**NOTE:**

Review these operating instructions and safety precautions carefully before use.

Do not use mobile phone in hospitals or in the vicinity of medical devices, such as pacemakers or hearing aids. Mobile phones may interfere with the operation of these devices. Keep a minimum distance of 6–8" between pacemaker and mobile phone. When using the mobile phone hold it to the ear farthest from the pacemaker.

Always use the handsfree kit to make calls while driving (p. 131).

Turn off mobile phone while aboard any aircraft. To prevent accidental activation, see (p. 92).

Do not use mobile phone near gas stations, fuel depots, chemical plants or blasting operations. Mobile phones may cause interference with the operation of technical installations.

The ring tone and hands-free speaker are reproduced through the earpiece. Never hold the handset to your ear when the handset is ringing or when using the hands-free speaker mode. Serious and permanent damage could occur to your hearing!

Caution! SIM card may be removed. Small parts could be swallowed by children.

Do not exceed the mains voltage (V) specified on the power supply unit.

Do not use an optical magnifier to look at the activated infrared interface [Class 1 LED product (classification as per IEC 60825-1)].

Only use original Siemens batteries (100% mercury-free) and charging devices. Use of non-Siemens batteries and/or charging devices may cause explosion resulting in serious injury or property damage.

It is recommended that you open the phone only to replace the battery (100% mercury-free) or SIM card. Do not open the battery under any circumstances. Any other changes to this device may invalidate the FCC authorization required for operation of the unit, and are strictly prohibited.

Dispose of used batteries and phones in accordance with applicable laws and safety regulations.

Mobile phones may interfere with the operation of nearby TVs, radios or PCs.

For body worn operation, this mobile phone has been tested and meets FCC RF exposure guidelines when used with a carry accessory that contains no metal and that positions the handset at least 0.001 cm from the body. Use of other carry accessories may not ensure compliance with FCC RF exposure guidelines.

Only use original Siemens accessories in order to avoid possible injury and property damage and to ensure compliance with applicable laws and regulations.

Improper use invalidates the warranty!

## Important

Read this information before using your wireless handheld phone.

As this mobile phone is equipped with a fixed (non-retractable) antenna, some paragraphs in the below text may not be applicable.

## Antenna care

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

## Phone operation

### Normal position

Hold the phone as you would any other telephone with the antenna pointed up and over your shoulder.

### Tips on efficient operation

For your phone to operate most efficiently:

- Extend your antenna fully (if applicable).
- Do not touch the antenna unnecessarily when the phone is in use. Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than otherwise needed.

## Driving

Laws pertaining to the use of mobile phones while driving vary significantly from state-to-state and sometimes even from locality-to-locality within states. For example, some areas may allow persons to use their mobile phones only if they employ a hands-free device, and some areas may prohibit the use of mobile phones entirely. Accordingly, Siemens recommends that persons check the laws for the areas in which they drive or will be driving. For areas where the use of mobile phones while driving is permitted, Siemens encourages persons to use their phones responsibly and to employ hands-free devices. Also, if using your phone while driving, please:

- Give full attention to driving – driving safely is your first responsibility;
- Use hands-free operation, if available;
- Pull off the road and park before making or answering a call, if driving conditions so require.
- Review the Ten Driving Safety Tips set forth on p. 139.

## For vehicles equipped with Air Bags

An air bag inflates with great force. DO NOT place objects, including either installed or portable wireless equipment, in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

## Electronic devices

Most modern electronic equipment is shielded from radiofrequency (RF) signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone.

## Pacemakers

The Health Industry Manufacturer's Association recommends that a minimum separation of six inches (6") be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research.

## Persons with pacemakers

- should ALWAYS keep the phone more than six inches from their pacemaker when the phone is turned ON;
- should not carry the phone in a breast pocket;
- should use the ear opposite the pacemaker to minimize the potential for interference;
- should turn the phone OFF immediately if there is any reason to suspect that interference is taking place.

## Hearing Aids

Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your service provider or your hearing aid manufacturer to discuss alternatives.

## Other Medical Devices

If you use any other personal medical devices, consult the manufacturers of your devices to determine if they are adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.

Turn your phone OFF in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

## Vehicles

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

## Posted Facilities

Turn your phone OFF in any facility where posted notices so require.

## Airplanes

FCC and Airline Regulations prohibit using your phone while in the air. Turn your phone OFF before boarding an airplane.

Check and comply with the policy of your airline regarding the use of your phone while the airplane is on the ground.

## Blasting areas

To avoid interfering with blasting operations, turn your phone OFF when in a "blasting area" or in areas posted: "Turn off two-way radio." Obey all signs and instructions.

## Potentially explosive atmospheres

Turn your phone OFF when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Areas with a potentially explosive atmosphere are often but not always clearly marked. They include: fueling areas such as gasoline stations; below deck on boats; fuel or chemical transfer or storage facilities; vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or particles, such as grain, dust or metal powders; and any other area where you would normally be advised to turn off your vehicle engine.

## Emergency calls (SOS)

Your wireless phone can be used to make emergency calls. You can make an emergency call from the main display screen. Enter the local emergency number such as 911 and then press the  key.

This phone, like any wireless phone, operates using radio signals, wireless and landline networks, and user-programmed functions. Because of this, connections in all conditions cannot be guaranteed. Therefore, you should never rely solely on any wireless phone for essential commu-

nications (for example, medical emergencies). Remember - to make or receive any calls, the phone must be switched on and be used in a service area that has adequate signal strength. Emergency calls might not be possible on all wireless phone networks or when certain network services or phone features are in use. Check with local service providers regarding their network features.

Always make certain that your phone is properly charged before attempting any emergency calls. If you allow your battery to discharge, you will be unable to receive or make calls, including emergency calls. You must then wait a few minutes after the charging begins to place any emergency calls.

When making an emergency call, remember to give all of the necessary information as accurately as possible. Remember that your wireless phone might be the only means of communication at the scene of an accident, therefore you should not terminate the call until given permission to do so.

## RF EXPOSURE /SPECIFIC ABSORPTION RATE (SAR) INFORMATION

THIS SIEMENS SL56 PHONE MEETS THE GOVERNMENT'S REQUIREMENTS FOR EXPOSURE TO ELECTROMAGNETIC FIELDS.

Your cell phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy established by the Federal Communications Commission (FCC) of the U.S. Government and by Health Canada. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines were developed and confirmed by independent scientific organizations through periodic and thorough evaluation of scientific studies\*. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for cell phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit established by the FCC and by Health Canada is 1.6 W/kg\*\*. Tests for SAR are conducted using standard operating positions accepted by the FCC and by Industry Canada with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified

power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station, the lower the power output.

Before a phone model is available for sale to the public, it must be tested and the manufacturer must certify to the FCC and Industry Canada that it does not exceed the limit established by each government for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body), reported to the FCC and available for review by Industry Canada. The highest SAR value for this model phone when tested for use at the ear is

1.20 W/kg\*\*\*

and when worn on the body<sup>+</sup> is

1.11 W/kg\*\*\*

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Internet Association (CTIA) web-site at [www.phonefacts.net](http://www.phonefacts.net) or the Canadian Wireless Telecommunications Association (CWTA) website [www.cwta.ca](http://www.cwta.ca).

SAR information on this Siemens SL56 phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on FCC ID **PWX-SL56**.

While there may be differences between the SAR levels of various phones and at various positions, all Siemens products meet the governmental requirements for safe RF exposure.

---

- + For body worn operation, this mobile phone has been tested and meets FCC RF exposure guidelines when used with a carry accessory that contains no metal and that positions the handset at least 0.001 cm from the body. Use of other carry accessories may not ensure compliance with FCC RF exposure guidelines.
- \* The World Health Organization (WHO, CH-1211 Geneva 27, Switzerland), on the basis of the actual knowledge, does not see any necessity for special precautionary measures when using cell phones.

- \*\* averaged over 1 g of tissue.
- \*\*\* SAR values may vary depending on national requirements and network bands. SAR information for different regions can be found at **[www.my-siemens.com](http://www.my-siemens.com)**

## ① Loudspeaker

## ② Display icons

Signal strength/GPRS available/battery level.

## ③ Control key

See next page.

## ④ Input keys

Numbers, letters.

## ⑤ Microphone

## ⑥ Integrated antenna

Do not interfere unnecessarily with the phone above the battery cover. This reduces the signal quality/signal strength.

## ⑦ Dictation key

(in standby mode):

Hold **down**: record.

Press **briefly**: play back.

## ⑧ Plus/minus side key

- During a call: volume loud-quiet.
- In menus, lists and WAP pages: scroll up and down.
- In standby mode:  
Press side key at top **briefly**: show profile selection. Hold **down** key at bottom: start voice control.

## ⑨ Infrared interface

(IrDA, e.g. for communication between PC/PDA and cell phone).

## ⑩ Device interface

Connection for charger, headset etc.

## ① Soft keys

The current functions of these keys are shown in the bottom line of the display as **text** or symbols (e.g. .

## ② Control key

In the main menu:

 Navigation.

In lists and menus:

 Scroll up/down.

 Select function.

 Menu level back.

During a call:

 Open call menu.

In standby mode:

 Voice control (hold down).

 Open Address/Phonebook.

 Open menu.

 GPRS info.

## ③ Call key

Dial phone number/name displayed, take calls. Shows last 10 phone numbers dialed in standby mode.

## ① On/Off/End key

- Switched off: hold **down** to switch on.
- During a conversation or in an application (except for Surf&Fun): press **briefly** to finish.
- In menus: press **briefly** to go back a level. Hold **down** to go back to standby mode.
- In standby mode: if the keylock is disabled, hold **down** to switch off the phone if the keypad is closed.
- Keylock in standby mode, keypad closed: press **briefly** to lock keypad. Press **briefly** and confirm with **OK** to unlock the keypad.

## ② Hold down

- In standby mode: switch all audible signals on/off (except alarm).
- For incoming calls: only switch off ring tones.

## ③ Hold down

- In standby mode: Lock or unlock keys.

### Note

Your phone's display is delivered with a protective film.

**Remove this film before getting started.**

## Open keypad:

- Light on.
- Keypad unlocked.
- Opening melody on (if set).
- The call is accepted.
- Alarm sound off (appointment, alarm).

## Close keypad:

- Back to standby mode.
- Light off.
- Keypad locked (if set).
- Closing melody on (if set).
- The call is ended.
- The call is rejected.
- Alarm sound off (appointment, alarm).

## Insert SIM card/battery

The service provider supplies you with a SIM card on which all the important data for your line is stored. If the SIM card has been delivered in credit-card size, snap the smaller segment out and remove any rough edges.

- Press the lock ①, then remove the battery upwards in the direction of the arrow ②.

- Insert the SIM card in the opening with the contact area **facing downwards** and push gently until it engages below the holder (make sure the angled corner is in the correct position ③).

- Insert the battery in the lower edge ④, then press downwards ⑤ until it engages.

## Remove SIM card

Remove the battery. First push the SIM card ⑥ gently through the slot for the holder and at the same time lift it up slightly ⑦ on the other side. Then remove the SIM card completely.

### Additional information

Always switch off the phone before removing the battery!

Only 3V SIM cards are supported. Please contact your service provider, if you have an older card.

Functions with SIM card .....p. 122

## Charge battery

The battery is not fully charged when delivered. Plug charger cable into the bottom of the phone, plug power supply unit into a power socket power socket and charge for at least **two hours**.

### Display when charging is in progress

During charging.

### Charging time

An empty battery is fully charged after about 2 hours. Charging is only possible within the temperature range 41 °F to 104 °F. At 41 °F above or below, the charge icon blinks as a warning. The mains voltage specified on the power supply unit must not be exceeded.

### Charge icon not visible

If the battery is totally discharged, no charge icon is displayed when the charger is plugged in. It will appear after two hours at most. In this case the battery is fully charged after 3–4 hours.

### Only use the charger provided!

### Display while in service

Charge level display during operation (empty-full):

A beep sounds when the battery is nearly empty. The battery level is only shown correctly during an unbroken charging/discharging cycle. You should therefore **not remove the battery unnecessarily** and where possible **not finish the loading process early**.

### Additional information

The charger heats up when used for long periods. This is normal and not dangerous.

Outside your own home network.....p. 118

Performance.....p. 119

## Activate/deactivate

Hold **down** On/Off/End key to switch on or off.

## Enter PIN

The SIM card can be protected with a 4–8 digit PIN.

Open keypad. Enter the PIN using the number keys. The characters \*\*\*\* are shown, to ensure that nobody can read your PIN on the display. Correct errors with **Clear**.

**OK**

Confirm entry with right soft key. Logging on to the network will take a few seconds.

### Additional information

|                              |        |
|------------------------------|--------|
| Change PIN .....             | p. 23  |

| Clear SIM card barring ..... | p. 24  |

## Switching on your phone for the first time

### Contrast

Set display contrast.

### Time/Date

The clock can be set to the right time once at start-up.

**Yes**

Press.

Open keypad. First enter the date (day/month/year), then the time (12 hours, including seconds).

**OK**

Press. The time and date are updated.

### Time Zones

Set the time zone for your area.

Select the required time zone from list ...

