser, it displays the last webpage you were viewing, or if you have not used Browser in a while, it opens your home page.

← The address (URL) of the current page.

To go to a webpage

- 1 On a Browser screen, press MENU, and then touch **Go**.
- 2 Enter the address (URL) of the webpage.

As you enter the address, your web search engine makes suggestions of webpages and queries in a list (to learn more about searching, see “Searching Your Phone and the Web” on page 44).

- 3 Touch a suggestion or enter an address, and then touch **Go**.
 - If you touch a suggested page or enter an address and touch **Go**, that webpage opens.
 - If you touch a suggested query, your web search engine opens with the results.

To refresh the current page

- Press MENU, and then touch **Refresh**.
The webpage is reloaded, updating any content that has changed.

To get more information about the current page

- Press MENU, and then touch **More > Page info**.
A dialog opens with the page's title and full address (URL).

To set your home page

Your home page opens when you open a new Browser window.

- 1 On a Browser screen, press MENU, and then touch **More > Settings > Set home page**.

- 2 Enter the address (URL) of the page, and then touch **OK**.

You may find it more convenient to copy the URL from the page you want and then paste it in the dialog (see "Editing Text" on page 35).

Tip Leave the field blank if you prefer to open new Browser windows without opening a webpage by default. This can make new Browser windows open more quickly.

Navigating within a Webpage

When you first open a webpage, you see as much of the page as will fit on screen at actual size, starting from the top left.

You can move different portions of a webpage into view and zoom in and out in a number of ways.

To scroll a webpage

- Slide your finger on the screen.

OR

- Roll the TRACKBALL in any direction.

The TRACKBALL is particularly useful for selecting items that are close together.

To scale-and-scroll to a section of a webpage

You can magnify and move to a section of a webpage that is too large to fit entirely in the Browser window.

- 1 Slide your finger slightly on the screen to reveal the zoom and scale-and-scroll controls.
- 2 Touch the scale-and-scroll control .

You can also press the TRACKBALL twice to scale-and-scroll.

The webpage zooms out to fit the height of the screen and the magnifying window appears.

Drag the magnifying window to the area you want to view.

- 3 Drag the magnifying window to the area of the page you want to view.

The area is displayed in the Browser window, at the current zoom level.

You can also roll the TRACKBALL to move the magnifying window. Press the TRACKBALL (or touch the window) when you're done.

To zoom in or out on a webpage

- 1 Slide your finger slightly on the screen to reveal the zoom and scale-and-scroll controls.
- 2 Touch the plus or minus side of the zoom control  to zoom in or out.

To find text on a webpage

- 1 Press MENU, and then touch **More > Find on page**.
- 2 Enter the text you're looking for.

As you type, the first word with matching characters is highlighted on the screen, and subsequent matches are boxed.

- 3 Touch the left or right arrow to scroll to and highlight the previous or next matching word.

Navigating among Webpages

You can open links on a webpage, navigate back and forward, and review your browsing history, just as in any web browser. You can also take advantage of some shortcuts for working with links and other kinds of information.

To open a link

- Touch a link to open it.

Links you touch are highlighted in orange briefly, until the webpage they refer to opens in the window.

The TRACKBALL is useful for selecting links that are close together on the screen. Press the TRACKBALL to open a selected link.

To go back and forward among the pages you've opened

- Press the BACK button.

OR

- Press MENU, and then touch **Forward**.

To view your Browser history

As you browse the web, Browser keeps track of the pages you visit, to help you find your way back later. ("Changing Browser Settings" on page 149 describes the setting that clears your history.)

- 1 Press MENU, and then touch **Bookmarks**.

Working with bookmarks is described in "Working with Bookmarks" on page 147.

- 2 Touch the **History** tab.

The pages you've visited are grouped chronologically: today, yesterday, and so on. Bookmarked pages have a gold star.

- 3 Touch a time period to view the pages you visited.

- 4 Touch a page in the history to reopen it.

To view your most frequently visited pages

- 1 Press MENU, and then touch **Bookmarks**.

Working with bookmarks is described in "Working with Bookmarks" on page 147.

- 2 Touch the **Most visited** tab.

The pages you've visited most frequently are listed in order. Bookmarked pages have a gold star.

- 3 Touch a page to reopen it.

To use shortcuts for links, phone numbers, and addresses

Browser can recognize links as well as some phone numbers, addresses, and similar information, as information you may wish to act on directly, rather than, for example, copying and pasting into another application (as described in “Editing Text” on page 35).

- Touch & hold a link to open a menu with shortcuts for opening, bookmarking, saving, and sending the link via email.

- Touch a phone number to open the Dialer with the number entered.

For more information, see “Placing and Ending Calls” on page 62

- Touch a street address to open it in Maps.

For more information, see “Maps” on page 153.

Working with Multiple Browser Windows

You can open up to eight browser windows at once and switch among them.

To switch Browser windows

- 1 Press MENU, and then touch **Windows**.

Thumbnails of your open windows are displayed in a scrolling list.

- 2 Touch the thumbnail of the window you want to open.

To open a new Browser windows

- Press MENU, and then touch **New Window**.
- OR
- If you already have multiple windows open, press MENU, and then touch **Windows** and in the screen that opens, touch **New window**.
Your home page opens in a new window.

To close a Browser window

- 1 Press MENU, and then touch **Windows**.
Each open window is displayed in a scrolling list of thumbnails.
- 2 Touch the close box icon  on the window you want to close.

Downloading Files

You can download files, webpages, and even applications from webpages. The files you download are stored on your SD card (see “Connecting to a Computer” on page 57 to learn more about SD cards).

To allow installing applications from the web or email

By default, your phone is configured to prevent you from installing applications you download from the web or receive in an email.

Warning! Applications downloaded from the web can be from unknown sources. To protect your phone and personal data, download applications only from trusted sources such as Android Market.

- 1 Press HOME > MENU, and then touch **Settings > Applications**.
- 2 Check **Unknown sources**.
- 3 Touch **OK** in the confirmation dialog.

To download a file

Different webpages offer different mechanisms for downloading pictures, documents, applications, and other files.

- Touch & hold an image or a link to a file or to another webpage and in the menus that opens, touch **Save**.

If the file is in a format supported by an application on the phone, it is downloaded to your SD card.

To cancel a download

If you change your mind about downloading a file, or start downloading one by accident, you can stop it.

- 1 Press MENU, and then touch **More > Downloads**.
- 2 Press MENU again, and then touch **Cancel all downloads**.

To view the files you've downloaded

- Press MENU, and then touch **More > Downloads**.

The files you've downloaded are listed in order. You can touch one to open it.

Tip You can clear the list by pressing MENU, and then touching **Clear list**.

Working with Bookmarks

You can bookmark any number of webpages so you can quickly go to them later.

To bookmark a webpage

- 1 Open the webpage you want to bookmark.
- 2 Press MENU, and then touch **Bookmarks**.

- 3 Touch **Add bookmark**.
- 4 Edit the name and the address if needed, and then touch **OK**.
The bookmark is added to the top of the list.

To open a bookmark

- 1 Press MENU, and then touch **Bookmarks**.
- 2 Touch the bookmark you want to open.
The bookmark opens in the current window. If you prefer to open the bookmark in a new window, touch & hold the bookmark and touch **Open in new window** in the menu.

To edit a bookmark

- 1 Press MENU, and then touch **Bookmarks**.
- 2 Touch & hold the bookmark you want to edit.
- 3 Touch **Edit bookmark** in the menu.
- 4 Edit the name or address in the dialog.
- 5 Touch **OK**.

To share a bookmark

- 1 Press MENU, and then touch **Bookmarks**.
- 2 Touch & hold the bookmark you want to share.
- 3 Touch **Share link** in the menu.
- 4 Touch the application you want to use to send the bookmark.
The application opens with the bookmark's address in the message body. For more information about addressing and sending the message, see the section about using the application you chose.

To delete a bookmark

- 1 Press MENU, and then touch **Bookmarks**.
- 2 Touch & hold the bookmark you want to delete.
- 3 Touch **Delete bookmark** in the menu.
- 4 Touch **OK** in the confirmation dialog.

Changing Browser Settings

You can configure a number of Browser settings, including several you can use to manage your privacy.

- To open the Browser settings screen, press MENU, and then touch **More > Settings**.

Page content settings

Text size Opens a dialog where you increase or decrease the size of text Browser uses when displaying webpages.

Default zoom Opens a dialog where you can increase or decrease the magnification level Browser uses when first opening a webpage.

Text encoding Opens a dialog where you can change the character-encoding standard Browser uses when displaying text on a webpage.

Block pop-up windows Check to prevent websites from opening windows without you requesting it.

Load images Uncheck to omit images when Browser displays a webpage. This speeds webpage display, which can be useful when you have a slow connection, but many websites make little sense with text alone.

Auto-fit pages Check to have Browser optimize the presentation text and other elements of webpages to fit your phone's screen. Uncheck to view pages as designed for a computer screen.

Enable JavaScript Uncheck to prevent JavaScript from running on webpages. Many webpages only function correctly if you allow them to run JavaScript features on your phone.

Open in background Check to open new windows in the background. You must press MENU, touch **Windows**, and then touch the thumbnail of the new window to view it. Uncheck if you prefer new windows to open in place of the current window. (See "To switch Browser windows" on page 145.)

Set home page Opens a dialog where you can enter the URL of a page you want to open whenever you open a new Browser window. If you prefer to open new Browser windows more quickly, by not opening any page by default, you can leave the dialog blank.

Privacy settings

Clear cache The browser stores the text and images of the webpages you visit so they open more quickly when you revisit them. You can touch **Clear cache** to delete these temporary files.

Clear history The browser keeps track of the webpages you visit, so you can quickly find them and open them again later (see “To view your Browser history” on page 144). Touch **Clear history** to delete this record.