**Set**

... press to set.

### Additional information

If the battery is removed for longer than seconds, the clock must be reset.

Additional clock settings ..... p. 82

## Phonebook or Addressbook

You can choose whether you want to use the **Phonebook** on the SIM card or the internal **Addressbook** as standard.

You can copy the SIM card Phonebook to the Addressbook on the phone. Please **do not interrupt this procedure**. During this time **do not accept incoming calls**. Follow instructions on the display.

To copy data on the SIM card at a later time, highlight entries (see p. 117) and copy these with the function "Copy Into  (Phonebook options menu p. 37).

You can change the standard phonebook at any time (p. 35).

## Signal strength.

Strong receive signal.

A weak signal reduces the call quality and may lead to loss of the connection. Change your location.

## Emergency number (SOS)

**Only to be used in real emergencies!**

By pressing the soft key **SOS**, you can make an emergency call on any network **without** a SIM card and without entering a PIN (not available in all countries).

## Standby mode

When the name of the service provider appears on the display, the phone is in **standby mode** and **ready for use**. If you now close the keypad, the phone remains in standby mode.

The left soft key may have different functions pre-assigned.

Hold **down** the On/Off/End key to return to standby mode from any situation.

### Additional information

SIM services (optional).....p. 109

## User guide

The following symbols are used to explain operation:

Enter numbers or letters.

On/Off/End key.

Call key.

Press the control key on the side indicated.

Soft keys.

**Menu**

Displays a soft-key function.

Function dependent on service provider, may require special registration.

## Menu controls

The steps needed to reach a function are shown in a **condensed form** in this user guide, e.g. to display call list for missed calls:

**Menu** → → Missed Calls

This corresponds to:

1

**Menu**

Open menu.

From standby mode: press **right** soft key.

2

Call Log Select.

Press **top** of control key.

3

Select

Press.

Press **right** soft key to open the Call Log submenu.

4

Select

Press.

Press **right** soft key to open the Missed Calls list.

5

Scroll to the required entry.

Press control key **at the bottom** to scroll down.

6

View

Press.

Press **left** soft key to show phone number with date, time and number of calls.

7

## Codes

The phone and SIM card are protected against misuse by several security codes.

**Keep these confidential numbers in a safe place where you can access them again if required.**

|               |                                                                                                                 |
|---------------|-----------------------------------------------------------------------------------------------------------------|
| PIN           | Protects your SIM card (personal identification number).                                                        |
| PIN2          | This is needed to set the charge detail display and to access additional functions requiring special SIM cards. |
| PUK<br>PUK2   | Key code. Used to unlock SIM cards after the wrong PIN has been entered repeatedly.                             |
| Phone<br>code | Protects your phone. Must be entered at the first security setting.                                             |

**Menu** →  → **Security**  
→ Select function.

## PIN Control

The PIN is usually requested each time the phone is switched on. You can deactivate this feature but you risk unauthorized use of the phone. Some service providers do not permit deactivating the control.

**Select** Press.

Enter PIN.

**OK**

Confirm input.

**Change**

Press.

**OK**

Confirm.

## Change PIN

You can change the PIN to any 4–8 digit number you find easier to remember.

Enter **current** PIN.

**OK**

Press.

**OK** Enter **new** PIN.

**OK** Repeat **new** PIN.

## Change PIN2

(display only if PIN 2 is available).  
Proceed as with **Change PIN**.

Menu →  → Security  
→ Codes

## Chg.Phonecode

You define and enter the phone code (4–8 digits) when you call up a phone-code protected function for the first time. It is then valid for all phone-code protected functions.

## Clear SIM card barring

If the PIN is entered incorrectly three times, the SIM card is barred. Enter the PUK (MASTER PIN), provided by your service provider with the SIM card, according to instructions. If the PUK (MASTER PIN) has been lost, please contact your service provider.

### Additional information

|--------------------------------|-------|
| Screensaver.....               | p. 75 |
| Keylock .....                  | p. 78 |
| Further security settings..... | p. 86 |

Change your phone to match your personal requirements.

## Ring tones

Assign individual ring tones to caller groups or for special dates (p. 77).

## Animations, screensavers, logos, applications

Adjust your phone in the following ways to give it a personal touch and make it just how you want it:

### Animations

Choose a start-up and closing animation (p. 75) as well as a personal greeting (p. 75).

### Screensaver

Choose an analog clock or a personal picture (p. 75).

### (Provider) logo

Choose an individual picture (p. 74) to be displayed in standby mode.

### Background image

Choose your own permanent background image (p. 74).

### Applications

Download your own applications from the Internet (p. 71).

### Color scheme

Choose a color scheme for the entire service system (p. 74).

## Where do I get what?

You can order additional ring tones, logos and screensavers on the Internet and receive them by SMS/MMS:

[www.my-siemens.com/ringtones](http://www.my-siemens.com/ringtones)

[www.my-siemens.com/logos](http://www.my-siemens.com/logos)

[www.my-siemens.com/screensaver](http://www.my-siemens.com/screensaver)

[www.my-siemens.com/animations](http://www.my-siemens.com/animations)

Or you can download them direct via WAP:

[wap.my-siemens.com](http://wap.my-siemens.com)

## Siemens City Portal

Further applications, games and services for your mobile phone (e.g. a Photo Logo Composer to create personal pictures for your Addressbook) can be found at:

[www.my-siemens.com/city](http://www.my-siemens.com/city)

The Siemens City Portal also provides a list of countries in which these services are available.

## Favorites

Create your own menu with frequently used functions, phone numbers or WAP pages (p. 93).

## Dialing with number keys

The phone must be switched on (standby mode) and the keypad must be open.

Enter number (always with area code, if necessary with international dialing code).

**Clear** A **short** press clears the last digit, a **long** press clears the entire phone number.

Press the Call key. The displayed phone number is dialed.

## End call

Press End key **briefly**. The call is ended. Press this key even if the person on the other end of the line has hung up first.

Or Close keypad.

## Set volume

Using the plus/minus side key (press top/bottom), adjust the volume (only possible during a call).

If a Car Kit is used, its volume setting will not affect the usual setting on the phone.

## Redial previous numbers

To redial the phone number **last** called:

Press Call key **twice**.

To redial other numbers that were dialed previously:

Press the Call key once.

Pick out the required phone number from the list, then press ...

... to dial.

## When the number is busy

If the number called is busy or cannot be reached because of network problems, several options are available (depending on the service provider). An incoming call or any other use of the phone interrupts these functions.

Either

### Automatic Redial previous numbers

**Auto Dial** Press. The phone number is automatically dialed ten times at increasing time intervals. End with:

①  End key.

Or

### Call back

**Call back** Press. Your phone rings when the busy number is free. Press the Call key to dial the number.

### Reminder

**Prompt** Press. A beep reminds you to redial the displayed phone number after 15 minutes.

## Accept call

The phone must be switched on (standby mode). An incoming call will interrupt any other use of the phone.

If the keypad is closed, press the soft key **Mute** to disable the ringer for the current call.

**Answer** Press.

Or

 Press.

Or Open keypad.

The phone number is displayed if transmitted by the network. If the caller's name appears in the Phonebook or Addressbook, this will appear instead of the number. If set, a picture can be displayed instead of the bell icon (p. 39).

### Warning!

Please make sure you have accepted the call before holding the phone to your ear. This will avoid damage to your hearing from loud ring tones!

## Reject call

### Reject

Press. The call will be forwarded if this has been set previously (p. 79).

Or

Press **briefly**.

Or

Close keypad.

### Additional information

|                                |        |
|--------------------------------|--------|
| Missed calls.....              | p. 44  |
| Accept call using any key..... | p. 78  |
| Switch off ringer .....        | p. 120 |

## Speakerphone

You can put the phone aside during a call. You can then hear the caller via the loudspeaker.

### Speaker.

Activate handsfree talking.

Yes

Switch on.

Use the plus/minus side key to regulate volume.

### Speaker.

Deactivate.

### Warning!

To avoid damage to hearing **always deactivate "handsfree talking"** before holding the phone to your ear! This will avoid damage to hearing!

You may notice a decrease in the overall talk/standby time depending on the amount of time the speakerphone is used.

**menu** Call menu .....p. 30

## Swap

### Establish a second connection

You can call another number during a call.

### menu

Open call menu.

Hold

The current call is put on hold.

Now dial the new number (Phonebook/Addressbook ).

When the new connection is established:

 **menu** Open call menu.

**Swap** Swap back and forth between the calls.

## • End current call

  End the current call and press **Yes**. You are now connected to the caller.

## • End both calls

Close keypad.

## Incoming calls during a call

During a call, you may be advised that there is another call waiting. You will hear a special tone during the call. You may need to register for this service with your service provider and set your phone accordingly (p. 79).

You have the following options:

## • Accept the waiting call

**Swap** Accept the waiting call and put the current call on hold. To swap between the two calls, proceed as above.

## End call

Press the End key . The following is displayed: "Return to call on hold?"

Accept the waiting call by pressing **Yes**.

Or

End the second call also by pressing **No**.

## • Reject waiting call

**Reject** Reject the waiting call.

Or

**Forward** The waiting call is forwarded, for example, to mailbox.

## • Accept the waiting call and end the current call

  End the current call.

**Answer** Accept new call.

## • End both calls

Close keypad.

## Multi Party

Call up to 5 parties one by one and link them together in a conference call. Some of the functions described may not be supported by your service provider or may have to be enabled specially. You have established a connection:

Open menu and select **Hold**. The current call is put on hold.

Now dial a new number. When the new connection is established ...

... Open menu and select **Multi Party**. The held call is joined.

Repeat procedure until all participants are linked together (up to 5 participants).

## End

**All** calls in the conference finish simultaneously when the End key is pressed.

**Or** Close keypad.

## Call menu

The following functions are only available during a call:

Open menu.

**Swap**

(p. 28)

**Hold**

(p. 28)

**Microphone**

Switch microphone on/off. If switched off, the person on the other end of the line cannot hear you (muting).

Also:  hold down.

**Speaker-phone**

(p. 28)

**Volume**

Adjust handset volume.

**Multi Party**

(See above)

**Send DTMF**

(p. 115)

**Durat/Charges**

Display call duration and (if set, p. 46) costs accruing during the connection.

**Call transfer**

The original call is connected to the second one. For you, both calls are now ended.

**Main Menu**

Access to main menu.

**Call Status**

List all held and active calls (e.g. conference call participants).

## Enter text without T9

Press number key repeatedly until the required letter appears. The cursor will jump forward after a brief interval. Example:

**Press briefly** once for **a**, twice for **b** etc. The first letter in each name is automatically written in upper case.

**Hold down** to write the number, in this case 2.

Ä,ä/1-9

Special letters and numbers are displayed after the relevant letters.

Clear

**Press briefly** to delete the letter before the cursor, **hold down** to erase the whole word.

Move the cursor (forwards/back).

**Press briefly:** Swap between **abc**, **Abc**, **T9abc**, **T9Abc**, **T9ABC**, **123**. Status shown in top line of display.

**Hold down:** All input modes are displayed.

**Press briefly:** Select special characters.

**Hold down:** Open input menu.

Press **once/repeatedly:**

.,?!' " 0 - ( ) @ / : \_

**Hold down:** Writes 0.

Writes blank. Press twice = jumps a line.

## Special characters

Press **briefly**. The symbols chart is displayed:

|    |   |   |   |   |   |   |   |   |    |   |
|----|---|---|---|---|---|---|---|---|----|---|
| 1) | ¿ | ¡ | — | ; | . | , | ? | ! | +  | - |
| "  | ' | : | * | / | ( | ) | ¤ | ¥ | \$ | £ |
| €  | @ | \ | & | # | [ | ] | { | } | %  | ~ |
| <  | = | > |   | ^ | § | Γ | Δ | Θ | Λ  | ≡ |
| π  | Σ | Φ | Ψ | Ω |   |   |   |   |    |   |

1) Line skip

Navigate to character.

Select

Press.

## Input menu

With text input:

**Hold down.** The input menu is displayed:

**Text Format** (SMS only)

**Input language**

**Mark Text**

**Copy**

## Text input with T9

"T9" deduces the correct word from the individual key entries by making comparisons with an extensive dictionary.

### Activate, deactivate T9

**Options** Open text menu.

**T9 Input** Select.

**T9 Preferred**

Select.

**Change** Activate T9.

### Select Input language

Select the language in which you want to compose your message.

**Options** Open text menu.

**T9 Input** Select.

**Input language**

Select.

**Select** Confirm, the new language is set. Languages with T9 support are marked by the T9 symbol.

#### T9 language versions

If you want to load a dictionary in another language, you will find a large selection to download from the Internet as well as installation instructions under:

[www.my-siemens.com/t9](http://www.my-siemens.com/t9)

## Write a word using T9

Since the display changes as you proceed

**it is best if you finish a word without looking at the display.**

Simply press the keys **once only** where the relevant letter is located. For "hotel", for example:

 press briefly for **T9Abc** then type

 Press. A blank ends a word.

Do not use special characters such as Ä but write the standard character, e.g. A; T9 will do the rest for you.