Accept cookies Many webpages store, read, and update files called cookies on your phone, for your convenience. For example, cookies are stored so you don’t have to log in each time you open a page by remembering your preferences. Uncheck to prevent webpages from storing cookies on your phone.

Clear all cookie data Touch to delete all cookies from your phone.

Remember form data Browser can remember what you enter in forms (your name, address, other information you enter frequently), and automatically enter that text in subsequent forms. This can greatly speed up filling out forms for fields you enter frequently. Uncheck to disable this feature.

Clear form data Touch to delete all the information the Browser remembers about what you’ve entered in forms.

Security settings

Remember passwords Browser can remember your passwords for some webpages that require you to log in, to make it quicker to log into those pages on repeat visits. Uncheck to prevent Browser from storing passwords.

Clear passwords Touch to delete any passwords Browser may have stored.

Show security warnings Uncheck to prevent Browser from warning you about websites with common security problems, such as outdated or invalid certificates.

Advanced settings

Enable Gears Gears are advanced Google features for Browser. They can make it possible for webpages to use your location to customize the information they show you, speed the performance of web-based applications, and so on. Uncheck to prevent webpages from using Gears.

Gears settings Opens a list of each webpage that uses Gears and may offer settings for how each webpage uses gears. You can use this page to disable gears for a webpage.

Reset to default Touch to delete all Browser data, including your browsing history, cookies, passwords, bookmarks, and restore all the Browser settings to their original values.

Maps

Use Maps to find your current location, to view real-time traffic conditions, and to get detailed directions by foot, public transportation, or car. You can also search on a map to locate places of interest or an address, on a street map or a satellite image. You can even view some locations as if you were strolling down that street.

If you join Google Latitude, you can view your friends' locations on your maps and share your location and other information with them in other ways.

Note Maps does not have information about every location.

In this section

"Opening Maps and Viewing Your Location" on page 154

"Changing Map Views" on page 156

"Searching for Locations and Places" on page 158

"Getting directions" on page 159

"Finding Your Friends with Google Latitude" on page 159

Opening Maps and Viewing Your Location

Open Maps to view your location. But first turn on location services to use information about your location when navigating and searching in Maps.

To use location services with Maps

You must have location services turned on to view your location in Maps and to use your location to find local resources.

- 1 Press HOME > MENU, and then touch **Settings** > **Security & location**.
- 2 Check the My Location options you want to use.
 - Check **Use wireless networks** to allow the phone to determine your approximate location using Wi-Fi and mobile networks.
 - Check **Enable GPS satellites** to allow the phone to determine your location to the street level of accuracy (GPS works best when you have a clear view of the sky and consumes more battery power).
 - Check **Share with Google** to use your location when you search.

To open Maps and find your location

- 1 Touch the Google Maps icon  in the Applications tab.
See “Opening Applications” on page 37 to learn more about opening and switching applications.
- 2 Press MENU, and then touch **My location**.
The map centers on a blue dot that indicates your location.

Drag the map to move in any direction.

Your location

To move the map

- Drag the map with your finger.

To zoom in and out of a map

- Touch the plus or minus side of zoom controller .

Note Not all magnification levels are available for all locations.

To get an address and additional information for a location

- 1 Touch & hold a location on the map.

A balloon opens over the location, with the address and a thumbnail from street view (if available).

Touch the balloon to open its screen tools for learning more about the location.

Touch & hold a location to open a balloon with its address.

- 2 Touch the balloon to open a screen with tools for learning more about the location (these tools are described in this section and on the <http://maps.google.com> web site).

To clear the map

After you get directions or search on a map (as described in the other parts of this section), you can clear away the various markers such activities drawn on the map.

- When viewing a map, press MENU, and then touch **More > Clear map**.

Changing Map Views

Initially, Maps opens with a street map. But you can also view a satellite image of a location, check on traffic, and even look at a location as if you were standing on the street.

To switch to map, satellite, or traffic mode

- Press MENU, touch **Map mode**, and then touch **Map**, **Satellite**, or **Traffic**.

Map mode

Satellite mode

Traffic mode

- Map mode is the default view. It displays a street map complete with names of streets, rivers, lakes, mountains, parks, boundaries, and other features.
- Satellite mode uses the same satellite data as Google Earth. Satellite images are not real-time. Google Earth acquires the best imagery available, most of which is approximately one to three years old.
- Traffic mode offers real-time traffic conditions, displayed over roads as color-coded lines, from green through black.

Note Not all locations have information to support all map modes or all zoom levels. Visit Google Maps on the web to learn more about map modes.

To open Street View for a location

Street View offers street-level images of a location, which you can navigate, zoom into, and so on. Street View is available only for selected areas.

- 1 Touch & hold a location on a map to open a balloon with the address and a street view thumbnail.
- 2 Touch the balloon and in the screen that opens, touch **Street view**.

Touch the view to display navigation tools.

To navigate in Street View

- Drag the image in any direction to pan up and down or to look in other directions.
- Zoom into the direction you're looking.
- Touch the screen to open navigation controls.
- Touch a left or right navigation arrow to move up or down the street.
- Press MENU, and then touch **Compass mode** to use the phone itself to navigate Street View: tilt, pan, or turn your phone to change your view. Touch **Compass mode** again to end it.
- Press MENU, and then touch **Report image** to open a web-based form for reporting to Google about images with inappropriate content or privacy concerns.
- Press MENU, and then touch **Go to map** to leave Street View.

Searching for Locations and Places

You can search for a location and view it on a map. You can also search for places on the map you're viewing.

To search for a location

- 1 While viewing a map, press MENU, and then touch **Search**.
- 2 Enter the place you're looking for in the search box. You can enter an address, a city, or type of business or establishment (for example, "museums in San Francisco").

As you enter information, previous searches appear in a list below the search box. You can touch one to search again.

- 3 Touch the Search icon.

Markers with letter labels indicate search matches on the map.

You can touch a marker to open a balloon with a label. Touch the label to open a screen with more information about the location.

Getting directions

Maps can provide directions for travel by foot, public transportation, or car.

To get directions

- 1 While viewing a map, press MENU, and then touch **Directions**.

Enter a starting point in the first text box and your destination in the second text box. Or touch  to open a menu with options for entering your current location, an address from your Contacts, or a point you touch on a map.

Tip You can reverse direction by pressing MENU, and then touching **Reverse Start & End**.

- 2 Touch the icon for car, public transit, or walking directions.
- 3 Touch **Go**.

The directions to your destination appears in a list.

When you're done, you can clear the map (press MENU, and touch **More > Clear map**). Your destination is saved.

Finding Your Friends with Google Latitude

Google Latitude lets you and your friends view each others' locations on maps and share status messages with each other. In Latitude you can also send messages and emails, make phone calls, and get directions to your friends' locations.

Note Your location is not shared automatically. You must join Latitude and then invite your friends to view your location, or accept invitations from your friends.

To join Latitude

- While viewing a map, press MENU, and then touch **Join Latitude**.

The first time you join Latitude, you're prompted to accept or reject the Google privacy policy.

Once you joined Latitude, the menu item changes to **Latitude**.

To open Latitude

After you join Latitude, you can open it to find your friends and view their updates.

- While viewing a map, press MENU, and then touch **Latitude**.

To invite friends to share their locations

After you join Latitude, you can start sharing your location with your friends. Only friends that you have explicitly invited or accepted can see your location.

- 1 Open Latitude, press MENU, and then touch **Add friends**.
- 2 Touch **Select from Contacts** or **Add via email address** in the menu that opens.
 - If you touch **Select from Contacts**, a scrolling list of all your contacts opens. You can check as many contacts as you want to invite.
 - If you touch **Add via email address**, you can enter one or more email addresses (separated by commas) for the friends you want to invite.
- 3 Touch **Add friends** at the bottom of the screen.

If your friends already use Latitude, they receive an email request and a notification on Latitude. If they have not yet joined Latitude, they receive an email request that invites them to sign in to Latitude with their Google Account.

To respond to an invitation

When a friend invites you to share your location in Latitude, you can respond with:

Accept and share back You and your friend can see each other's locations.

Accept, but hide my location You can see your friend's location, but they can't see yours.

Don't accept No location information is shared between you and your friend.

To view your friends' locations

You can view your friends' locations on a map or in a list.

When you open Maps, it shows your friends' locations. Each friend is represented by a photo icon with an arrow pointing at their approximate location. If a friend has chosen to share city-level locations, their icon will not have an arrow and it appears in the middle of the city.

If your friends use Google Talk, their online status (available, busy, and so on) is indicated by a circular icon below their pictures. For more information, see "Changing and monitoring online status" on page 127.

To see your friend's profile and connect, touch the photo. Your friend's name appears in a balloon. Touch the balloon to open a screen with details about your friend and many connection options.

When you open Latitude you see a list of your Latitude friends, with a summary of their last known locations, status, and so on. Touch a friend in the list to open a screen with details about the friend and many connection options.

To connect with and manage connections with your friends

Touch a friend's contact details balloon in map view or touch a friend in list view to open the friend's profile. In the profile screen, you can communicate with your friend and set privacy options.

Show on map Shows the friend's location on the map.

Shout out Sends your friend a message your other friends can see.

Chat using Google Talk Opens a Google Talk chat window with that friend.

Send email Opens Gmail with a message addressed to the friend.

Directions Get directions to the friend's location.

Hide from this friend Stop sharing your location with this friend in Latitude, in a list or on a map. To share your location with this friend again, touch **Unhide from this friend**.

Share only city level location Share only the city you are in, not your street-level location. Your friend sees your photo icon in the middle of the city you are in. To share more precise location again, touch **Best available location**.

Remove Remove the friend from your list and stop sharing locations with him or her altogether.

To control what you share

You have control over how and when you can be found by your friends. Only the last location sent to Latitude is stored with your Google Account. If you turn off Latitude or are hiding, no location is stored.

- Open Latitude, touch your own name, and touch **Edit privacy setting**.

You can set the following privacy options:

Detect your location Let Latitude detect and update your location as you move. The update frequency is determined by several factors, such as your phone's battery charge level and how recently your location has changed.

Set your location Set the location shared with others as an address you enter or from Contacts, pick a spot on a map, or resume having Latitude share your actual location.

Hide your location Hide your location from all your friends.

Turn off Latitude. Disable Latitude and stop sharing your location or status. You can always join Latitude again.

Camera and Camcorder

Use Camera and Camcorder to shoot and share pictures and videos.

Pictures and videos are stored on the phone's SD card, so you must install one to use Camera and Camcorder (see "Getting Started" on page 19). You can copy your pictures and videos from the SD card to a computer, for backup and other purposes, as described in "Connecting to a Computer" on page 57.

In this section

"Opening Camera and Taking Pictures" on page 164

"Opening Camcorder and Shooting Videos" on page 165

"Reviewing Your Pictures" on page 166

"Reviewing Your Videos" on page 167

"Changing Camera and Camcorder Settings" on page 168

Opening Camera and Taking Pictures

Take pictures with Camera.

Changing the resolution of your pictures, configuring Camera to record the locations of your pictures, and other settings are described in “Changing Camera and Camcorder Settings” on page 168.

You can also view your pictures with the Gallery application, as described in “Gallery” on page 169.

To open Camera

- Touch the Camera icon  on the Home screen or in the Applications tab.

OR

- Touch the slider in Camcorder to open Camera.

See “Opening Applications” on page 37 to learn more about opening and switching applications.

Note Camera opens in landscape mode.

To take a picture

- 1 Open Camera.
- 2 Frame your subject on screen.
- 3 Touch the shutter button.

The camera's autofocus feature brings the image into focus. When the image is in focus, the focus indicators (in each corner) turn green and the camera takes a picture.

The picture you just took is displayed for a moment. You can take another picture or preview your pictures, as described in “Reviewing Your Pictures” on page 166.

Opening Camcorder and Shooting Videos

You can shoot videos (with sound) of varying lengths with Camcorder.

Changing the length of your videos and other settings are described in “Changing Camera and Camcorder Settings” on page 168.

You can play and share your videos with the Gallery application, as described in “Gallery” on page 169.

To open Camcorder

- Touch the Camcorder icon  in the Applications tab.

OR

- Touch the slider in Camera to open Camcorder

See “Opening Applications” on page 37 to learn more about opening and switching applications.

Camcorder opens in landscape mode, ready to shoot a video.

To shoot a video

- 1 Open Camcorder.
- 2 Point the lens to frame the scene where you want to start.
- 3 Touch the record button.

The Camcorder starts shooting the video. The time remaining to shoot counts down at the left. When less than a minute is left, the countdown turns red.

- 4 Touch the shutter button again to stop shooting.

You can shoot another video or preview your videos (as described in “Reviewing Your Videos” on page 167).

Reviewing Your Pictures

You can review the pictures you’ve taken in Camera.

To review your pictures

- 1 Open Camera.
- 2 Touch the thumbnail image at the top right of the Camera screen.

The picture review screen opens, displaying your most recent picture.

- 3 Touch the picture to see the navigation and zoom controls.
- 4 Touch a navigation arrow to view the next or previous picture.
- 5 Touch **Done** to resume taking pictures.

You can use the other buttons on the picture review screen and press MENU to access several other features for editing, sharing, viewing, and using pictures in other ways. These are detailed in “Working with Pictures” on page 172.

Reviewing Your Videos

You can review the videos you've shot in Camcorder. You can also view a slideshow of your pictures, share them with friends, and delete shots (see "Gallery" on page 169 for more about playback).

To review your videos

- 1 Open Camcorder.
- 2 Touch the thumbnail image at the top right of the Camcorder screen.
A still image from the start of your most recent video is displayed.

- 3 Touch a navigation button to open the video you want to play.
- 4 Touch the **Play** button.

You can use the other buttons on the video review screen and press MENU to access several other features for viewing and sharing your videos. These features are detailed in "Gallery" on page 169.

Changing Camera and Camcorder Settings

You can change a number of settings for how Camera and Camcorder take pictures and shoot videos.

- To change picture and video settings, open Camera or Camcorder to the screen for taking pictures or shooting videos, press MENU, and then touch **Settings**.

General settings

Store location in pictures Check to include the location of each picture you take, using the phone's GPS.

Video settings

Select video quality Opens a dialog where you can set the video quality appropriate for sending to your friends via the Messaging application or for viewing on a computer.

Select video duration Opens a dialog where you can set the maximum length of your videos.

Picture settings

Select picture size Opens a dialog where you can set the size (in pixels) of the pictures you take.

Select picture quality Opens a dialog where you can set the quality of the pictures you take.

Select focus mode Opens a dialog where you can set Camera to use its autofocus feature or, for faster camera shots, to focus to infinity (distant focus).

Gallery

Use Gallery to view photos and play back videos. For photos, you can also perform basic editing tasks, set them as your wallpaper or contact picture, and so on. You can also share your pictures and videos with friends, via email or messaging, or on the Picasa and YouTube web sites.

In this section

“Opening Gallery and Viewing Your Albums” on page 170

“Working with Pictures” on page 172

“Working with Videos” on page 175

“Changing Gallery Settings” on page 177

Opening Gallery and Viewing Your Albums

Open Gallery to view albums of your pictures and videos.

To open Gallery and view your albums

- Touch the Gallery icon  on the Home screen or in the Applications tab.

OR

- Open Gallery from Camera or Camcorder by pressing MENU, and then touching **Gallery**.

See “Opening Applications” on page 37 to learn more about opening and switching applications.

Gallery presents the pictures and videos on your SD card in albums. The first two are for the pictures and videos you took with Camera and Camcorder. Others include all pictures or videos found on the SD card and, if you created directories with pictures or videos on the SD card, albums named for those directories.

Note If you have many pictures or videos on your SD card, it may take Gallery a few moments when you open it to discover them and organize them into albums.

- Touch an album to open it and view its contents.

- Touch a picture or video in a gallery to open it.

Working with the pictures you open is described in "Working with Pictures" on page 172.

Working with the videos you open is described in "Working with Videos" on page 175.

You can change settings for the size and order of the pictures and images in albums, as described in "Changing Gallery Settings" on page 177.

Working with Pictures

Use Gallery to view pictures, edit them, and share them with friends.

To view and browse pictures

- Open a Gallery album, and then touch a picture.

Opening albums is described in “Opening Gallery and Viewing Your Albums” on page 170.

- Turn the phone to view the picture in upright (portrait) or sideways (landscape) orientation.
The picture is displayed (but not saved) in the new orientation.
- Touch the picture to view the navigation, zoom, and other controls.
- Touch the magnifiers to zoom in or out. Drag the picture to view parts that are not in view.
- Touch the left or right arrows to browse to the previous or next picture.

To watch a slideshow of your pictures

- When viewing a picture, press MENU, and then touch **Slideshow**.
You can control the pace and other slideshow settings as described in “Changing Gallery Settings” on page 177.

To rotate a picture

- 1 When viewing a picture, press MENU, and then touch **Rotate**.
- 2 Touch **Rotate left** or **Rotate right**.
The picture is saved with the new orientation.

To crop a picture

- 1 When viewing a picture, press MENU, and then touch **Crop**.
The cropping rectangle appears on top of the picture.
- 2 Use the cropping tool to select the portion of the picture you want to crop.
 - Drag from the inside of the cropping tool to move it.
 - Drag an edge of the cropping tool to resize it to any proportion.
 - Drag a corner of the cropping tool to resize it with fixed proportions.

- 3 Touch **Save** to save a copy of the picture as you cropped it.
The original uncropped version remains on your SD card.

To use a picture as a contact icon or as Home screen wallpaper

- 1 When viewing a picture, touch the picture to view the controls, and then touch the **Set as** icon. Or press MENU, and then touch **More > Set as**.
- 2 Touch **Contact icon**, **myFaves icon** or **Wallpaper**.
 - If you touch **Contact icon**, you're asked to select the contact you want to use the picture for, and then crop the picture.
 - If you touch **myFaves icon**, you're asked to select a myFaves contact you want to use the picture for, and then crop the picture.
 - If you touch **Wallpaper**, you're prompted to crop the picture.

To get details about a picture

- When viewing a picture, press MENU, and then touch **More > Details**.

To view the location of a picture in Google Maps

If you have configured Camera to save location data with your pictures (see “Changing Camera and Camcorder Settings” on page 168), you can view the location where you took the picture in Google Maps.

- When viewing a picture, press MENU, and then touch **More > Show on Maps**. Google Maps opens, centered on the location stored in the picture.

To share a picture by sending it to friends

- 1 When viewing a picture, touch the picture to view the controls, and then touch the **Share** icon. Or press MENU, and then touch **Share**.
- 2 Touch **Email**, **Gmail**, **Messaging**, or **Work Email** in the menu.
The application you picked opens with the picture attached to a new message. For more information about addressing and sending the message, see the section on that application.

To share a picture by uploading it to Picasa

You can upload pictures to the Picasa account that is associated with your Google Account.

- 1 When viewing a picture, touch the picture to view the controls, and then touch the **Share** icon. Or press MENU, and then touch **Share**.
- 2 Touch **Picasa** in the menu.
- 3 Enter a caption for the picture.
- 4 Pick or add an album for the picture.
- 5 Touch **Upload**.
The picture is uploaded to Picasa. When it's done, you can view it at the Picasa web site (<http://picasaweb.google.com>).

To delete a picture

- When viewing a picture, touch the picture to view the controls, and then touch the **Delete** icon. Or press MENU, and then touch **Delete**.
A dialog asks you to confirm you want to delete the picture (unless you configured Gallery to delete without asking, as described in “Changing Gallery Settings” on page 177).