#### Additional information

 Entering a period finishes a word, if it is followed by a blank. Within a word, a period represents an apostrophe or hyphen:

e.g. **provider.s** = provider's.  
Go to the right: Ends the word.

**Press briefly:** Swap between **abc, Abc, ABC, T9abc, T9Abc, T9ABC, 123**. Status shown in top line of display.

**Hold down:** All input modes are displayed.

**Press briefly:** Select special characters (p. 31).

**Hold down:** Open input menu (p. 31).

## T9 word suggestions

If several options are found in the dictionary for a key sequence (a word), the most probable is displayed first. If the word you want has not been recognized, the next suggestion from T9 may be correct.

The word must be **highlighted**. Then press

again. The displayed word is replaced with a different word. If this word is also incorrect,

press again. Repeat until the correct word is displayed.

If the word you want is not in the dictionary, it can also be written without T9.

To add a word to the dictionary:

**Spell** Select.

The last suggestion is deleted and the word may now be entered without T9 support. Press **Save** to add it automatically to the dictionary.

## Correct a word

Words written **with** T9:

Move left or right, word by word, until the required word is **highlighted**.

Scroll through the T9 word suggestions again.

Deletes the character to the left of the cursor **and** displays a new possible word!

Words **not** written with T9:

Move letter by letter to the left/right.

Deletes the letter to the left of the cursor.

Letters are inserted at the cursor position.

### Additional information

Within a "T9 word", individual letters may not be edited without first removing T9. In most cases it is better to rewrite the complete word.

## Text Modules

Text modules can be stored in the phone for adding to your SMS messages.

### Write text modules

**Menu** →  → Text Modules

**Options**    Select **New Text**.

Write text module.

**Options**    Select **Save**.

Accept the default name  
or give it a new name,  
then save with **OK**.

### Use text modules

Write message.

**Options**    Open text menu.

Select **Text Modules**.

Select text module from  
the list.

**Select**    Confirm. The text module  
is displayed.

**Select**    Confirm. The text module  
is inserted in the message  
to the right of the cursor.

Menu

→ Select function.

## Show Entries

Entries in the standard directory (Addressbook or Phonebook) are shown for selection.

Select a name with the first letter and/or scroll.

The number is dialed.

## <New Entry>

Create new entry in standard directory.

**Phonebook** (see p. 36)

**Addressbook** (see p. 39)

## Default Book

Select either Phonebook or Addressbook as your standard directory. Your preference should be for the Addressbook, because more entries and functions (e.g. pictures, birthdays, several phone numbers per entry, etc.) are possible.

Select **Phonebook** or **Addressbook**.

**Select**

Set as standard.

## Groups

(see p. 43)

## Businesscard

Create your own business card. Send this by SMS or infrared to another GSM phone or to a suitable PC/printer.

If no business card has been created yet, you will be asked for your input.

Move from field to field to put in your details. You will find explanations of these input fields on p. 39 and p. 40.

|               |           |
|---------------|-----------|
| Last name:    | E-mail 2: |
| First name:   | URL:      |
| Phone:        | Company:  |
| Phone/office: | Street:   |
| Phone/mobile: | ZIP code: |
| Fax:          | City:     |
| Fax 2:        | Country:  |
| E-mail:       | Birthday: |

**Save**

Press.

### Additional information

The content of the business card corresponds to international standards (vCard).

Copy numbers from Addressbook/Phonebook.

**Options**

See Addressbook menu, (p. 41).

## Service numbers

(see p. 119)

Entries in the Phonebook (on the SIM card) are managed separately from those in the Addressbook. You can however exchange data between the Phonebook and the Addressbook.

## <New Entry>

If the Phonebook is set as standard (Addressbook as standard, p. 35):

Open Phonebook (in standby mode).

<New Entry> Select.

**Select**

Press.

Select input fields.

Fill in the input fields described below. The maximum number of letters available is displayed at the top of the screen.

## Number:

Always enter phone number with prefix.

## Name:

Enter first and/or last names.

## Location:

Default: **SIM**

Select the storage location such as **SIM** or **Protected SIM** (p. 38).

## Record no.:

Each entry is automatically assigned a record number. You can also dial using the record number (p. 37).

Change the record number.

**Save**

Press to store the new entry.

### Additional information

Temporary swap to Addressbook ..... p. 39

**+List** International dialing code .... p. 117

Store control codes ..... p. 115

Text entry ..... p. 31

#### <Special Books>:

<Own numbrs>: Enter personal phone numbers (p. 118), <VIP Numbers>: Assign important phone numbers to group, <SIM Phonebook> (p. 38), <Protected SIM> (p. 38), <Service Numb.> (p. 119).

## Call (search for an entry)

Open Phonebook.

Select a name with the first letter and/or scroll.

Number is dialed.

## Call using record no.

A record number is automatically assigned to every new entry in the Phonebook.

Enter record number.

Press.

Press.

## Change entry

Select entry in Phonebook.

### Options

Press and select **Edit**.

Select input field.

Edit.

### Save

Press.

## Phonebook menu

The following functions are available, depending on the current situation. Some functions may be applied to the current entry as well as multiple highlighted entries:

### Options

Open menu.

|                      |                                                                             |
|----------------------|-----------------------------------------------------------------------------|
| <b>View</b>          | Display entry.                                                              |
| <b>Edit</b>          | Open the entry to edit.                                                     |
| <b>New Entry</b>     | Create new entry.                                                           |
| <b>Copy Into</b>     | Copy new entry/entries into Address book.                                   |
| <b>Copy All to</b>   | Copy all entries into Address book.                                         |
| <b>Delete</b>        | Delete entry.                                                               |
| <b>Delete All</b>    | Delete all entries after confirmation.                                      |
| <b>Mark</b>          | Activate selection mode, the entry currently selected is selected (p. 117). |
| <b>Mark All</b>      | Activate selection mode, all entries are selected (p. 117).                 |
| <b>Send/Print...</b> | (p. 114)                                                                    |
| <b>Import</b>        | Import entries and appointments via IrDA in vCard format.                   |
| <b>Capacity</b>      | Display maximum and available capacity.                                     |

## Location:

An entry can be moved from one storage location to another.

### **SIM (Standard)**

Entries stored in the Phonebook on the SIM card can also be used on other GSM phones.

### **Protected SIM**

Phone numbers can be stored in a protected location on a special SIM card. The PIN 2 is needed for editing (p. 23).

Activate with the function **Only**  (p. 86).

The Addressbook can store up to 500 entries, each with a variety of telephone and fax numbers as well as additional address details. These entries are managed separately from those in the Phonebook in the phone memory. However you can exchange data between the Addressbook and the Phonebook on the SIM card.

## <New Entry>

If the Addressbook has been selected as standard:

Open Addressbook (in standby mode).

**Select**

Press.

Enter first and/or last name.

**Group**

Entries can be organized by groups (p. 43). Select with **Change**.

Make further entries field by field.

|                         |           |
|-------------------------|-----------|
| Phone:                  | Company:  |
| Phone/office:           | Street:   |
| Phone/mobile:           | ZIP code: |
| Fax:                    | City:     |
| Fax 2:                  | Country:  |
| E-mail:                 | Birthday: |
| E-mail 2:               | Reminder: |
| URL: (Internet address) | Picture:  |
| Group:                  |           |

Picture

**Select** Assign an individual picture to an Addressbook entry. It is displayed if you are called by the corresponding phone number (see p. 112).

All fields

**Select** Show all input fields if the display was previously reduced (see p. 41, Addressbook menu, **Field Setup**).

**Save**

Save the entry.

**Additional information**

<Groups> Group functions (p. 43).

**Birthday** After entering the date of birth, the "reminder box" can be activated. Now you can enter the date and time of the reminder in the organizer calendar.

Copy data from another Addressbook entry.

The phone is ready to receive multiple vCard entries via IrDA (p. 114).

Copy international dialing code from the list (p. 117).

Temporarily switch to Phonebook.

**Synchronizing with a PC**

Using XTNDConnect® PC (p. 123) you can synchronize your Addressbook with Outlook® or Lotus Notes™.

Using **Remote Sync**, you can synchronize your mobile with an organizer stored on the Internet (p. 108).

**Read/change an entry**

Open Addressbook (in standby mode).

Select required entry.

Press.

Select input field.

Open entry.

Make changes.

**Options** See p. 41.

Save setting.

**Right soft key:**

When you jump from line to line while reading, the right soft key changes depending on the type of data. Press this key to activate the relevant application:

**VoiceDial** Voice dialing menu.(p. 42).

**E-mail** Create e-mail. (p. 59).

**Link** Visit URL (p. 68).

**Show** Display respective picture.

## Call, search for an entry

Open Addressbook (in standby mode).

Select a name with the first letter and/or scroll.

The number is dialed.

If an Addressbook entry has several numbers stored:

Select phone number.

The number is dialed.

## Addressbook menu

Depending on the actual situation, different functions will be offered. These functions can be applied to the entry currently selected as well as to multiple selected entries:

**Options** Open menu.

|                    |                          |
|--------------------|--------------------------|
| <b>View</b>        | Display entry.           |
| <b>Edit</b>        | Open the entry to edit.  |
| <b>New Entry</b>   | Create new entry.        |
| <b>Move to ...</b> | Assign entry to a group. |

|                      |                                                                                                                                                                                                              |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Copy to SIM</b>   | Copy entry/entries with name and selected phone number to SIM card.                                                                                                                                          |
| <b>Delete</b>        | Delete entry.                                                                                                                                                                                                |
| <b>Delete All</b>    | Delete all entries after confirmation.                                                                                                                                                                       |
| <b>Mark</b>          | Switch on highlighting mode (p. 117).                                                                                                                                                                        |
| <b>Mark All</b>      | Activate highlighting mode, all entries are highlighted (p. 117).                                                                                                                                            |
| <b>Filter</b>        | Display only those Addressbook entries with the following criteria: <ul style="list-style-type: none"> <li>• Voice dialing</li> <li>• E-mail</li> <li>• URL</li> <li>• Birthday</li> <li>• Bitmap</li> </ul> |
| <b>Business-card</b> | Define an entry as your <b>own</b> business card.                                                                                                                                                            |
| <b>Voice dialing</b> | Apply voice dialing to an entry (p. 42).                                                                                                                                                                     |
| <b>Send/Print...</b> | (p. 114)                                                                                                                                                                                                     |
| <b>Import</b>        | Import entries via IrDA™ in vCard format.                                                                                                                                                                    |
| <b>Capacity</b>      | Display maximum and available capacity.                                                                                                                                                                      |
| <b>Field Setup</b>   | Select input fields for new entry.                                                                                                                                                                           |

## Voice dialing

Dial numbers by voice command. Up to 20 recorded names for voice dialing or voice commands (p. 107) can be saved on the cell phone (not on the SIM card).

### Record

Open Addressbook (in standby mode).

Select a name with the first letter and/or scroll.

### Options

Open menu.

### Voice dialing

Select.

Choose phone numbers, if there are more than one.

### Record

Press.

### Start

Start recording.

A short signal sounds. Now speak the name. After a second beep and message in the display, **repeat** the name. A beep now confirms the recording, which is saved automatically.

## Voice dialing menu

Depending on the actual situation, different functions will be offered.

### Options

Open menu.

### Play

Play back a voice command.

### New

Record a new voice command.

### Delete

Delete voice command from an entry.

### Delete All

After confirmation delete all voice commands for this entry.

## Apply voice dialing

**Hold down** the **plus/minus** side key (in standby mode).

Now say the name. The number is dialed.

### Additional information

Noisy environments may affect voice recognition. If attempt was unsuccessful, press the side key once more and repeat the name.

9 groups are specified in your phone, to enable you to arrange your Addressbook entries clearly. You can rename seven groups.

Open Addressbook (in standby mode).

**<Groups>** Select (the number of entries is listed behind the group name).

Select group.

**Options** Open menu.

#### Rename Group

Select and give group a name.

#### Additional information

**No Group:** Contains all Addressbook entries that do not belong to a group (name cannot be changed).

**Received:** Contains vCard Addressbook entries received by IrDA or SMS (name cannot be changed).

SMS to group ..... p. 49

## Group menu

**Options** Open menu.

**Open** Display all members of the selected group.

**View** Addressbook p. 40.

**Options** See p. 41

**Group Symbol** Assign a symbol to a group, see below.

**Rename Group** Change name of group.

**Move** Transfer one or more highlighted entries from one group to another.

**Delete All** After confirmation, delete all members of the current group.

## Group Symbol

Assign to a group a symbol that appears on the display when one of its members calls you.

Select group.

**Options** Open menu.

**Group Symbol** Select.

Choose a symbol.

**OK** Confirm.

Your phone stores the phone numbers of calls for convenient redialing.

**Menu** → 

**Select** Press.

Select call list.

**Select** Press.

Select phone number.

Dial phone number.

Or

**View** Display information on the phone number.

10 phone numbers can be stored in each call list:

### Missed Calls

The phone numbers of calls that you have received but not answered are stored for call back purposes.

Icon for missed call (in standby mode). Press the control key (on the left) to display phone number.

Requirement: The network supports the "Caller Identity" feature.

### Received Calls

Accepted calls are listed.  
Requirement:

The network supports the "Caller Identity" feature.

### Dialed Calls

Access to the last numbers dialed.

Fast access in standby mode.

### Clear Log

The contents of all call lists are deleted.

### Call list menu

The call list menu can be called up if an entry is highlighted.

**Options** Open list menu.

| View                                                                                               | View entry.                                         |
|----------------------------------------------------------------------------------------------------|-----------------------------------------------------|
| <b>Correct No.</b>                                                                                 | Load number to display and edit there if necessary. |
| <b>Copy Into</b>  | Store entry in the Address-book/Phonebook.          |
| <b>Delete</b>                                                                                      | Delete entry after confirmation.                    |
| <b>Delete All</b>                                                                                  | Delete all entries in call list after confirmation. |

**Menu** →  → **Msg. Setup**  
→ **Voice Message**

Most service providers supply an external voice mail service. A caller may leave a voice message for you in this mailbox

- if your phone is switched off or not ready to receive,
- if you do not want to answer,
- if you are making a phone call (and **Call Waiting** is not activated, p. 79).

If voice mail is not part of your service provider's package, you will need to register and settings may have to be made manually. The following description may vary slightly, depending on the service provider.

## Settings:

The service provider supplies you with two phone numbers:

### Save mailbox number

Call this phone number to listen to the voice mails left for you.

**Menu** →  → **Msg. Setup**  
→ **Voice Message**

 Select number from Phonebook/Addressbook or enter/change it.

**OK** Confirm.

### Save call forward number

Calls are forwarded to this phone number.

**Menu** →  → **Phone Setup**  
→ **Call Forward**  
→ e. g. **Unanswered** → **Set**

Enter call forward number.

**OK** Registration with network. Forward will be confirmed after a few seconds.

Further information on call forward can be found on p. 79.

## Listen to

A new voice mail can be announced as follows, depending on the service provider:

Icon plus beep.

Or

A text message announces a new voice mail.

Or

You receive a call with an automatic announcement. Call your mailbox and play the message(s) back.

Hold **down** (if necessary enter mailbox number once only). Confirm with **OK** or **Mailbox** depending on your service provider.

Away from your home network you may have to dial a different mailbox number and enter a password before you can listen to any messages.

You can display charge details and the duration of different types of calls while you speak, as well as setting a unit limit for outgoing calls.

**Menu** →  → **Durat/Charges**

Select type of call:

**Last Call**

**All Calls**

**Remain. units**

**Select** Display the data.

Once displayed you can:

**Reset** Clear display.

**OK** End display.

## Charge Setting

**Menu** →  → **Durat/Charges**  
→ **Charge Setting**

**Conv.**

(PIN 2 prompt)

Enter the currency in which the charge details are to be shown.

**Personal Rate**

(PIN 2 prompt)

Enter the charges per unit/period.

**Acct. Limit**

(PIN 2 prompt)

Special SIM cards allow you or the service provider to define a credit or a period after which the phone is barred for outgoing calls.

**Change** Press, enter PIN 2.

**Acct. Limit** Activate.

Enter number of units.

**OK** Confirm.

Then confirm the credit or reset the counter. The status display for pre-paid cards may vary, depending on the service provider.

**Auto Display**

Call duration and call charges are automatically displayed for each call.

You can transmit and receive very long messages (up to 760 characters) on your phone. These are automatically composed of several "normal" SMS messages (note higher charges).

Additionally you can insert pictures and sounds in an SMS.

Depending on the service provider, e-mails and faxes can also be sent - and e-mails received via SMS (change setting if necessary, p. 63).

## Writing and sending text messages (SMS)

**Menu** → → New SMS

Text input using "T9" (p. 31) allows you to create longer messages very quickly using just a few key strokes.

**Clear** Press **briefly** to delete letter by letter, hold **down** to delete an entire word.

Press.

Dial number or pick out from the Phonebook/Addressbook.

**Groups** SMS to group (p. 49).

**OK**

Confirm. Send the SMS to the service center for transmission. The sent SMS is saved in the "Sent" list.

**OK**

Return to Edit mode.

**Display in the uppermost line:**

Abc SMS 1 747  
We start at 8

Abc  
abc/Abc/  
ABC/123

T9 active.

Switch between upper-case/lower-case letters and digits.

SMS

Display title.

1

Number of SMS messages required.

747

Number of characters still available.

| <b>Print via IrDA</b>     | Send SMS message to a suitable printer.                                                                                                      |
| <b>Send via ...</b>       | Select an SMS profile for transmission (p. 63).                                                                                              |

## Picture&Sound

Insert pictures and sounds into message.

Write message.

**Options** Open text menu at the end of a word.

Select **Picture&Sound**.

The menu contains:

**Fix animations**

**Fix sounds**

Select section.

**Select** Confirm.

The first entry of the selected section is displayed.

Scroll to entry required.

When **Fix animations/Fix sounds**:

**Select** the selection is added to the SMS.

### Additional information

Playback only occurs if the destination phone supports the EMS standard (p. 116).  
 In input mode, when sound is selected, it is shown as a bell.

## SMS to group

You can send an SMS message as a "circular" to a recipient group.

**Options** Open menu.

**Send** Select.

**Groups** Press. The Addressbook is opened in highlighting mode (p. 117). There are the following options:

- Highlight individual entries.
- **<Groups>** Select, open a group and highlight individual entries/all entries there.
- **<Groups>**Select. Select a group.

**Send** Press. The first of the highlighted recipients is displayed. If this recipient has several phone numbers, one number can be selected.

**Skip** Skip recipient.

**Send** Transmission is started after confirmation.

## Read SMS

Display indicates a new SMS.

Press the left soft key to read SMS message.

Date/time  
Tel. no./sender  
Message

Scroll through message line by line.

**Reply**

See below.

**Options**

see p. 51.

### Additional information

Pictures and sounds in SMS ..... p. 48

Message memory full ..... p. 118

Use **highlighted** phone number/  
e-mail address/WAP address..... p. 119

## Reply menu

**Reply** Open reply menu.

|                    |                                            |
|--------------------|--------------------------------------------|
| Write mess.        | Create a new reply text.                   |
| Edit               | Edit received SMS or add new text.         |
| Answer is YES      | Add YES to the SMS.                        |
| Answer is NO       | Add NO to the SMS.                         |
| Call back<br>Delay | Add a standard text as a reply to the SMS. |
| Thank you          |                                            |

When the SMS has been edited in the edit mode, it can be saved or sent with **Options**.

## Ring tones, icons ...

You can receive ring tones, icons, screensavers, animations and information on applications (p. 72) with an SMS in which a link is displayed. Please highlight this link and, by pressing the Call key , start the download.

Please ensure that the HTTP profile (p. 73) and the connection (p. 84) are configured.

## Lists

All SMS messages are archived in four different lists, according to their status:

### Inbox

**Menu** →  → **Inbox** → **SMS**

The list of received SMS messages is displayed.

### Drafts

**Menu** →  → **Draft** → **SMS**

The list of not yet transmitted SMS messages is displayed.

### Unsent

**Menu** →  → **Unsent** → **SMS**

The list of concatenated SMS messages not yet completely sent is displayed. Transmission can be restarted.

### Sent

**Menu** →  → **Sent** → **SMS**

The list of sent SMS messages is displayed.

## Lists menu

Each list offers different functions:

**Options** Open menu.

|                                                                                                     |                                                                                                    |
|-----------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------|
| <b>View</b>                                                                                         | View entry.                                                                                        |
| <b>Reply</b>                                                                                        | Directly answer incoming SMS messages.                                                             |
| <b>Delete</b>                                                                                       | Delete selected SMS messages.                                                                      |
| <b>Delete All</b>                                                                                   | Delete all SMS messages after confirmation.                                                        |
| <b>Send</b>                                                                                         | Dial number or select from the Phonebook, then send.                                               |
| <b>Edit</b>                                                                                         | Open SMS message to edit.                                                                          |
| <b>Capacity</b>                                                                                     | Display free capacity on SIM card/phone. In case of segments: number of concatenated SMS messages. |
| <b>Set as Unread</b>                                                                                | Mark message as unread.                                                                            |
| <b>Save No.to</b>  | Copy a highlighted phone number to Phone/Address-book.                                             |
| <b>Archive</b>                                                                                      | Move SMS message to archive.                                                                       |
| <b>Print via IrDA</b>                                                                               | Send SMS message to a suitable printer.                                                            |
| <b>Send via ...</b>                                                                                 | Select an SMS profile for transmission (p. 63).                                                    |

## Archive

**Menu** →  → SMS Archive

The list of SMS messages stored in the phone is displayed.

|                                                                                   |                       |
|-----------------------------------------------------------------------------------|-----------------------|
|  | Unread                |
|  | Read                  |
|  | Draft                 |
|  | Sent                  |
|  | Entry on SIM card.    |
|  | Concatenated message. |

Different functions are available, depending on context:

## Archive menu

**Options** Open menu.

|                                                                                                       |                                                        |
|-------------------------------------------------------------------------------------------------------|--------------------------------------------------------|
| <b>View</b>                                                                                           | View entry.                                            |
| <b>Send</b>                                                                                           | Dial number or select from the Phonebook, then send.   |
| <b>Edit</b>                                                                                           | Open edit mode for changes.                            |
| <b>Save No.to</b>  | Copy a highlighted phone number to Phone/Address-book. |

|                       |                                                                           |
|-----------------------|---------------------------------------------------------------------------|
| <b>Paste</b>          | Transfer content of temporary memory to current folder.                   |
| <b>Delete</b>         | Delete current entry.                                                     |
| <b>Delete All</b>     | Delete all entries.                                                       |
| <b>Mark</b>           | See highlighting mode (p. 117).                                           |
| <b>Mark All</b>       | All entries highlighted, see highlighting mode (p. 117).                  |
| <b>New Folder</b>     | Create a new folder and give it a name (only one folder depth available). |
| <b>Rename</b>         | Change highlighted entry.                                                 |
| <b>Print via IrDA</b> | Send SMS message to a suitable printer.                                   |
| <b>Sort</b>           | Set sort criteria (alphabetical, type, time).                             |
| <b>Attributes</b>     | Display information on file or folder selected.                           |
| <b>Drive Info</b>     | Display the capacity used and available.                                  |

For further services, see **File Manager**, p. 112.

The **Multimedia Messaging Service** enables you to send texts, pictures (also photos) and sounds in a combined message to another mobile phone or to an e-mail address. All elements of an MMS message are merged to form a "slide show".

Depending on your phone's settings, you will receive either the complete message automatically or notification that an MMS has been saved in the network, giving sender and size details. You may then download it to your phone to read it.

Ask your service provider whether this service is available. You may need to register for this service separately.

## Writing/sending MMS messages

An MMS consists of the address header and the content.

An MMS message can consist of a series of pages, each one of which may include a combination of text, sounds and pictures.

**Texts** can be written with the help of T9 (p. 31).

**Pictures** and **graphics** that have been produced with accessories such as digital cameras can be attached in JPEG, WBMP, GIF or GIF format. See also **File Manager**, p. 112.

**Music** is sent and received in a MIDI file, single tones/sounds in an AMR file. Up to 48 KB can be played back.

### Navigation

Scroll line by line with the control key.

Scroll page by page with the plus/minus side key, by pressing top/bottom.

**Menu** →  → **New MMS**

### Input fields:

**To:**  /  Phone number/  
e-mail address of recipient(s).

Notification unread

Notification read

Your phone has an e-mail program (client). You can use it to create and receive e-mails.

The content received in an e-mail is saved in the File Manager in one of the MyDataSub folders.

The content used to create an e-mail has to come from the MyData folder in the File Manager.

## Write/send e-mails

**Menu** → → New E-mail

### Enter e-mail address

**To:** E-mail address of recipient(s).

**Cc:** E-mail address for the copy recipient.

**Bcc:** E-mail address for blind copy recipients (the other recipients are not shown the Bcc recipient).

**Attach.:** See below.

Press **briefly** to write special characters such as @ (p. 31).

T9 helps you write e-mails (p. 31).

**Subject:** Enter e-mail heading (up to 200 characters).

**Content:** Enter text.

**Options**

Open menu.

**Send**

Send e-mail.

### Add attachments

A file from the file system (e.g. ring tone) can be inserted in an e-mail as an attachment (p. 112).

**Attach.**

Open file system.

Select file to be inserted.

**Mark**

Highlight file.

**OK**

Copy file as an attachment.

### E-mail editor menu

**Options**

Open menu.

**Insert Line**

Extend address field by one line.

**Delete Line**

Delete line in address field.

**T9 Input**  
(p. 31)

**T9 Preferred:** Activate/deactivate T9.

**Input language:** Select language for text.

**Insert From...**

Insert entry from Phone-book/Addressbook.

**Attach.**

(see above).

**Save**

Save in draft list.

**Send**

Establish connection with server and send e-mail. If necessary, select different access (p. 84).

**Send Later**

Transfer to outbox list to be sent later.

## Receive e-mail

**Menu** →  → Inbox  
→ Receive E-mail

Before an e-mail can be read, it must be retrieved from the server. The service provider is dialed with the default access profile (p. 84) and all e-mails are transmitted to the inbox list.