- You can also delete multiple pictures in an album by pressing MENU in a Gallery album, and then touching **Multiselect**. Check the pictures you want to delete, and then touch **Delete**.

Working with Videos

Use Gallery to play videos and share them with friends.

To play videos

- Open a Gallery album, and then touch a video.
The video plays, with the orientation (portrait or landscape) you shot it in.
Opening albums is described in “Opening Gallery and Viewing Your Albums” on page 170.

- Touch the video to view the playback controls.

To share a picture by sending it to friends

You can send any video that is 3MB or smaller (approximately one minute of high-quality video or two minutes of low-quality video). For details, see “Changing Camera and Camcorder Settings” on page 168.

- 1 When viewing an album, touch & hold the video you want to send.
- 2 Touch **Share**.
- 3 Touch **Email**, **Gmail**, **Messaging**, or **Work Email**.

The application you picked opens with the video attached to a new message. For more information about addressing and sending the message, see the section on that application.

To share videos on YouTube

You can share your videos by uploading them to YouTube. Before you do this, you must create a YouTube account and sign into it on your phone.

You can upload any video that is 3MB or smaller (approximately one minute of high-quality video or two minutes of low-quality video. For details, see “Changing Camera and Camcorder Settings” on page 168.

- 1 When viewing an album, touch & hold the video you want to send.
- 2 Touch **Share**.
- 3 Touch **YouTube**.
- 4 Enter a title, description, and tags for your video.
- 5 Check **Public** if you want to share the video with everyone.
- 6 Touch **Upload**.

To delete a video

- 1 When viewing an album, touch & hold the video you want to delete.
- 2 Touch **Delete**.

A dialog asks you to confirm you want to delete the video (unless you configured Gallery to delete without asking, as described in “Changing Gallery Settings” on page 177).

You can also delete multiple videos in an album by pressing MENU, touching **Multiselect**, checking the videos you want to delete, and touching **Delete**.

Changing Gallery Settings

You can change a number of settings for how Gallery displays pictures and videos, how it presents slideshows, and other settings.

- To change Gallery settings, press MENU, and then touch **Settings** (or **More > Settings**, depending on the Gallery screen).

General settings

Display size Opens a dialog where you can set the display size of pictures and videos.

Sort order Opens a dialog where you can set whether pictures in albums are sorted **Newest first** or **Newest last**.

Confirm deletions Check to open a confirmation dialog when you delete a picture or video. Uncheck to delete without asking.

Slideshow settings

Slideshow interval Opens a dialog where you can set how many seconds to display each picture in a slideshow.

Slideshow transition Opens a dialog where you can pick the transition animation between pictures in a slideshow.

Repeat slideshow Check to repeat slideshows until you touch the screen.

Shuffle slides Check to display pictures in random order during a slideshow. Uncheck to display them in their order in their album.

YouTube

YouTube is the free online video streaming service for viewing, searching for, and uploading videos.

In this section

“Opening YouTube and Watching Videos” on page 180

Opening YouTube and Watching Videos

You can browse, search for, view, upload, and rank videos on YouTube on your phone with the YouTube application.

To open YouTube

- Touch the YouTube icon  in the Applications tab.

See “Opening Applications” on page 37 to learn more about opening and switching applications.

YouTube presents the videos grouped into categories, such as Featured, Most popular, Most viewed, Top rated, and more.

Videos are grouped into categories.

Touch a video to play it.

To watch and interact with YouTube videos

- On a YouTube screen, touch a video to play it.
- Touch the video to view the playback controls.

You can pause, skip forward or backwards, or drag the slider to the point in the video you want to watch, with the playback controls.
- Press BACK to stop playback and return to the videos list.
- Press MENU to rate, comment on, share, flag as inappropriate, and to interact with the video in other ways.

For details about these features, visit the YouTube web site.

To search for videos

- 1 On a YouTube screen, press MENU, and then touch **Search**.
- 2 Enter the text you want to search for.
- 3 Touch a suggestion below the search box or touch the Search icon .
- 4 Scroll through the search results and touch a video to watch it.

To share your videos on YouTube

You can share the videos you shot with the Camcorder application (see “Camera and Camcorder” on page 163) by uploading them to YouTube. Before you do this, you must create a YouTube account and sign into it on your phone.

You can upload any video that is 3MB or smaller (approximately one minute of high-quality video or two minutes of low-quality video. For details, see “Changing Camera and Camcorder Settings” on page 168.

- 1 On a YouTube screen, press MENU, and then touch **Upload**.
The videos on your SD card are displayed
- 2 Enter a title, description, and tags for your video.
- 3 Check **Public** if you want to share the video with everyone.
- 4 Touch **Upload**.

Music

Use Music to organize and listen to music and other audio files you transfer to your SD card from your computer.

In this section

“Transferring Music Files to Your Phone” on page 184

“Opening Music” on page 184

“Playing Music” on page 185

“Working with Playlists” on page 187

Transferring Music Files to Your Phone

Music plays digital audio files from the phone's storage card. Since Music only plays audio files saved on the storage card of your phone, you must copy your audio files to the storage card before you open Music.

To copy music files onto the phone's SD card

- 1** Connect your phone to your computer with a USB cable, and then mount the SD card.
For details, see "Connecting to a Computer" on page 57.
- 2** Use the computer to create a music folder at the top level of the SD card.
You can give the folder any name you want.
- 3** Use the computer to copy music and other audio files into the folder you created on the SD card.
You can use subfolders on the SD card to organize your music files.
- 4** Unmount the SD card from the computer and disconnect the phone.
Be sure to follow your computer's instructions and those in "Connecting to a Computer" on page 57, to avoid damaging files on your SD card.

Opening Music

Once you've copied some music onto your SD card (as described in "Transferring Music Files to Your Phone" on page 184), you can open Music and see your library of music files, sorted in several ways.

To open Music

- Touch the Music icon  in the Applications tab.
See "Opening Applications" on page 37 to learn more about opening and switching applications.

When you first open Music after copying music files to your SD card, Music searches the SD card for music files and builds a catalog of your music, based on information about each file stored in the file itself. This can take a minute or two, depending on how many files you copied onto the SD card since you last opened Music.

When the Playback screen opens, you can touch the Play button to start playing the first song.

To open the Library

- On the Playback screen, touch . Use the TRACKBALL to scroll to different tabs such as Albums, Playlists, Songs, and more.

Playing Music

Once you've found the tracks you want to listen to in your music library, you can play them.

You can listen to music using the phone's built-in speaker, using a wired headset, or using a wireless Bluetooth stereo headset that supports the A2DP profile (see "Getting Started" on page 19 and "Connecting to Bluetooth Devices" on page 54 for details).

To play music

- Touch a song in your library to listen to it.
- OR
- When viewing a list of tracks in an album, press MENU, and then touch **Play all**.

The Playback screen opens and the song you touched or the first song in the album or other playlist starts to play. Each track in the current playlist plays in order, until you reach the end of the playlist (unless you choose a repeat option). Otherwise, playback only stops if you stop it, even when you switch applications or the screen lock turns on, or if you receive a phone call.

Swipe your finger from right to left or left to right to go to the next or previous song in the Now playing list.

Use these buttons to skip tracks and to pause or resume playback.

You can return to the Playback screen from most other screens in the Music application by pressing MENU and touching **Now Playing**.

You can return to the Playback screen from any other application by opening the Notifications panel and touching the ongoing music notification (see "Managing Notifications" on page 42).

To control playback volume

- Press your phone's VOLUME UP or VOLUME DOWN button.

A panel opens to show the current media volume. The indicator moves as you adjust the volume.

Some headsets include their own volume controls or ways to pause and resume playback or to switch tracks.

To use a song as a ringtone

You can use a song as your phone ringtone, in place of one of the ringtones that comes with the phone.

- On the Playback screen, press MENU, and then touch **Set as ringtone**.

For details about using the Settings application to view and set the phone's ringtone, see "Sound & Display Settings" on page 214.

To delete a song from the SD card

You can delete music from the storage card.

- Touch & hold a song in a library list and in the menu that opens, touch **Delete**.

You can also delete music files from the SD card, when your phone is connected to a computer, as described in "Transferring Music Files to Your Phone" on page 184.

Working with Playlists

You can create playlists to organize your music files into sets of songs, which you can play in the order you set or in a shuffle.

To open Playlists

- Open the Library, and then scroll to the Playlist tab.

To create a playlist

- 1 When viewing a list of songs in the library, touch & hold the first song you want to add to a new playlist.
- 2 Touch **Add to playlist**.
- 3 Touch **Add playlist**.
- 4 Enter a name, and then touch **Save**.
The new playlist is added to the playlist library.

To add a song to a playlist

- 1 When viewing a list of tracks in the library, touch & hold a song you want to add to a playlist.
- 2 Touch **Add to playlist**.
- 3 Touch the name of the playlist you want to add the song to.
The song is added to the playlist.
You can also add the song playing in the Playback screen by pressing MENU, and then touching **Add to playlist**. Touch the name of the playlist you want to add the song to.

To rearrange songs in a playlist

- 1 Open a playlist.
You can open a playlist by touching one in the Playlist tab.
- 2 Press MENU, and then touch **Change order**.
- 3 Drag a song up or down, to change its order in the playlist.
- 4 Touch **Done**.

To remove a song from a playlist

- 1 Open a playlist.
- 2 Press MENU, and then touch **Delete songs**.
- 3 Select one or more songs to delete, and then touch **Delete**.
The song isn't deleted from the SD card or other playlists, only from the playlist you're working with.

To rename or delete a playlist

- 1 Open the playlist library.
- 2 Touch & hold a playlist and in the menu that opens, touch **Rename** or **Delete playlist**.

No songs are affected by deleting a playlist.

Alarm Clock

You can use your phone as an alarm clock. You can set one-time alarms or alarms that play on weekdays, every day, or other times. You can use one of your music tracks as a ringtone or use one of the alarm ringtones that comes with your phone.

In this section

"Setting an Alarm" on page 192

"Customizing Alarm Clock" on page 193

Setting an Alarm

You can set an alarm by modifying an existing one, or by adding a new one.

To set an alarm

- 1 Touch the Alarm Clock icon  in the Applications tab.
See "Opening Applications" on page 37 to learn more about opening and switching applications.

- 2 Touch an existing alarm to change its time and other attributes. Or press MENU, and then touch **Add alarm** to add a new one.
- 3 Touch **Time** to set the time of the alarm.
You can change the time by touching the  and  buttons and **AM** or **PM**. Or touch a time to type the time you want.

- 4 Touch **Ringtone** to pick a ringtone for the alarm.

The ringtone plays briefly when you select it.

- 5 Touch **Vibrate** to configure the alarm to vibrate the phone, in addition to playing the ringtone.
- 6 Touch **Repeat** to set the days when you want the alarm to sound.
If you don't set a day, the alarm will sound only once.
- 7 Touch **Label** to type a name for the alarm.
- 8 When you're done, press BACK.
When the time you set arrives, the alarm sounds.

Customizing Alarm Clock

You can change the face of the alarm clock or hide the face entirely. You can also set whether the alarm sounds when the phone is in silent mode.

You can change how times are displayed in Alarm Clock in the Settings applications. See "Date & Time Settings" on page 220.

To change the face of the alarm clock

- 1 Touch the clock face.
- 2 Slide the small faces to the left or right until the face you want is displayed.
- 3 Touch the face you want.

Scroll the faces to the left or right to find the one you want.

Touch the face you want.

To hide the alarm clock face entirely

- Press MENU, and then touch **Hide clock**.

To play alarms even when the phone is in Silent mode

- Press MENU, touch **Settings**, and then check **Alarm in silent mode**.
Or uncheck this option to honor silent mode. For more information on silent mode, see "Sound & Display Settings" on page 214.

Calculator

Use Calculator to figure simple arithmetic problems or use its advanced operators to solve more complex equations.

In this section

"Using the Calculator" on page 196

Using the Calculator

- Touch the Calculator icon  in the Applications tab.

- Enter numbers and arithmetic operators on the basic screen.
- Drag the Basic panel to the left to open the Advanced panel.
- Touch and hold the Calculator's display to open a menu where you can copy what you've entered and access other tools.
- Touch **Clear** to delete the last number or operator you entered. Touch & hold **Clear** to delete everything in the display.

To access your history of operations

- Roll the TRACKBALL up or down to view your previous operations.
Previous operations are entered in the display, where you can use them.
- Clear your history by pressing MENU, and then touching **Clear history**.

Market

Android Market provides direct access to useful applications and fun games, which you can download and install on your phone.

In this section

“Opening Android Market and Finding Applications” on page 198

“Downloading and Installing Applications” on page 200

“Managing Your Downloads” on page 202

Opening Android Market and Finding Applications

You can open Android Market to browse and search for free and paid applications.

To open Android Market

- Touch the Market icon  on the Home screen or in the Applications tab. See “Opening Applications” on page 37 to learn more about opening and switching applications.

When you open Android Market for the first time, you must read and accept the terms of service to continue.

To get help with Android Market

The Android Market Help webpages are available from all Android Market screens.

- Press MENU, and then touch **Help**.

The Browser application opens to the Android Market help page, with links to many help topics. (For more on using the Browser, see “Browser” on page 139.)

To browse for applications

You can browse applications by category and sort them in different ways.

- 1 On the Android Market home page, touch a top-level category, such as **Apps** or **Games**.
- 2 Scroll to view subcategories, and then touch the one you want to explore.
- 3 Touch **Top paid**, **Top free**, or **Just in to** further sort the subcategory.

To open a screen with details about an application

- At any time when browsing Android Market, touch an application to open its details screen.

Application details screens include a description, ratings, comments, and related information about the application. You can install the application from this screen (see “Downloading and Installing Applications” on page 200). You can also rate, uninstall, and perform other actions on the application (see “Managing Your Downloads” on page 202).

To search for applications

- 1 Touch the search icon  at the top-right of the screen or press the SEARCH button.
- 2 Enter what you want to search for and touch search icon  again.
Enter all or part of the text in an application’s name, description, or the developer’s name you want to search for.
- 3 Touch a search result to open that application’s details screen.
The details screen describes the application and includes buttons for downloading the application and performing other tasks (see “Downloading and Installing Applications” on page 200 and “Managing Your Downloads” on page 202).

To return to the Android Market home screen

You can return to the home screen from most other screens in Android Market.

- Touch the Market icon  at the top-left of the screen.
- OR
- Press MENU, and then touch **Home**.

Downloading and Installing Applications

When you find an application you want, you can install it on your phone.

To download and install an application

Before you can download a paid application, you must set up a billing arrangement, as described in “To create a Google Checkout account” on page 201.

- 1 Find the application you want and open its details screen.

See “Opening Android Market and Finding Applications” on page 198.

In the item details screen, you can read more about the application, including its cost, overall rating, and comments by users. If you scroll down to the **About the developer** section, you can view more applications by this developer, visit the developer’s web site, or send the developer an email message.

Scroll an application’s details screen to learn more about the application, the developer, and what others think of it.

Touch to download and install the application (if it’s a paid application, the button is labeled **Buy**).

- 2 Press MENU, and then touch **Security** to preview the functions and data the application can access on your phone if you install it.

If you’re not comfortable with the access the application requires, don’t continue.

- 3 Touch **Install** (for free applications) or **Buy** (for paid applications).

If the application requires access to your data or control of any functions on your phone, Market tells you what the application can access.

Warning! Read this screen carefully! Be especially cautious with applications that have access to many functions or a significant amount of your data. Once you touch **OK** on this screen, you are responsible for the results of using this item on your phone.

4 Touch **OK** if you agree to the application's access requirements.

If you selected a paid application, you're redirected to a Google Checkout screen to pay for the application before it's downloaded to your phone.

If you selected a free application (or after you touched **Buy now** in Google Checkout), you receive a series of notifications as the application is downloaded and then installed on your phone (see "Managing Notifications" on page 42).

When the application is installed, you can touch the notification to open the application, or open it by touching its icon in the Applications tab (see "Opening Applications" on page 37).

You have 24 hours to try out an application and if you decide you don't want it, uninstall it for a refund. See "To request a refund for an application" on page 203.

If you have another Android phone, you can download a paid application to that phone using the same Android Market account, at no additional charge.

To create a Google Checkout account

You must have a Google Checkout account associated with your Google Account to purchase items from Android Market (of course, this is not necessary for free items).

- Use your computer's web browser to visit <http://checkout.google.com>, to establish a Google Checkout account.

OR

- The first time you buy an item from Android Market, you're prompted to set up a Google Checkout account, by entering your billing information.

Warning! Once you've used Google Checkout once to purchase an application from Android Market, the phone remembers your password, so you don't need to enter it the next time. For this reason, you should secure your phone to prevent others from using it without your permission. For details, see "Locking Your Screen" on page 46.

Managing Your Downloads

Once you've downloaded and installed an application, you can rate it, view it in a list with your other downloaded applications, and so on.

To view your downloaded applications

You can view a list of the applications you've downloaded from Android Market, and use the list for a number of purposes.

- On the Android Market home screen, press MENU, and then touch **Downloads**.

In the list of the free and paid applications that opens, you can touch one to rate it, uninstall it, request a refund, and so on.

To uninstall an application

- 1 On the Android Market home screen, press MENU, and then touch **Downloads**.
- 2 Touch the application you want to uninstall.
The details screen for the application opens.
- 3 Touch **Uninstall**.
- 4 Touch **OK** in the confirmation dialog.
- 5 Touch the explanation that best matches why you're uninstalling, and then touch **OK**.

The application is uninstalled. You can install the application again at any time — without charge if it was a free application.

To request a refund for an application

If you are not satisfied with an application, you can ask for a refund within 24 hours of the purchase. Your credit card will not be charged and the application is uninstalled from your phone.

If you change your mind, you can install the application again, but you can't request a refund a second time.

- 1 On the Android Market home screen, press MENU, and then touch **Downloads**.
- 2 Touch the application you want to uninstall for a refund.
The details screen for the application opens.
- 3 Touch **Uninstall & refund**.
Your application is uninstalled and the charge is cancelled.
- 4 Touch the explanation that best matches why you're uninstalling, and then touch **OK**.

To set whether you're notified about updated applications

- 1 On the Android Market home screen, press MENU, and then touch **Downloads**.
- 2 Press MENU, and then touch **Notifications**.
- 3 Select the option to be notified of updates to the applications you've downloaded, or not.
- 4 Touch **OK**.

To rate an application

You can award an application from one to five stars and share what you think about an application with other shoppers.

- 1 Open the details screen for an application.
You can do this by browsing or searching for the application and then touching it, or if you've downloaded the application, by touching it in the list of your downloaded applications.
- 2 Touch the stars under **My review**.
- 3 Touch the number of stars you want to award the application, and then touch **OK**.

- 4 Back on the details screen, touch **Post a comment** if you want to share a comment about the application.

To flag inappropriate applications

If you discover an application with graphically violent, sexual, or otherwise hateful or offensive content, you can report it to the Android Market team.

- 1 Open the details screen for an application.
You can do this by browsing or searching for the application and then touching it, or if you've downloaded the application, by touching it in the list of your downloaded applications.
- 2 Scroll to the bottom of the details screen and touch **Flag as inappropriate**.
- 3 Touch the reason you find the application objectionable.
- 4 Touch **Submit**.

Your comments are sent to the Android Market team.