### Additional information

The e-mail client always receives complete messages including header, content and, if applicable, attachments. You can restrict the size of the received messages (p. 65).

A maximum of 50 e-mails can be stored in the phone. E-mail size is limited to 99 KB.

### Synchronizing with a PC

With XTNDConnect® PC (p. 123) you can synchronize your incoming/outgoing e-mails with Outlook® or Lotus Notes™.

## Read new e-mail

**Menu** →  → Inbox → E-mail

Select e-mail.

**View**

The e-mail is displayed.

Switch between small, normal and large font sizes.

Scroll line by line with the control key.

Scroll page by page with the plus/minus side key, by pressing top/bottom.

The left soft key offers different functions depending on which text area you have selected:

E-mail addresses/phone numbers in the message are **highlighted** and can be stored in the Address-book.

 Dial phone number or start new e-mail.

**Save**

Save attachment (e.g. bitmap).

**Reply**

Reply to sender.

**Link**

Start WAP browser and visit URL (p. 69).

| E-mail                                                                             | with attachment                                                                     | Meaning |
|------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|---------|
|    |    | Unread  |
|   |   | Read    |
|  |  | Draft   |
|  |  | Sent    |

## Read menu

**Options** Open menu.

|                     |                                                                                                                   |
|---------------------|-------------------------------------------------------------------------------------------------------------------|
| <b>Reply</b>        | The original e-mail is retrieved. The sender is entered as recipient and can be changed as can the header and CC. |
| <b>Reply to all</b> | As above, but all recipients are listed in the "Send to" field.                                                   |
| <b>Forward</b>      | The original e-mail is retrieved. Enter the new recipient to whom it should be forwarded.                         |
| <b>Change</b>       | To edit, open e-mail in edit mode.                                                                                |
| <b>Delete</b>       | Delete selected e-mail.                                                                                           |
| <b>Delete All</b>   | Delete all e-mails in the inbox or outbox.                                                                        |
| <b>Font size</b>    | Select font size.                                                                                                 |
| <b>Save attach.</b> | The attachment is stored in the file system (File Manager, p. 112).                                               |

## Lists

All e-mails are stored in four different lists:

### Inbox

**Menu** →  → **Inbox** → **E-mail**

The list of received e-mails is displayed.

Select e-mail.

### View

The e-mail is displayed for reading.

### Draft

**Menu** →  → **Draft** → **E-mail**

The list of draft e-mails is displayed.

### Unsent

**Menu** →  → **Unsent**  
→ **E-mail**

The list of not yet transmitted e-mails is displayed.

**Menu** →  → **Unsent**  
→ **Send E-mail**

Send all e-mails queued for transmission to the server.

**Menu** →  → **Unsent**  
→ **Snd/Rec. Mail**

Transmit all e-mails queued for transmission to the server and receive all new e-mails from the server.

## Sent

**Menu** →  → **Sent** → **E-mail**

The list of transmitted e-mails is displayed.

## Lists menu

Each list offers different functions:

**Options**    Open menu.

| <b>View</b>         | (p. 60)                                                                                                           |
| <b>Change</b>       | Edit e-mail.                                                                                                      |
| <b>Reply</b>        | The original e-mail is retrieved. The sender is entered as recipient and can be changed as can the header and CC. |
| <b>Reply to all</b> | As above, but all recipients are listed in the "Send to" field.                                                   |
| <b>Forward</b>      | The original e-mail is retrieved. Enter the new recipient to whom it should be forwarded.                         |
| <b>Delete</b>       | Delete selected e-mail in phone.                                                                                  |
| <b>Delete All</b>   | Delete all e-mails in phone.                                                                                      |

### Sort

#### Sort

- by subject
- by sender
- by recipient
- by date/time
- by status

Not all sort criteria are possible in all lists.

### Send E-mail

Establish connection with server and send e-mails.

### Receive E-mail

Establish connection with server and receive incoming e-mails.

### Snd/Rec. Mail

Establish connection with server, send e-mails and receive incoming e-mails.

## SMS profile

**Menu** →  → Msg. Setup → SMS

Up to 5 SMS profiles can be set. The transmission characteristics of an SMS are defined in these. The pre-setting depends on the SIM card inserted.

Select profile.

**Options** Open menu.

**Change Sett.**  
Select.

**Service Center** Enter or change the service-center phone numbers as supplied by service provider.

**Recipient** Enter the standard recipient for this transmission profile or select from Phonebook.

**Message type** **Manual**  
The message type is requested for each message.  
**Standard text**  
Normal SMS message.  
**New**  
You may need to obtain the required code number from your service provider.

**Validity period** Select the period in which the service center is to try to deliver the message:  
**Manual, 1 hour, 3 hours, 6 hours, 12 hours, 1 day, 1 week, Maximum**  
\*) Maximum period that the service provider permits.

**Status Report**

You will receive confirmation whether delivery of a message has been successful or unsuccessful. This service may be subject to a charge.

**Direct Reply**

The reply to your SMS message is handled via your service center when Direct Answer is activated (for information please contact your service provider).

**SMS via GPRS**

Send SMS automatically by GPRS (if available).

Requirement: GPRS is activated (p. 83). Ensure that your service provider offers this function.

**Send & Save**

Sent SMS messages are saved in the **Sent** list.

## Activate profile

Select profile.

**Activate**

Press to activate profile.

## MMS profile

**Menu** → → Msg. Setup → MMS

A number of MMS profiles can be selected. The transmission characteristics of an MMS are defined in these.

Select profile.

**Options** Open menu.

**Change Sett.**  
Select.

**Expire Time** Select the period in which the service center is to try to deliver the message:

Manual, 1 hour, 3 hours, 6 hours, 12 hours, 1 day, 1 week, Maximum\*, New

\*) Maximum period that the service provider permits.

**Def. Priority** Send priority: Normal, High, Low

**Def. Duration** Length of display for an MMS page (standard requirement).

**Retrieval** Receive complete MMS or only notification of arrival.

### Automatic

Receive complete MMS immediately.

### Auto.homenet

Receive complete MMS immediately in home network

### Manual

Only the notification is received.

**MMS RelaySrv.** MMS relay URL, e.g.  
<http://www.webpage.com>

**IP Settings** **IP address:** Enter IP address.  
**Port:** Enter port number.  
**2nd IP address:** Enter IP address.  
**2nd Port:** Enter port number.  
These settings can be different from those of the WAP browser.

**Conn.pro-file:** Select or set access profile (p. 84).

## Activate profile

Select profile.

**Activate**

Press to activate profile.

## E-mail settings

**Menu** →  → **Msg. Setup**  
→ **E-mail**  
→ Select function.

Before using this service, you must set the server access and your e-mail options. The data for these may already have been entered. If not, your service provider will supply you with the relevant information. See also on the Internet at:

[www.my-siemens.com/sl56](http://www.my-siemens.com/sl56)

### Additional information

Your service provider must support the following protocols for successful data exchange with the e-mail server:

POP3, IMAP4 and SMTP or eSMTP.

E-mails will be MIME-encoded for transmission.

Encryption of e-mail transmission (SSL, APOP) is not possible at present.

## Accounts

5 accounts can be defined. If no access data have been defined for the account, the entry card is displayed.

Alternatively:

**Options** Press.

**Change Sett.**

Select, then:

### User settings

|                        |                                            |
|------------------------|--------------------------------------------|
| <b>Provider</b>        | Select provider.                           |
| <b>User name:</b>      | Your name.                                 |
| <b>E-mail addr.: *</b> | Your e-mail address, e.g.: name@domain.abc |
| <b>Reply-t.addr.:</b>  | Additional e-mail address for replies.     |
| <b>User ID: *</b>      | Your user ID.                              |
| <b>Password: *</b>     | Your password.                             |

\*Your service provider will supply you with this information.

### Mail settings

|                                                               |                                                              |
|---------------------------------------------------------------|--------------------------------------------------------------|
| <b>Downl. only mails smaller than</b><br><b>&lt;10&gt; KB</b> | Set maximum size for incoming e-mails.                       |
| <b>Leave copy on server?</b>                                  | E-mails remain on the server after they have been retrieved. |
| <b>Types</b>                                                  | POP3 or IMAP4.                                               |
| <b>POP3 server: *</b>                                         | Enter Internet address if the server type is POP3 and SMTP.  |

|                  |                                                                     |
|------------------|---------------------------------------------------------------------|
| POP3 Port: *     | (Default: 110)                                                      |
| IMAP4 *          | Enter Internet address if the server type is IMAP4 and SMTP.        |
| IMAP4 Port: *    | (Default: 143)                                                      |
| SMTP server: *   | Enter Internet address.                                             |
| SMTP port: *     | (Default: 25)                                                       |
| SMTP Authentic.: | Authentication: Yes/No                                              |
| SMTP Password:   | A user password will be required if "Authentication" is set to Yes. |

\*Your service provider will supply you with this information.

Save and activate settings.

## Gen. Setting

Enter the preset default of an e-mail address for blind-copy recipient (Bcc).

## Activate profile

Select profile.

Press to activate profile.

**Menu** →  → **Msg. Setup**  
→ **CB Services**

Some service providers offer information services (info channels, cell broadcast). If reception is activated, your "Topic List" will supply you with messages on the activated topics.

### **Broadcast**

You can activate and deactivate the Cell Broadcast (CB) service. If the CB service is activated, standby time for the phone will be reduced.

### **Read New CB**

All unread CB messages are displayed.

### **Topic List**

Add an unrestricted number of topics to this personal list from the topic index (**Topic Index**). You can preset 10 entries with their channel number (ID) and, if necessary, their names.

**New Topic** Select.

- If no topic index (**Topic Index**) is available, enter a topic with its channel number and confirm with **OK**.
- If the topic index has already been transmitted, select a topic and confirm with **OK**.

**Channel:** Select

**Options** Open list menu.

If a topic is selected in the list you can view it, activate/deactivate it, edit it or delete it.

### **Auto Display**

CB messages are displayed in standby mode, longer messages are scrolled automatically. This display can be activated/deactivated for all or only new messages.

For "full page view":

press , then **View CB**.

### **Topic Index**

The list of topics is displayed for you to choose from. If nothing is displayed, you must enter the channel numbers (ID) manually (**Topic List**). Please contact your service provider for details.

### **CB Languages**

Receive Cell Broadcast messages in only one specific language or in all languages.

#### **Displays**

Topic activated/deactivated.

New messages received on the topic.

Messages already read.

## Internet browser (WAP)

Get the latest information from the Internet that is specifically adapted to the display options of your phone. In addition, you can download games and applications to your phone. Internet access may require registration with the service provider.

The content downloaded during a WAP session is saved in the File Manager in one of the protected non-MyData folders. This content can be used by the phone, but cannot be forwarded out of the phone.

### Internet access

**Menu** →  → **Internet**

"Internet" may be replaced by a name provided by the Service Provider. If necessary, set the way in which WAP access should be made (see **Browser menu**, **Setup**, **Start with...**, p. 69).

For example the start menu appears:

Select required function.

**Select**

Confirm.

## Start menu

|                     |                                                                                                             |
|---------------------|-------------------------------------------------------------------------------------------------------------|
| <b>Homepage</b>     | The connection to the provider's portal is set up. This may be defined or pre-set by your service provider. |
| <b>Bookmarks</b>    | Up to 50 URLs stored in the phone for fast access.                                                          |
| <b>Resume</b>       | Call up recently visited pages that are still in memory.                                                    |
| <b>Inbox</b>        | Inbox for messages from the WAP server (WAP push).                                                          |
| <b>Profiles</b>     | The list of profiles is displayed for activation/setting (p. 70).                                           |
| <b>Exit browser</b> | Close browser and clear down connection.                                                                    |

### Additional information

Operating instructions ..... p. 121

## End connection

Hold **down** to clear down the connection and to close the browser.

Your Internet browser is licensed by:

**OPENWAVE™**

## Browser menu

If the browser is active, the menu can be activated as follows:

Press

or

confirm.

|                     |                                                                                                                                      |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| <b>Homepage</b>     | The connection to the provider's portal is set up. This may be defined or pre-set by your service provider.                          |
| <b>Bookmarks</b>    | Up to 50 URLs stored in the phone for fast access (p. 122).                                                                          |
| <b>Resume</b>       | Call up most recently visited page still in memory.                                                                                  |
| <b>Go to...</b>     | Enter URL to access WAP page directly, e.g.<br><b>wap.my-siemens.com</b><br>Select from list of most recently visited WAP addresses. |
| <b>Reload</b>       | Reload page.                                                                                                                         |
| <b>Inbox</b>        | Inbox for messages from the WAP server (WAP push).                                                                                   |
| <b>Disconnect</b>   | End connection.                                                                                                                      |
| <b>Save picture</b> | Save a picture on the page.                                                                                                          |
| <b>More ...</b>     | See below.                                                                                                                           |
| <b>Exit browser</b> | Close browser and clear down connection.                                                                                             |

## More ... (in menu)

|                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| <b>About Openwave</b> | Display browser version.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

**Notes**

-  Browser menu.
-  Offline.
-  Online.
-  GPRS Online.
-  No network.
-  Select special characters, such as @, ~, \, see p. 31.
- or
-  press repeatedly for:  
., ? ! @ / & ~ + - =

**WAP profiles**

**Menu** →  → Internet → Profiles

The name "Internet" may be replaced by a name provided by the Service Provider.