T-Mobile Applications

Your T-mobile applications help you easily manage your account, device, and favorite contacts.

In this section

"T-Mobile myFaves®" on page 206

"T-Mobile My Account" on page 208

T-Mobile myFaves®

T-Mobile myFaves helps you stay connected to the people who matter most in your life. Simply choose any five U.S. phone numbers you call most often, on any network.

For more information about the benefits of using T-Mobile myFaves and how to subscribe to this service, visit <http://www.t-mobile.com>.

T-mobile myFaves icon on the Home screen

Once you activate your subscription to T-Mobile myFaves service, the **myFaves** icon  will show on your phone's Home screen. Access myFaves by touching the **myFaves** icon. You can then add and call contacts by simply touching the circles you see. You can also associate your contacts with preset icons or their actual photos.

Press MENU to let you edit, replace, or change the order of the myFaves contacts.

To add myFaves contacts

To add myFaves contacts, you can create new contacts or add existing contacts from your phone.

- 1 Press HOME, and then touch **myFaves** on the Home screen.
- 2 Touch an empty circle on the myFaves screen.
- 3 Choose whether to create a new contact or use an existing contact.
 - If you choose **Create new**, you need to fill in the name and number.
 - If you choose **From Contacts**, just select a contact from your Contacts list. The name and number will be automatically entered.
- 4 Touch **Change icon** to associate the contact with an image. You can choose to take a picture or use an existing image or icon on your phone.
- 5 Touch **Add contact** when you are done.

Note You can only enter the name and phone number for a contact when you create a new contact in myFaves. If you want to be able to email the myFaves contact, you need to import an existing contact that has an email address.

Communicating with a myFaves contact

You have different ways to communicate with a myFaves contact.

- 1 On the myFaves panel, select the myFaves contact you want to communicate with.
- 2 On the screen, select how you want to communicate with the contact. You can do the following:
 - Call
 - Send email (Uses Gmail to send the email)
 - Send message
 - Send IM (Uses Google Talk to chat)
 - Activity log (Touch to view the information for the selected contact.)

To edit myFaves contact

- 1 Press HOME, and then touch **myFaves** on the Home screen.
- 2 Select the myFaves contact you want to edit by positioning the contact's circle in the center of the screen.
- 3 Press MENU, and then touch **Edit contact**.
- 4 Edit the contact details and contact icon, and then touch **Save contact**.

To change the order of myFaves contacts

- 1 Press HOME, and then touch **myFaves** on the Home screen.
- 2 Press MENU, and then touch **Change order**.
- 3 Scroll the TRACKBALL to the left or right to move the contact's circle.
- 4 After re-ordering, press MENU, and then touch **Change order**.

To replace a myFaves contact

- 1 Press HOME, and then touch **myFaves** on the Home screen.
- 2 Select the myFaves contact you want to replace by positioning the contact's circle in the center of the screen.
- 3 Press MENU, and then touch **Replace contact**.
- 4 Follow steps 3 o 5 of "To add myFaves contacts" on page 206.

T-Mobile My Account

T-Mobile My Account lets you quickly view a summary of your account, and view device information. It is also a hub where you can easily personalize your phone, manage connections, and monitor storage and battery levels.

To open My Account

Press HOME, touch the Applications tab, and then touch **My Account**.

My Account tabs

There are two tabs in My Account: Account Info, and Device Info. Touch the tab to view the available options.

Tab	You can
Account Info	• Check a summary your phone usage and bill. • Pay your bill online. • View information about your plan and services.
Device Info	• Personalize your phone to fit your style. • Manage your phone and connection settings. • View help topics about your phone and its applications. • Check storage levels for the phone and microSD card. • Check battery level.

Settings

You use the Settings application to configure how your phone looks, sounds, communicates, and operates in many other ways. All the settings in the Settings application are detailed in this section.

Many applications also have their own settings. See the sections about those applications to learn more.

In this section

"Opening Settings" on page 210

"Wireless Controls" on page 210

"Call Settings" on page 213

"Sound & Display Settings" on page 214

"Data Synchronization Settings" on page 215

"Security & Location Settings" on page 216

"Applications Settings" on page 217

"SD Card & Phone Storage Settings" on page 219

"Date & Time Settings" on page 220

"Locale & Text Settings" on page 220

"Search Settings" on page 222

"Accessibility Settings" on page 222

"Speech Synthesis Settings" on page 223

"About Phone" on page 223

Opening Settings

The Settings application contains most of the tools for customizing and configuring your phone.

To open Settings

- Press HOME > MENU, and then touch **Settings**.
- OR
- Touch the Settings icon  in the Applications tab.
See “Opening Applications” on page 37 to learn more about opening and switching applications.

Wireless Controls

Use Wireless controls settings to configure and manage connections to networks and devices via Wi-Fi, Bluetooth, and mobile networks. You also use Wireless controls to configure connections between your phone and virtual private networks (VPNs) and for turning off all radios with airplane mode.

Wireless controls screen

Wi-Fi Check to turn on Wi-Fi so you can connect to Wi-Fi networks.

Wi-Fi settings See “Wi-Fi settings screen” on page 211.

Bluetooth Check to turn on Bluetooth so you can connect to Bluetooth devices.

Bluetooth settings See “Bluetooth settings screen” on page 211.

VPN settings See “VPN settings screen” on page 212.

Mobile networks See “Mobile networks settings screen” on page 212.

Airplane mode Check to turn off all wireless radios, to comply with regulations on airplanes and other locations.

Wi-Fi settings screen

In addition to these settings, you can press **MENU** on this screen and touch **Advanced** to configure the settings described in “Advanced Wi-Fi settings screen” on page 211.

Wi-Fi Check to turn on Wi-Fi so you can connect to Wi-Fi networks.

Network notification Check to receive an alert when an open Wi-Fi network becomes available.

Wi-Fi networks Displays a list of Wi-Fi networks you’ve previously configured and those detected when the phone last scanned for Wi-Fi networks. For details, see “Connecting to Wi-Fi Networks” on page 52.

Add Wi-Fi network Opens a dialog where you can add a Wi-Fi network by entering its SSID (the name it broadcasts) and security type. See “Connecting to Wi-Fi Networks” on page 52.

Advanced Wi-Fi settings screen

Regulatory domain Opens a dialog where you can override your phone’s default settings for the number of Wi-Fi channels, which is regulated differently in different locations.

Wi-Fi sleep policy Opens a dialog where you can set whether and when the Wi-Fi radio disconnects. Disabling sleep uses more battery power.

MAC address The MAC address of your phone when connecting to Wi-Fi networks.

IP settings If you check **Use static IP**, you can use the settings in this section to enter an IP address and other network settings for you phone manually, rather than using the DHCP protocol to obtain network settings from the W-Fi network itself.

Bluetooth settings screen

Bluetooth Check to turn on Bluetooth so you can connect to Bluetooth devices.

Device name Opens a dialog where you can give your phone a name that is visible on some Bluetooth devices when you pair them. The current name is displayed.

Discoverable Check to make your phone discoverable by other Bluetooth devices for 120 seconds.

Scan for devices Touch to search for and display information about nearby Bluetooth devices.

Bluetooth devices Displays a list of Bluetooth devices you've previously configured and those detected when the phone last scanned for Bluetooth devices. For details, see "Connecting to Bluetooth Devices" on page 54.

VPN settings screen

Add VPN Opens a screen that prompts you to select the type VPN you want to add, which then prompts you for VPN configuration details. See "Connecting to Virtual Private Networks" on page 59.

VPNs The list of VPNs you've previously configured. For details, see "Connecting to Virtual Private Networks" on page 59.

Mobile networks settings screen

Data roaming Uncheck to prevent your phone from transmitting data on mobile networks via other carriers' networks, when you leave an area with your own carrier's mobile networks. See "To disable data when roaming" on page 51.

Use only 2G networks Check to obtain slightly better battery life, by preventing your phone from connecting to higher-speed networks. See "To limit your data connection to 2G networks" on page 51.

Network operators Opens a screen that searches for and then displays mobile networks that are compatible with your phone. Consult your carrier to understand the billing implications of selecting a another carrier.

Access Point Names Opens the APNs screen, where you can select mobile access point configurations or press Menu to add a new one. Use the tools on this screen under the direction of your carrier.

Call Settings

Use Call settings to configure phone call settings, such as call forwarding and call waiting or other special features offered by your carrier. You can also use Call settings to configure the phone so it can place outgoing calls to a fixed set of phone numbers.

Call settings screen

Fixed Dialing Numbers See “Fixed Dialing Numbers screen” on page 213.

Voicemail Opens a dialog where you can enter the phone number you want to use for listening to and managing your voicemail.

GSM call settings See “GSM call settings screen” on page 213

Fixed Dialing Numbers screen

You can use the settings on this screen to configure your phone so it can place outgoing calls to only the FDN numbers you save on the phone's SIM.

Enable FDN Opens a dialog that asks you to enter your PIN2 and then places the phone in FDN mode. Changes to **Disable FDN** when FDN is enabled.

Change PIN2 Opens a series of dialogs that prompt you to enter your current PIN2 and then enter and confirm a new PIN2.

FDN list Opens a screen that lists any FDNs saved on your SIM. Press MENU, and then touch **Add contact** to add an FDN number to your SIM. Press MENU on that screen to import a number from your Contacts for use as an FDN, or to delete a number from the FDN list.

GSM call settings screen

Call forwarding Opens a screen where you can configure details for how your phone forwards calls when you're on the phone, when you don't answer, and so on.

Caller ID Opens a dialog where you can set whether your phone number is displayed to the people you call.

Call waiting Check to see and be able to respond to calls you receive when already on a call, as described in “Placing and Receiving Calls” on page 61.

Sound & Display Settings

Use the Sound & display settings to configure many aspects of call and notification ringtones, music and other audio, as well as the brightness and other screen settings.