Preparation of the phone for WAP Internet access depends on the current service provider:

- The settings have already been installed by provider. You can start immediately.
- Access profiles for a number of providers have already been set. Then select and activate profile.
- The access profile must be set manually.

If necessary, check with your service provider for details.

**Activate WAP profile**

You can change the current profile each time you access the Internet.

Select profile.

**Select**

Activate. The current profile is selected.

**Set WAP profile**

Up to 5 WAP profiles can be set (if not barred by provider). The entries may vary depending on the service provider:

Select profile.

**Edit**

Open to make settings.

**Profile name**

Enter/change name.

**WAP param.**

**IP address:** Enter IP address.\*

**Port:** Enter port number.\*

**Homepage:** Enter homepage, if not set by the service provider.

**GPRSlinger time** Time in seconds after which a connection should be ended if no input or data exchange takes place.

**CSD linger-time** Time in seconds after which a connection should be ended if no input or data exchange takes place.

**Conn. Profile** Select or set access profile (p. 84).

\*) depends on service provider, if necessary enter 2nd IP address and 2nd port

**Save**

Save settings.

## Games & More

Download games and other applications. You are advised about relevant applications on the Internet.

Once you have selected a game or application you can start to download it immediately. Then you can use the application.

Most applications include instructions.

### Additional information

To download applications, the WAP profile (p. 70), HTTP profile (p. 73) and access (p. 84) must be configured.

Java™ information ..... p. 118

Sounds (ringer)/silent alert on/off ..... p. 76

Applications and games can be found at:

**wap.my-siemens.com**

or on the Internet at:

**www.my-siemens.com/city**

## Games and applications

Applications and links that are already stored on the phone are found under:

**Menu** →  → Games & More

Different functions are available depending on which entry is highlighted:

 **Carry out game/application offline**

**Select** Loadable application can be started immediately.

 **Load game/application online**

**Select** Only description file (p. 118); application has still to be loaded.

 **Load link (optional)**

**Internet** The selected Internet page is loaded.

## Receive information

If information required, say, by an application that has already been installed, is received via **SMS**, the ★ symbol appears in the display. By pressing the left soft key, the relevant application is started and the information is processed.

### Additional information

The following key control is used for many games (virtual joystick):

## Games&More menu

All functions required for editing and managing your applications and folders are found in the Options menu:

**Options** Open menu.

|                   |                                                               |
|-------------------|---------------------------------------------------------------|
| <b>Start</b>      | Start application.                                            |
| <b>Download</b>   | An application is downloaded from the Internet and installed. |
| <b>New Folder</b> | Create and name new folder.                                   |
| <b>Delete</b>     | Delete selected application/folder.                           |

|                     |                                                                                     |
|---------------------|-------------------------------------------------------------------------------------|
| <b>Delete All</b>   | Delete all applications/folders after confirmation.                                 |
| <b>Rename</b>       | Rename highlighted applications/folders.                                            |
| <b>Move</b>         | Move applications between folders.                                                  |
| <b>HTTP Profile</b> | The list of profiles is displayed for activation/setting (p. 73).                   |
| <b>Reinstall</b>    | Reinstall an application (update).                                                  |
| <b>More Info</b>    | Download further instructions via Internet (WAP), if available.                     |
| <b>Details</b>      | Show details of the application/folder (name, version, size, path, producer, date). |
| <b>Sort</b>         | Set sort criteria (alphabetical, time).                                             |
| <b>Capacity</b>     | Display maximum and available capacity.                                             |

## HTTP Profile

**Menu** →  → Games & More

**Options** Open menu

Select HTTP Profile.

Preparation of the phone depends on current service provider:

- The settings have already been installed by provider. You can start immediately.
- Access profiles have already been set by your provider. Then select and activate profile.
- The access profiles have to be set manually.

If necessary, check with your service provider for details.

WAP can be used to download applications from the Internet. Downloading or running applications will not affect or change the software already installed on your Java™-enabled cell phone. Siemens excludes all warranty and liability claims in respect of or in connection with any applications subsequently installed by the customer and any software not included in the original delivery package. This also applies to functions enabled subsequently at the customer's instigation. The purchaser bears sole risk for the loss of, damage to, and any defects arising in, this device or the applications or software and for any direct damage or consequential damage of whatever nature resulting from the use of these applications or software. For technical reasons, such applications or software and subsequent enabling of certain functions are lost in the event of the device being replaced/re-supplied and may be lost if it is repaired. In these cases the purchaser will need to download the application again or re-enable it. Siemens does not warranty or guarantee or accept any liability for the customer's ability to download or enable applications again or to do so free of charge.

## Display

**Menu** →  → **Display**  
→ Select function.

## Language

Set the language of the display text. When "automatic" is set, the language of your service provider is used. If a language that you do not understand happens to be set, the phone can be reset to the language of your service provider with the following input (in standby mode):

\*#0000# 

## T9 Input

(see also p. 32)

### T9 Preferred

Activate/deactivate intelligent text entry.

### Input language

Select language for text entry. Languages with T9 support are marked by the **T9** symbol.

## Background

Set background graphic for display.

## Logo

Choose picture to be displayed instead of the provider logo.

## Color Scheme

Select color scheme for the whole service system.

### Activate color scheme

Select color scheme.

### Select

Activate.

### Load color scheme

Up to three color schemes can be included in the selection list. These can be loaded by WAP, for example.

### Options

Open menu.

### Load

Select color scheme.

## Screensaver

The screensaver shows a picture in the display when a period set by you has elapsed. The function is ended by an incoming call or by pressing any key.

|                      |                                                   |
|----------------------|---------------------------------------------------|
| <b>Enable</b>        | Activate/deactivate screensaver.                  |
| <b>Style</b>         | Analog Clock, Bitmap or Energy Saving.            |
| <b>Picture</b>       | Select picture in file system.                    |
| <b>Preview</b>       | Display screensaver.                              |
| <b>Timeout</b>       | Set period after which the screensaver starts.    |
| <b>Security</b>      | Phone-code protected termination of screensaver.  |
| <b>Auto Key Lock</b> | The keypad is locked when the screensaver starts. |

### Additional information

You can also receive individual logos, screensavers and animations by SMS (p. 47), MMS (p. 53) or WAP (p. 68). See also *My phone* (p. 25).

## Start Anim.

Select animation to be shown when phone is switched on.

## Shutdn. Anim.

Select animation to be shown when phone is switched off.

## Own Greeting

Enter greeting to be displayed instead of animation when phone is switched on.

**Edit**

Activate/deactivate.

Delete old message and create new message.

**OK**

Confirm changes.

## Big Letters

You can choose between two font sizes for the display.

## Illumination

Set display light brighter/darker. The darker the setting the longer the standby time.

Press the control key repeatedly to adjust up or down.

## Contrast

Set display contrast.

Press the control key repeatedly to adjust up or down.

## Tones/Alerts

**Menu** →  → **Tones/Alerts**  
→ Select function.

You can set the tones to match your needs.

### Ringer Setting

**On/Off**      Activate/deactivate all tones.

**Beep**        Reduce ring tone to a short signal (beep).

#### Additional information

      Display: Beep.

      Display: Ringer off.

Switch off ringer ..... p. 120

### Vibrating Alert

To avoid the disturbance caused by a ringing phone, you can activate the silent alert function as an alternative. The silent alert can also be activated in addition to the ringer (e.g. in noisy environments). This function is deactivated when the battery is charged.

## Volume

Set different volumes for types of call/functions.

Select:

 **Calls**

**Group Calls**

**Other Calls**

**Alarms**

**Alarm Clock**

**Messages**

**Cell Broadcast**

**Start Melody**

**End Melody**

**Applications**

**ProSlide** (common setting for opening and closing melody)

Press. The ring tone is played.

Set volume.

Confirm.

**Select**

**OK**

#### Additional information

Please make sure you have accepted the call before holding the phone to your ear. This will avoid damage to your hearing from loud ring tones!

If two independent phone numbers are registered on your phone, you can set different volumes for them (p. 120).

**Menu** →  → **Tones/Alerts**  
→ Select function.

## Ringtones

Set different ring tones for types of call/functions.

Select:

 **Calls**

**Group Calls**

**Other Calls**

**Alarms**

**Alarm Clock**

**Messages**

**Cell Broadcast**

**Start Melody**

**End Melody**

**Open ProSlide**

**Close ProSlide**

**Select** Press. The melody is played.

Choose ring tone.

**OK** Confirm.

### Additional information

Individual ring tones can be sent to you via **SMS** (p. 47) or you can download them via **WAP** (p. 68). See also **My phone** (p. 25).

## Call Screening

Only calls from phone numbers that are in the Phonebook/Addressbook or in a group are signaled audibly or by silent alert. Other calls are merely displayed.

If you do not accept these calls, they are forwarded to your mailbox (if set, p. 79).

Display in standby mode: when call screening is activated.

## Key Tones

You can set the type of acoustic key tone:

**Click or Tone or Still**

## Minute Beep

During a call, you will hear a beep after every minute as a reminder of the time elapsed. The recipient does not hear this beep.

## Info Tones

Set service and alarm tones:

**On/Off** Activate/deactivate tones.

**Extended** If switched on, a wider range of service tones is available, e.g.:

- End of menu,
- Network connection broken.

## Keys

**Menu** →  → **Keys**  
→ Select function.

## Any to Answer

Incoming calls can be accepted by pressing any key.

(except  ).

## Auto Key Lock

If activated, the keypad is locked automatically if no key has been pressed for one minute in standby mode. This prevents the phone from being used accidentally. However, you can still be called and you can still make an emergency call.

## ProSlide Lock

Enable/disable automatic keylock when closing keypad. The keys are always unlocked automatically when opening the keypad.

### Additional information

The keypad can also be directly locked and unlocked in idle state.

as follows.

Hold **down**.

## Key Tones

You can set the type of acoustic key tone:

**Click** or **Tone** or **Silent**

## Phone Setup

**Menu** →  → Phone Setup  
→ Select function.

### Call Waiting

If you are registered for this service, you can check whether it is set and you can activate/deactivate it (see also p. 29).

### Hide ID

When you make a call, your phone number can be displayed on the recipient's display (depending on the service provider).

To suppress this display, you can enable the "Hide ID" mode for all subsequent calls or just for the next call. You may need to register separately with your service provider for these functions.

### Call Forward

You can set the conditions under which calls are forwarded to your mailbox or other numbers.

#### Set up call forward (example):

The most common condition for call forward is:

#### Unanswered

Select **Unanswered** (includes the **Not reachable**, **No reply**, **Busy** conditions, see below).

#### Select

#### Set

Press.

Select.

Enter the phone number to which the caller will be forwarded (if not already done)

#### Or

Select this phone number from the Addressbook/Phonebook or via **Mailbox**.

#### OK

Confirm. After a short pause, the setting is confirmed by the network.

#### All calls

All calls are forwarded.

Icon in top line of display in standby mode.

#### Not reachable

Forward occurs if phone is switched off or is out of range.

**No reply**

A call is only forwarded after a delay that is determined by the network. The period can be set to a maximum of 30 seconds in 5 second intervals.

**Busy**

Forward occurs if a call is in progress. If **Call Waiting** is activated (p. 79), you will hear the call waiting tone during a call.

**Receiving Fax**

Fax calls are forwarded to a number with a fax connection.

**Receiving Data**

Data calls are forwarded to a phone number with a PC connection.

**Status Check**

You can check the current forward status for all conditions.

After a short pause, the current situation is transmitted by the network and displayed.

Condition set.

Not set.

Display if status is unknown (e.g. with a new SIM card).

**Clear All**

All set diversions are cleared.

**Additional information**

Note that the forward is stored in the network and not in the phone (for example when the SIM card is changed).

**Check condition or delete it**

First select the condition.

**Select** Press.

**Check Status**

Select.

**Or**

**Delete** Select.

**Reactivate forward**

The last forward has been stored. Proceed as with "Set forward". The stored phone number is displayed. Confirm phone number.

**Edit phone number**

Proceed as with "Set forward". When the stored number is displayed:

**Delete** Press. The phone number is deleted.

Enter new number and confirm.

**Menu** →  → Phone Setup  
→ Select function.

## Fact. Settings

The phone is reset to the default values (factory setting) (does not apply to SIM card or network settings).

Alternative input in standby mode:

**\*#9999#** 

## Defrag FileSys

(Phone code protected)

### Format

The file system memory is formatted and **all** data that has been saved is deleted, including Addressbook, ring tones, organizer entries, etc. Save important data in advance (p. 123).

### Clean Up

The file system is defragmented.

## Phone Identity

The phone identity number (IMEI) is displayed. This information may be useful for customer service.

Alternative input in standby mode:

**\*#06#**

Check software version p. 120.

## Auto Off

The phone switches off each day at the set time.

### Activate:

**Time**

Press.

Enter time  
(24-hour clock).

**OK**

Confirm.