Sound & display settings screen

Silent mode Check to silence all sounds (including call and notification ringtones) except the audio from music, movies, and other media and any alarms you have set (you must silence media and alarms in their own applications).

Ringer volume Opens a dialog where you can drag a slider to set the volume of ringtones that sound when you receive a phone call or notification. You can uncheck the option to use the same volume for both calls and notifications, to reveal a slider you can drag to set the notification ringtone volume separately.

Media volume Opens a dialog where you can drag a slider to set the volume for music, video soundtracks, and other media.

Phone ringtone Opens a dialog where you can pick the ringtone to sound when you receive a phone call. You can touch a ringtone to listen to it. See “To use a song as a ringtone” on page 186 to learn how to add your own music to this list.

Phone vibrate Check to vibrate the phone when you receive an incoming call, independent of your ringtone or volume settings.

Notification ringtone Opens a dialog where you can pick the ringtone to sound when you receive a phone call. You can touch a ringtone to listen to it.

Audible touch tones Check to hear tones when you use the Dialer to dial a number (see “Placing and Ending Calls” on page 62).

Audible selection Check to play a sound when you touch buttons, icons, and other onscreen items that react to your touch.

SD card notifications Check to play a sound when you receive SD card notifications.

Orientation Check to switch the screen to landscape mode or portrait mode automatically, when you turn the phone sideways or upright.

Animation Check to enjoy animated transitions when navigating from screen to screen.

Brightness Check to open a dialog with a slider for adjusting the screen brightness. For the best battery performance, use the dimmest comfortable brightness.

Screen timeout Opens a dialog where you can set how long to wait after you last touch the screen or press a button before the screen darkens. For the best battery performance, use the shortest convenient timeout.

Data Synchronization Settings

Use the Data synchronization settings to control how and whether all applications synchronize their data and to turn synchronization on or off for individual applications. Gmail, Calendar, and other applications may also have their own settings to control how they synchronize data: see the sections on those applications for details.

Data synchronization screen

Background data Check to permit applications to synchronize data in the background, whether or not you are actively working in them. Unchecking this setting can save battery power and lowers (but does not eliminate) data use.

Auto-sync Check to permit applications to synchronize data on their own schedule. If you uncheck this setting, you must touch an application in the list on this screen each time you want to synchronize its data, or press MENU and touch **Sync now** to synchronize all applications' data.

Application sync settings

When the Auto-sync option on this screen is checked, you can check the applications in this list to permit them to synchronize their data on their own schedules. When Auto-sync is unchecked, touch an application in the list to synchronize its data once.

Security & Location Settings

Use the Security & location settings to set your preferences for using and sharing your location when you search for information and use location-aware applications, such as Maps, and to configure settings that help secure your phone and its data.

Use wireless networks Check to use information from Wi-Fi and mobile networks to determine your approximate location, for use in Maps, when you search, and so on. When you check this option, you're asked if you consent to sharing your location anonymously with Google's location service.

Enable GPS satellites Check to use your phone's global positioning system (GPS) satellite receiver to pinpoint your location to within an accuracy as close as several meters ("street level"). Actual GPS accuracy is dependent on a clear view of the sky and other factors.

Share with Google Check to include your position when using Google search and other Google services. When you check this option, you're asked if you consent to allowing Google to use your location when providing these services.

Screen unlock pattern Using these controls is described in "Locking Your Screen" on page 46.

Require unlock pattern Uncheck to stop requiring an unlock pattern to unlock your screen. You must draw your current pattern when you uncheck this option.

Use visible pattern Check to draw lines between the unlock pattern you draw.

Use tactile feedback Check to vibrate the phone briefly as you touch each dot when you draw an unlock pattern.

Set unlock pattern Opens a set of screens that guide you through the process of drawing a screen unlock pattern, as described in "Locking Your Screen" on page 46.

Set up SIM card lock Opens a screen where you can configure the phone to require entering the SIM PIN to use the phone, and where you can change the SIM PIN.

Visible passwords Check to briefly show each character of passwords as you enter them, so you can more easily check what you enter.

Use secure credentials Check to allow applications to access your phone's encrypted store of secure certificates and related passwords and other credentials. You use the credential storage to establish some kinds of VPN connections (see "Connecting to Virtual Private Networks" on page 59). This setting is dimmed if you have not yet set a password for the credential storage.

Set password Opens a dialog where you can set or change the password for your secure credential storage. Your password must have at least 8 letters or numbers and may not contain spaces or other special characters.

Clear storage Deletes all secure certificates and related credentials and erases the secure storage's own password, after asking you to confirm you want to do this.

Applications Settings

Use the Application settings to view details about the applications installed on your phone, to manage their data and force them to stop, and to set whether you want to permit installation of applications you obtain from web sites and email.

Application settings screen

Unknown sources Check to permit installation of applications you obtain from web sites, email, or other locations other than Android Market.

Warning! To protect your phone and personal data, download applications only from trusted sources, such as Android Market.

Manage applications

Opens a list of all the applications and other software installed on your phone, along with its size. Touch an application to open its Application info screen (see "Application info screen" on page 217).

Development

See "Development screen" on page 218.

Application info screen

The Application info screen for each application lists its name and version, along with many details about the application. Depending on the application and where it came from, it may also include buttons for managing the application's

data, forcing the application to stop, and for uninstalling the application. It also lists details about the kinds of information about your phone and your data the application has access to.

Storage Details about the amount of phone storage used by the application. If you installed the application from Android Market or another source, includes and **Uninstall** button you can use to remove the application and all of its data and settings from the phone. (See “Market” on page 197 for more information on uninstalling and reinstalling applications.)

Cache If the application stores data in a temporary area of the phone's memory, lists how much information is stored and includes a button for clearing it.

Launch by default If you have configured an application to launch certain file types by default, you can clear that setting here.

Controls Use the **Force stop** button to stop an application that is misbehaving. The application is stopped without confirmation.

Permissions Lists the kinds of information about your phone and data the application has access to.

Development screen

The Development screen contains settings that are useful for developing Android applications. For more information, including documentation of the Android APIs and development tools, see the Android developer web site (<http://developer.android.com>).

USB debugging Check to permit debugging tools on computer to communicate with your phone via a USB connection.

Stay awake Check to prevent the screen from dimming and locking, when the phone is connected to a charger or to a USB device that provides power.

Allow mock locations Check to permit a development tool on a computer to control the where the phone believes it is located, rather than using the phone's own internal tools for this purpose.

SD Card & Phone Storage Settings

Use the SD card & phone storage settings to monitor the used and available space on your phone and on your SD card, to manage your SD card, and if necessary, to reset the phone, erasing all of your personal information.

SD card & phone storage screen

SD card, Total space and Available space Lists the amount of space on any SD card installed in your phone and the amount you have used to store pictures or videos you've taken, music you've installed, and other files. For more information, see "Connecting to a Computer" on page 57 and "Getting Started" on page 19, as well as the sections for the applications that store media and other files on the SD card.

Unmount SD card Unmounts the SD card from your phone, so you can safely remove it when the phone is on or to format the card. This setting is dimmed if there is no SD card installed, if you have already unmounted it, or if you have mounted the SD card on your computer (see "Connecting to a Computer" on page 57).

Format SD card Permanently erases everything on an SD card and prepares it for use with your phone. You must unmount an SD card before you can format it.

Internal phone storage, Available space The amount of internal phone storage used by the operating system, its components, applications (including those you downloaded), and their permanent and temporary data.

Factory data reset Erases all your personal data from internal phone storage, including information about your Google Account, other accounts, your system and application settings, and any downloaded applications. Resetting the phone does not erase any system software updates you've downloaded or any files on your SD card. If you reset the phone in this way, you're prompted to reenter the same kind of information as when you first started Android (see "Launching Android the First Time" on page 28).

Date & Time Settings

Use Date & time settings to set your preferences for how dates are displayed. You can also use these settings to set your own time and time zone, rather than obtaining the current time from the mobile network.

Automatic Uncheck to set the date, time, and time zone on the phone manually, rather than obtaining the current time from the mobile network.

Set date If **Automatic** is unchecked, opens a dialog where you can manually set the phone's date.

Select time zone If **Automatic** is unchecked, opens a dialog where you can set the phone's time zone.

Set time If **Automatic** is unchecked, opens a dialog where you can set the phone's time.

Use 24-hour format Check to display the time using 24-hour time format, for example: **13:00**, rather than **1:00 pm**.

Select date format Opens a dialog where you can select which format you prefer for displaying dates.

Locale & Text Settings

Use the Locale & text settings to pick which language you prefer for the text on your phone, and for configuring the onscreen keyboard, including words you've added to its dictionary.

Locale & text screen

Select locale Opens the Locale screen, where you can select the language you want for the text on your phone.

Android keyboard See "Android keyboard settings screen" on page 221.

User dictionary Opens a list of the words you've added to the dictionary, as described in "Using the Onscreen Keyboard" on page 33. Touch a word to edit or delete it. Press MENU and touch **Add** to add a word.

Android keyboard settings screen

The Android keyboard settings apply to the onscreen keyboard that is included with your phone. The correction and capitalization features affect only the English version of the keyboard.

Vibrate on keypress Check to vibrate the phone briefly each time you touch a key on the onscreen keyboard.

Sound on keypress Check to play a brief sound each time you touch a key on the onscreen keyboard.

Auto-capitalization Check to have the onscreen keyboard automatically capitalize the first letter of the first word after a period, the first word in a text field, and each word in name fields.

Quick fixes Check to automatically correct some common misspellings as you type.

Show suggestions Check to show suggested words in a strip above the onscreen keyboard as you type (see “Using the Onscreen Keyboard” on page 33).

Auto-complete Check to cause the onscreen keyboard to enter the suggested word (highlighted in orange in the strip above the keyboard) when you enter a space or punctuation, if the onscreen keyboard is highly confident that the suggested word is likely what you intend to type (see “Using the Onscreen Keyboard” on page 33).