### Deactivate:

**Manual**

Press.

**OK**

Confirm.

## Clock

**Menu** →  → **Clock**  
→ Select function.

### Time/Date

The clock must be set to the right time once at start-up.

**Edit** Press.

First enter the date (day/month/year), then the time (12 hours, including seconds).

#### Additional information

If the battery is removed for longer than approx. 30 seconds, the clock must be reset.

Setting date format:

DD: Day (2-digit)

MM: Month (2-digit)

YYYY: Year (4-digit)

### Time Zones

Set the time zone for your area.

Select the required time zone from list ...

**Set** ... press to set.

**Options** Open menu.

|                                                                                                         |                                                                                                           |
|---------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------|
| <b>Set</b>                                                                                              | Set time zone.                                                                                            |
| <b>Rename</b>                                                                                           | Assign a new name to time zone.                                                                           |
| <b>DST</b>                                                                                              | Activate/deactivate daylight saving. When daylight saving is activated a sun icon appears on the display. |
| <b>Auto Time-zone</b>  | The time zone is switched automatically to local time by the network.                                     |
| <b>View</b>                                                                                             | Display the selected time zone with name and date.                                                        |

### Date Format

DD.MM.YYYY or MM/DD/YYYY

### Time Format

Format 24h or Format 12h.

### Show Clock

Activate/deactivate time display in standby mode.

## Connectivity

**Menu** →  → **Connectivity**  
→ Select function.

### GPRS

(**G**eneral **P**acket **R**adio **S**ervice)

GPRS is a new method for transmitting data faster in the cell phone network. Use GPRS and if the network has sufficient capacity, you can be connected to the Internet permanently. Only the actual transmission time is charged by the network operator.

Some service providers do not yet support this service.

**Yes / No** Activate or deactivate GPRS function.

Shown in display:

**GPRS** Activated and available.

**|GPRS|** Logged on.

**GPRS** Connection briefly lost.

## Data Counter

Display of information on connection status.

### IrDA

Your phone has an infrared interface. You can use this to exchange data (Addressbook entries, business card, SMS, organizer entries) with other devices that are also equipped with an infrared interface.

The infrared interface is on the right side of the phone. The distance between the two devices must not exceed 30 cm. The infrared windows of the two devices should be placed as close to one another as possible.

**Change** Activate/deactivate IrDA.

Shown on the display:

When activated.

During the transfer.

**Menu** →  → **Connectivity**  
→ Select function.

## Data Services

For the **MMS, WAP and Mail, Java, Rms** applications at least one connection profile must be set up and activated.

Select profile.

**Options** Open menu.

**Change Sett.**

Select, then:

**For CSD (Circuit Switched Data)**

**CSD settings**

Select.

If it has not been pre-installed, enter the data or enter the required settings (your service provider will supply you with information on this):

**Edit** Press.

|                       |                                                  |
|-----------------------|--------------------------------------------------|

| <b>Login name:</b>    | Enter login name.                                |
| <b>Password:</b>      | Enter password (shown as a series of asterisks). |
| <b>DNS1 / DNS 2:</b>  | (optional).                                      |

**Save** Save settings.

**For GPRS**

(General Packet Radio Service)

**GPRS settings**

Select.

You can activate GPRS for the profile and change the settings here. You can only start to use GPRS once you have activated GPRS on your phone (p. 83).

**Edit** Press.

|                      |                                                  |
|----------------------|--------------------------------------------------|
| <b>APN:</b>          | Enter service provider address.                  |
| <b>Login name:</b>   | Enter login name.                                |
| <b>Password:</b>     | Enter password (shown as a series of asterisks). |
| <b>DNS1 / DNS 2:</b> | (optional).                                      |

**Save** Save settings.

## HTTP Profile

Preparation of the phone depends on current service provider:

- The settings have already been installed by your provider. You can start immediately.
- Access profiles have already been set by your provider. Then select and activate profile.
- The access profiles must be set manually.

If necessary, check with your service provider for details.

**Menu** →  → **Connectivity**  
→ Select function.

## Fax/Data Mod.

### Fax/data mode using a PC

With the phone and a connected PC, you can transmit and receive faxes and data. Appropriate software for fax and data communication must be available on your PC and there must be a connection to the phone.

Fax and data services must be enabled by the service provider. There are variations in fax and data reception, depending on the network. Please ask your service provider about this.

**Change** Set the required mode.

### Rec Fax/Data

Your service provider has given you a number for telephoning and a fax/data number.

The call is signaled by a special ring tone and the type of call (fax or data) is displayed.

Now start the communication program in your PC to receive the fax/data.

### Send Voice/Fx

Set this function on the phone **before** transmission so that you can switch from voice mode to fax mode.

While the connection is being set up, the following function is available for two seconds:

**Voice/fx** Switch to **Send Voice/Fx** mode; you may now send a fax.

### Voice/Fax Rec

(**Only** if no special fax or data number is available).

Start the required communication program on your PC and select the function on the phone **during** the call (the PC will take over the connection).

### End transmission

End transmission with PC software and/or press .

## Authentication

**Edit** Activate encrypted WAP dial-up (CHAP Challenge Authentication Procedure) or deactivate it (PAP Personal Authentication Procedure).

## Security

**Menu** →  → **Security**  
→ Select function.

The phone and SIM card are protected against misuse by several security codes.

### Codes

**PIN Control, Change PIN, Change PIN2, Chg.Phonecode** (p. 24).

#### Only

(PIN 2 protected)

Dialing options are restricted to SIM-protected phone numbers in the Phonebook. If only area codes are entered, relevant phone numbers can be added to these manually before dialing.

If the SIM card does not support PIN 2 input, the **whole** Phonebook can be protected with the phone code.

#### This SIM Only

(Phone code protected)

By entering a phone code, the phone can be linked to a SIM card. Operation using a **different** SIM card is not possible without knowing the phone code.

If the phone is to be used with a different SIM card, enter the phone code when requested.

**Menu** →  → **Security**  
→ Select function.

## Barrings

Barring restricts the use of your SIM card (this is not supported by all service providers). You need a 4-digit password which your service provider will give you. You may need to register each barring separately with your service provider.

### All outgoing

All outgoing calls except emergency number 911 are barred.

### Outgo internat

Only national calls can be made.

### Out.int.x home

International calls are not permitted. However, you can make calls to your home country when abroad.

### All incoming

The phone is barred for all incoming calls (forwarding of all calls to mailbox provides a similar effect).

### When roaming

You do not receive calls when you are outside your home network. This means that no charges are incurred for incoming calls.

## Status Check

The following information can be displayed after a status check:

Barring set.

Barring not set.

Status unknown (e.g. new SIM card).

## Clear All

All barrings are deleted. A password which the service provider will give you is needed for this function.

## Network

**Menu** → → **Network**  
→ Select function.

## Line

This function is only displayed if it is supported by the service provider.

**Two separate** phone numbers must be registered on the phone.

## Select

Select phone number in current use.

**1** >>>> Display current phone number.

### Additional information

Settings for phone numbers .....p. 120

## Block line

(Phone code protected)

You may limit usage to one phone number.

## Network Info

The list of GSM networks currently available is displayed.

Indicates forbidden service providers (depending on SIM card).

## Choose Network

Network search is restarted. This is useful if you are **not** on your home network or want to register on a **different** network. The network list is rebuilt when **Auto Network** is set.

## Auto Network

Activate/deactivate, see also **Choose Network** above. If "Automatic network" is activated, the next network on the list is dialed in ranking order of your "preferred networks". Alternatively select a different network manually from the list of the available GSM networks.

## Pref. Network

Enter your preferred service providers here for when you leave your home network (e.g. if there are differences in price).

### Additional information

If the signal strength of the preferred network is inadequate when you switch on the phone, the phone may register in a different network. This can change when the telephone is next switched on or if another network is selected manually.

Your service provider is displayed:

### List

Display list of preferred networks.

Create new entry:

- Select empty line, press **Entry**, then select another entry from the list of service providers and confirm.

Change/delete entry:

- Select entry, press **Change**, then select another entry from the list of service providers and confirm or press **Clear**.

## Band selection

Select either GSM 900, GSM 1800 or GSM 1900.

## Fast Search

When this function is active, network reconnection is speeded up (and standby time is reduced).

**Menu** →  → **Network**  
→ Select function.

## User Group

Depending on service provider, you can create groups with this service. These can have access to internal (company) information, for example, or special tariffs apply. The details can be clarified with your service provider.

### Active

Activate/deactivate function. "User group" must be deactivated for normal phone use (phone code, p. 23).

### Select Group

You can select or add groups other than preferred groups (see below). Code numbers for the groups are obtained from your service provider.

### Outgo. Access

In addition to network control for a user group, it is possible to set whether outgoing calls outside the group are permitted. If the function is deactivated, only calls within the group are permitted.

### Preferred Grp

If activated, only calls within this standard user group can be made (depending on the network configuration).

## Accessories

**Menu** →  → **Accessories**  
→ Select function.

### Car Kit

Only in combination with an original Siemens handsfree Car Kit (p. 131). The profile is activated automatically as soon as the phone is inserted into the cradle.

### User-definable settings

#### Auto Answer

(factory default: off)

Calls are accepted automatically after a few seconds. Eavesdropping is possible!

Message in display.

#### Auto Off

(factory default: 2 hours)

The phone is powered by the car's power supply. You can adjust the time between switching off the ignition and the automatic switching off of the phone.

### Car Loudspk.

Choose a different audio setting if desired for your Car Kit.

**Automatic settings:**

- Permanent illumination: switched on.
- Key lock: switched off.
- Charging the phone battery.
- Automatic activation of the Car Kit profile when phone is inserted in cradle.

**Headset**

Only in conjunction with an original Siemens headset (p. 130). The profile is automatically activated when headset is plugged in.

**User-definable settings****Auto Answer**

(factory default: off)

Calls are accepted automatically after a few seconds (except where the ringer is switched off or set to beep). You should therefore be wearing the headset.

Eavesdropping is possible!

**Automatic setting**

Accept call with Call key or PTT key (Push To Talk), even when key lock is activated.

**ProSlide**

**Menu** →  → **ProSlide**  
→ Select function.

**Volume**

Adjust the volume of the music when opening and closing the keypad.

**Open. Melody**

Set the music to be played when the keypad is opened.

**Closing Melody**

Set the music to be played when the keypad is opened.

**ProSlide Lock**

Enable/disable automatic keylock when closing keypad. The keys are always unlocked automatically when opening the keypad.

**Auto answer**

If you do not notice that your phone has accepted a call, there is the danger that the caller may eavesdrop.

Several settings can be stored in a phone profile in order, for example, to adapt the phone to the surrounding level of noise.

- Five standard profiles are provided with default settings. They can however be changed:

Normal Env.

Quiet Env.

Noisy Env.

Car Kit

Headset

- You can set two personal profiles (<No Title>).
- The special profile **Aircraft Mode** is fixed and cannot be changed, (p. 92).

## Activate

Menu → 

Select default profile or personal profile.

Activate

Activate profile.

☐ Normal Env.
 ☒ Quiet Env.
 ☐ Noisy Env.

Activate Options

☒ Active profile.

## Setup

Edit a default profile or create a new personal profile:

Select profile.

Options

Open menu.

Change Sett.

Select.

The list of available functions is displayed:

|                      |       |
|----------------------|-------|
| Ringer Setting.....  | p. 76 |
| Volume .....         | p. 76 |
| Ringtones .....      | p. 77 |
| Vibrating Alert..... | p. 76 |
| Call Screening ..... | p. 77 |
| Info Tones .....     | p. 77 |
| Key Tones .....      | p. 77 |
| Illumination .....   | p. 75 |
| Big Letters .....    | p. 75 |

When you have finished setting a function, return to the profile menu where you can change a further setting.

## Profile menu

**Options** Open menu.

|              |                                                    |
|--------------|----------------------------------------------------|
| Activate     | Activate selected profile.                         |
| Change Sett. | Change profile settings.                           |
| Copy From    | Copy settings from another profile.                |
| Rename       | Change personal profile (except default profiles). |

## Car Kit

If a Siemens original Car Kit is used (p. 131) the profile is activated automatically as soon as the phone is inserted into the cradle (p. 89).

## Headset

If an original Siemens headset is used (p. 130), the profile is activated automatically as soon as the headset is used (p. 90).

## Aircraft Mode

All alarms (appointments, alarm clock) are deactivated. This profile **cannot be modified**. The phone will switch off if you select this profile.

### Activate

**Select**

Scroll to **Aircraft Mode**.

Activate profile.

A security prompt must be confirmed.

The phone switches itself off automatically.

### Normal operation

When you switch on your phone again, the previously set profile will be reactivated automatically.

**Menu** Press.

**Favorit.** Press.

Create your own menu with frequently used functions, phone numbers or WAP pages.

The list of 10 possible entries is preset. You can, however, change it as you want.

## Additional information

For fast access from standby mode you can set the function **Favorites** on the left soft key (p. 110).

## Activate

Select the required entry.

**Select** Press.

Or

**Options** Press.

**Activate** Select.

**Select** Press.

Or

If the entry selected is a phone number, you can also call it with the Call key.