Search Settings

Use Search settings to configure Google search, Quick Search Box, and what data on the phone you want to include in searches. For more information, see “Searching Your Phone and the Web” on page 44.

Search settings screen

Google settings Opens a screen where you can set your preferences for whether Google web search makes suggestions below the Quick Search Box and whether the suggestions take into account your previous searches. Also offers the ability to open the Google web search history settings page in Browser.

Searchable items Opens a screen where you can check or uncheck the kinds of data you want to include in phone searches.

Clear search shortcuts Erases the list of search results that you touched below the Quick Search Box.

Accessibility Settings

Use the Accessibility settings to configure any accessibility plug-ins you have installed on your phone.

Accessibility Check to enable any installed accessibility plug-ins.

SoundBack Check to play a sound as you navigate the phone’s user interface.

KickBack Check to vibrate the phone briefly as feedback as you navigate the phone’s user interface, press buttons, and so on.

TalkBack Check to cause an installed speech synthesizer to speak the labels or names of items as you navigate the phone’s user interface.

Speech Synthesis Settings

You use the Speech synthesis settings to configure the Android text-to-speech synthesizer, for applications that can take advantage of it (such as TalkBack, described in “Accessibility Settings” on page 222).

Speech synthesizer controls screen

Only the **Install voice data** setting is available if you don't have speech synthesizer data installed.

Listen to an example Plays a brief sample of the speech synthesizer, using your current settings.

Install voice data If your phone does not have speech synthesizer data installed, connects to Android Market and guides you through the process of downloading and installing the data. This setting is not available if the data is installed.

Always use my settings Check to use the settings on this screen in place of speech synthesizer settings available in other applications.

Speech rate Opens a dialog where you can select how quickly you want the synthesizer to speak.

Language Opens a dialog where you can select the language of the text you want the synthesizer to read, so it is pronounced correctly. This is particularly useful in combination with the Always use my settings setting, to ensure that text in a variety of applications is spoken correctly.

About Phone

The About phone settings include a wealth of information about your phone.

About phone screen

System updates Opens a window that reports on the availability of any Android system software updates.

Status Opens the Status screen with a long list of information about your battery, mobile network connection, and other details.

Battery use Opens a list of the applications and operating system components you have used since you last connected the phone to a power source, sorted by the amount of power they have used. You can touch an application in the list to view details about its power use and, if available, touch a button to open a settings or information screen for that component or application.

Legal information Opens a screen where you can obtain legal information about the software included with your phone.

System tutorial Opens the screen that offers to introduce you to some of your phone's features, as described in "Launching Android the First Time" on page 28.

Version information Lists details about the model numbers and versions of your phone's hardware and operating system software. This information is useful if you need to work with your carrier's support team.

Appendix

Specifications

Processor	Qualcomm® MSM7200A™ 528 MHz
Platform	Android
Memory	ROM: 512 MB RAM: 288 MB
Dimensions (LxWxT)	113 x 55.56 x 14.65 mm (4.45 x 2.19 x 0.58 in)
Weight	117 g (4.13 ounces) with battery
Display	3.2-inch TFT-LCD touch-sensitive screen with 320 x 480 HVGA resolution
Networks	HSPA/WCDMA: 1700/2100 MHz Up to 7.2 Mbps down-link and 2 Mbps up-link speeds Quad-band GSM/GPRS/EDGE: 850/900/1800/1900 MHz (Band frequency, HSUPA availability, and data speed are operator dependent)
Device control	Trackball with Enter button
GPS	Internal GPS antenna
Connectivity	Bluetooth® 2.0 with Enhanced Data Rate and A2DP for wireless stereo headsets Wi-Fi®: IEEE 802.11b/g HTC ExtUSB™ (11-pin mini-USB 2.0 and audio jack in one)
Camera	3.2 megapixel color camera with auto focus
Audio supported formats	AAC, AAC+, AMR-NB, MP3, WMA, WAV, AAC-LC, MIDI, OGG
Video supported formats	MP4, 3GP

Battery	Rechargeable Lithium-ion battery Capacity: 1340 mAh Talk time: • Up to 400 minutes for WCDMA • Up to 450 minutes for GSM Standby time: • Up to 660 hours for WCDMA • Up to 420 hours for GSM (The above are subject to network and phone usage.)
Expansion slot	microSD memory card (SD 2.0 compatible)
AC adapter	Voltage range/frequency: 100 - 240V AC, 47/63 Hz DC output: 5V and 1A
Special features	Digital Compass, G-Sensor

Note Specifications are subject to change without prior notice.

Regulatory Notices

Regulatory Agency Identifications

For regulatory identification purposes, this product is assigned a model number of **SAPP310**.

To ensure continued reliable and safe operation of this product, use only the accessories listed below with your **SAPP310**.

The Battery Pack has been assigned a model number of **SAPP160**.

Note This product is intended for use with a certified Class 2 Limited Power Source, rated 5 Volts DC, maximum 1 Amp power supply unit.

Federal Communications Commission Notice

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this

equipment does cause harmful interference to radio or TV reception, which can be determined by turning the equipment on and off, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio or television technician for help.

Modifications

The FCC requires the user to be notified that any changes or modifications made to the device that are not expressly approved by High Tech Computer Corporation may void the user's authority to operate the equipment.

Body-worn operation

This device was tested for typical body-worn operations with the back of the phone kept **1.5 cm** from the body. To maintain compliance with FCC RF exposure requirements, use only belt-clips, holsters or similar accessories that maintain a **1.5 cm** separation distance between the user's body and the back of the phone, including the antenna. The use of belt-clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Safety Precautions for Radio Frequency Exposure

- Use only original manufacturer-approved accessories, or accessories that do not contain any metal.
- Use of non-original manufacturer-approved accessories may violate your local Radio Frequency exposure guidelines and should be avoided.

FCC RF Radiation Exposure Statement

- This Transmitter has been demonstrated co-location compliance requirements with Bluetooth and WLAN.
This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

- This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.

Exposure to Radio Frequency (RF) Signals

Your phone contains a radio transmitter and receiver. The radiated output power is far below the international radio frequency exposure limits. These limits are part of comprehensive guidelines and establish permitted levels of Radio Frequency energy for the general population. The guidelines are based on the safety standards previously set by international standards bodies:

- American National Standards Institute (ANSI) IEEE. C95.1-1992
- National Council on Radiation Protection and Measurement (NCRP). Report 86. 1986
- International Commission on Non-Ionising Radiation Protection (ICNIRP) 1996
- Ministry of Health (Canada), Safety Code 6. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in usage.

As with other mobile radio transmitting equipment, users are advised that for satisfactory operation of the equipment and for the safety of personnel, it is recommended that no part of the human body be allowed to come too close to the antenna during operation of the equipment.

Your phone has an internal antenna. Use only the supplied integral antenna. Use of unauthorized or modified antennas may impair call quality and damage your phone, causing loss of performance and SAR levels exceeding the recommended limits as well as result in non-compliance with local regulatory requirements in your country.

To assure optimal phone performance and ensure human exposure to Radio Frequency energy is within the guidelines set forth in the relevant standards; always use your phone only in its normal-use position. Do not touch or hold the antenna area unnecessarily when placing or receiving a phone call. Contact with the antenna area may impair call quality and cause your phone to operate at a higher power level than needed. Avoiding contact with the antenna area when your phone is IN USE optimizes the antenna performance and the battery life.

Tests for SAR are conducted using standard operating positions specified by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power

level, the actual SAR level of the phone while operation can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government-adopted requirement for safe exposure. The tests are performed in positions and locations (for example, at the ear and worn on the body) as required by the FCC for each model. (Bodyworn measurements may differ among phone models, depending upon available accessories and FCC requirements). For body worn operation, to maintain compliance with FCC RF exposure guidelines, use only original manufacturer approved accessories.

SAR Information

1.39 mW/g@1g

Telecommunications & Internet Association (TIA) Safety Information

Pacemakers

The Health Industry Manufacturers Association recommends that a minimum separation of six inches be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research. Persons with pacemakers:

- Should ALWAYS keep your phone more than six inches from their pacemaker when your phone is turned on.
- Should not carry your phone in a breast pocket.
- Should use the ear opposite the pacemaker to minimize the potential for interference. If you have any reason to suspect that interference is taking place, turn your phone **off** immediately.

Hearing Aids

Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your wireless service provider, or call the customer service line to discuss alternatives.

Other Medical Devices

If you use any other personal medical device, consult the manufacturer of your phone to determine if they are adequately shielded from external Radio Frequency energy. Your physician may be able to assist you in obtaining this information.

Turn the phone **off** in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external Radio Frequency energy.

WEEE Notice

The Directive on Waste Electrical and Electronic Equipment (WEEE), which entered into force as European law on 13th February 2003, resulted in a major change in the treatment of electrical equipment at end-of-life.

The purpose of this Directive is, as a first priority, the prevention of WEEE, and in addition, to promote the reuse, recycling and other forms of recovery of such wastes so as to reduce disposal.

The WEEE logo (shown at the left) on the product or on its box indicates that this product must not be disposed of or dumped with your other household waste. You are liable to dispose of all your electronic or electrical waste equipment by relocating over to the specified collection point for recycling of such hazardous waste.

Isolated collection and proper recovery of your electronic and electrical waste equipment at the time of disposal will allow us to help conserving natural resources. Moreover, proper recycling of the electronic and electrical waste equipment will ensure safety of human health and environment. For more information about electronic and electrical waste equipment disposal, recovery, and collection points, please contact your local city center, household waste disposal service, shop from where you purchased the equipment, or manufacturer of the equipment.

RoHS Compliance

This product is in compliance with Directive 2002/95/EC of the European Parliament and of the Council of 27 January 2003, on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS) and its amendments.