## Change Sett.

You can replace each entry (1–10) with another entry from the selection list of **Favorites**.

Select the required entry.

**Options** Press.

**Change Sett.**

Select.

**Set**

Press.

Select the **new** entry from the selection list.

**Set**

Press.

If you have selected a phone number or a WAP favorite as a new entry, the corresponding application is started.

## Reset All

**Options** Press.

**Reset All** Select.

After confirmation and entering the phone code, the default entries are reset.

## Calendar

Menu → 1 → Calendar

You can enter appointments and tasks in the Calendar. It offers a

- monthly overview,
- weekly overview,
- daily overview.

Time and date must be set for the Calendar to work correctly (p. 82).

## Monthly overview

| Tu   |    | Aug 2003 |    |    |        |    |   | W32 |  |

Each day is divided into six blocks of four hours (morning + afternoon).

Scroll between days.

### Additional information

Calendar days in bold face indicate appointments or birthdays (p. 96) on this day.

You can use the plus/minus side key on the phone to scroll between the months or weeks depending on the current overview.

### Additional information

Appointments are displayed by vertical bars.

Time overlaps in appointment entries are highlighted.

## Agenda

**Agenda** Select in the current overview.

Appointments (p. 96) and where applicable any open tasks (p. 98) for the current day are displayed in chronological order in the agenda.

### <New Entry>

Create new entry as appointment or as task.

## Options

Different functions are provided, depending on the Calendar item selected or the current organizer function:

**Options** Open menu.

|                   |                                                          |
|-------------------|----------------------------------------------------------|
| <b>View</b>       | Display entry.                                           |
| <b>Done</b>       | Change task to "completed".                              |
| <b>Edit</b>       | Open the entry to edit.                                  |
| <b>New Entry</b>  | Create new entry as Appointment (p. 96) or Task (p. 98). |
| <b>Delete</b>     | Delete selected entry.                                   |
| <b>Delete All</b> | Delete all entries after confirmation.                   |

|                      |                                                                                   |
|----------------------|-----------------------------------------------------------------------------------|
| <b>Delete Until</b>  | Delete all entries prior to a certain date.                                       |
| <b>Delete done</b>   | Delete all completed tasks.                                                       |
| <b>Mark</b>          | Activate highlighting mode, the entry currently selected is highlighted (p. 117). |
| <b>Mark All</b>      | Activate highlighting mode, all entries are highlighted (p. 117).                 |
| <b>Send/Print...</b> | (p. 114)                                                                          |
| <b>Import</b>        | Import tasks and appointments via IrDA in vCal format (p. 114).                   |
| <b>Capacity</b>      | Display available capacity.                                                       |

## Additional information

For additional Calendar settings, see below under **Setup**.

-  Appointment with "alarm activated".
-  Appointment with "alarm deactivated".
-  Task.
-  Priority task.
-  Task completed.
-  Task deadline exceeded.

## Synchronizing with a PC

With XTNDConnect® PC (p. 123) you can synchronize your appointments with Outlook® or Lotus Notes™.

With **Remote Sync**, you can synchronize your phone with an organizer stored on the Internet (p. 108). For this a time zone must be set (p. 82).

## Calendar settings

**Menu** →  → **Calend. Setup**

## Show Birthday

Birthdays (and other events) are shown in bold face.

## Begin of Week

You can set which weekday is listed first on the left in the monthly and weekly overviews.

## Appointments

**Menu** →  → **Appointments**

All appointment entries are displayed in chronological order. If an alarm is missed it appears in the list of missed appointments (p. 100).

## List according to type

**Types** Types of appointments are displayed.

Select appointment type.

**Select**

Show all entries for the selected type.

## Enter new appointment

Select <New Entry>.

Make the entries field by field.

**Edit**

Browse through displays in the selection fields.

 **New Entry**

Type: Memo

Description:

Change
Save

**Type:****Memo.**

Description with up to 50 characters.

**Speech Memo.**

Record a voice memo at the end of the input procedure (see also p. 101).

**Call.**

Enter phone number.  
Shown with alarm.

**Meeting.**

Description with up to 50 characters.

**Description:**

Display in the agenda list.

**Location:**

Location of appointment, e.g. meeting room.

**Start date:****Start time:****End date:****End time:****Alarm:**

Activate alarm.

Enter start time of the alarm **before** the appointment.

Select:

**Minutes, Hours, Days.**

**Reoccurrence:**

Select a timeframe for repeating the appointment:

**No, Daily, Weekly, Monthly, Annual.**

Enter a parameter for repeating:

**Forever, Until, Occurrences** (number)

If **Weekly** is selected, certain weekdays can be highlighted.

**Save**

Save the appointment.

The alarm is automatically activated. If **Speech Memo** is selected as type, the dictating machine is started for recording (p. 101).

## Alarm

When the set date and time are reached there is an audible and a visual alarm. If an alarm is missed it appears in the list of missed appointments (p. 100).

Alarm type **Memo/Meeting**: the text is shown in the display.

Alarm type **Call**: the phone number is displayed for dialing.

Alarm type **Speech Memo**: playback with dictation key.

**Pause** The alarm stops for 5 minutes.

**Off** The alarm is stopped.

### Additional information

Display indicating that alarms are set:

(🕒) Alarm clock.

(🔔) Appointment.

An alarm sounds even when the phone is switched off (the phone does not switch to standby mode). Press any key or close and open the keypad to disable it.

Set alarm tone..... p. 76

Clock..... p. 82

**Options**..... p. 95

## Tasks

**Menu** → **1** → Tasks

A task is displayed like an appointment in the agenda of the selected day. However, unlike an appointment it does not require a time. When no time is entered the task appears at the top of the list every day until it is marked as completed.

### List according to type

**<Types>** Types of appointments are displayed.

Select appointment type.

**Select**

Show entries for the selected type.

### Enter new task

Select **<New Entry>**.

Select appointment type (see appointments, p. 96).

### Description:

Display in the list.

### Status:

Choose between: **Done** or **Outstanding**

## Priority:

Select between 1 (high) – 5 (low).  
Default is 3.

## Date in use:

When **Yes** is selected, the following option is provided.

## Due date:

Enter date.

## Due time:

Enter time.

## Alarm:

Enter a time (0–99) and a time unit (minutes, hours, days) at which an audible/visual notification of an impending task should be made.

**Save** Save task.

## Notes

**Menu** →  → Notes

Use your phone as a notepad.

## New entry

**Select** Press.

Enter text, 150 characters maximum.

| <b>Send/Print...</b> | (p. 114)                               |

## Voice Memo

Use the dictating machine to record short voice memos.

- Use your phone as a dictating machine when on the move.
- Record a memo as a reminder or as a note for others.
- Add a voice memo to an alarm in the Calendar (p. 97).
- Record a call - useful for remembering numbers or addresses.

### Warning!

The use of this feature may be subject to restrictions under criminal law.

Please inform the other party to the conversation in advance if you want to record the conversation and please keep such recordings confidential.

You may only use this feature if the other party to the conversation agrees.

## Control using the side keys

The voice functions can be controlled quickly and easily in standby mode using the side keys.

### New recording

Press the dictation key for the duration of the recording. The maximum possible recording period is shown. Recording starts after a short beep.

### Pause

Release the dictation key for a maximum of 10 seconds to pause recording. If you press the key again, recording is resumed, otherwise it is stopped.

### Save

Recording is stopped if you release the dictation key for more than 10 seconds.

### Stop

End recording.

Recording is automatically saved with a time stamp.

### Save

Name recording.

### OK

Save recording.

## Play back

In standby mode, press the dictation key **briefly**. If the Options menu is set up that way, **Speakerphone** will be offered.

## Operation with soft keys

### New recording

**Menu** →  → Voice Memo

The list of recordings is opened.

**<New Record>**

Select.

**Record** Start recording

**Pause** Recording pause.

**Stop** End recording.

Recording is automatically saved with a time stamp.

**Save** Name recording.

**OK** Save recording.

Or

**Play** Play back recording before storing it.

## Play back

**Menu** →  → Voice Memo

The list of recordings is opened.

Select recording.

**Play**

Press.

## Voice Memo menu

**Options** Open menu.

|                     |                                                                                         |
|---------------------|-----------------------------------------------------------------------------------------|
| <b>Play</b>         | Play recording back.                                                                    |
| <b>Speakerphone</b> | Activate/deactivate play-back in handsfree mode.                                        |
| <b>New Record</b>   | Start new recording.                                                                    |
| <b>Delete</b>       | Delete selected recording.                                                              |
| <b>Delete All</b>   | Delete all entries after confirmation.                                                  |
| <b>Rename</b>       | It can be generic renaming of a file instead of specific renaming from time/date stamp. |

## Time Zones

**Menu** →  → Time Zones

Set the time zone for where you currently are (p. 82).

**Menu** → 

→ Select function

## Alarm Clock

The alarm will ring at the time set by you, even when the phone is switched off.

### Setting

**Change**

Display selected time and days for alarm calls:

Set time for the alarm call (hh:mm).

Navigate to the days.

**Change**

Set days for alarm calls.

**OK**

Confirm settings.

**On / Off**

Activate/deactivate the alarm.

### Additional information

Alarm clock switched on.

Alarm clock switched off.

Screen display in standby mode: Alarm clock activated.

## Calculator

Enter number (up to 8 digits).

Select calculator function.

Repeat procedure with other numbers.

Result is displayed.

### Calculator functions

**. = + - \* /**

Press the right soft key repeatedly.

**±**

Toggle between "+" and "-".

**%**

Convert to percentage.

**↓**

Save the number displayed.

**↑**

Retrieve the number saved.

**e**

Exponent (max. two digits).

### Special keys:

Set decimal point.

Add (hold **down**).

## Currency Conv

Any combination of calculations can be carried out between the currencies entered.

Select a combination of currencies from the list.

**Start**

Confirm.

Enter amount (up to 12 digits).

Result is displayed.

**Repeat** Repeat conversion with other data.

## Calculator menu

**Options** Open menu.

|                   |                                               |
|-------------------|-----------------------------------------------|
| <b>Start</b>      | Enter value to be calculated.                 |
| <b>New Entry</b>  | Enter two new currencies.                     |
| <b>Change</b>     | Change the two currencies.                    |
| <b>Delete</b>     | Delete the two currencies.                    |
| <b>Delete All</b> | Delete all currency pairs after confirmation. |

**Menu**

→ Select function.

## Stopwatch

Two intermediate times can be recorded and saved.

**Reset**

Reset to zero.

Start/stop.

Intermediate time.

**Control using side keys:**

Start/stop  
(dictation key)

Intermed. time  
(plus/minus  
side key top)

## Stopwatch menu

**Options** Open menu.

|                       |                                                                                                                                                                                                                         |
|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Save</b>           | Record the time(s) measured and assign a name to them.                                                                                                                                                                  |
| <b>Reset</b>          | Reset stopwatch.                                                                                                                                                                                                        |
| <b>Stopwatch List</b> | <p>Display the stored times.</p> <p><b>View</b> Display the stored times and intermediate times.</p> <p><b>Rename</b> Rename stored entry.</p> <p><b>Delete</b> Delete entry.</p> <p><b>Delete All</b> Delete list.</p> |

## Countdown

A set time elapses. The last 3 seconds are indicated by a beep. At the end a special beep sounds.

**Set** Set period of time.

**Start** Start counter.

**Stop** Interrupt counter.

**Change** Change period of time.

**Reset** Reset counter to starting time.

## Camera (Accessories)

You can use the phone to immediately view, save and send photos you have taken with the Mobile Camera IQP-511 (p. 130).

Shots can be taken in two different formats:

- Low resolution: QQVGA 160x120 pixels, memory size up to 6 KB to send as a picture message (p. 53).
- High resolution: VGA 640x480 pixels, memory size of one shot up to 40 KB - e.g. for further editing on PC. To allow the picture to be viewed on the phone display, a QQVGA picture is created for every VGA shot.

**Camera** Press when the camera has been attached (in standby mode).

Or

**Menu** →  → **Camera**

First the number of shots still available is shown (depends on resolution chosen).

**OK** Confirm.

The last shot taken is shown.

Scroll through photos.

## Shot

A shot (especially in high resolution) requires a few seconds to be processed.

Press the **plus/minus side key at the top**. You will hear an advisory tone when the exposure time has expired. The photo is shown on the display and saved automatically.

## Flash

The flash function can be activated/deactivated in the option menu.

If the flash is switched on from "Options", the flash is charged before taking a picture:

Press the **plus/minus side key at the top briefly**. The flash is loaded.

Press the **plus/minus side key at the top again**. The photo is taken with the flash.

### Additional information

Photograph without flash when the function **Use Flash** is switched on:

Hold **down the plus/minus side key at the top**. The charging process for the flashlight is omitted and a shot is taken immediately.

## Camera menu

**Options** Open menu.

|              |                                                                                                                                   |
|--------------|-----------------------------------------------------------------------------------------------------------------------------------|
| Use Flash    | Use flashlight (only when camera is plugged in)                                                                                   |
| Full screen  | Switch to full screen mode.                                                                                                       |
| Delete       | Delete current picture after confirmation.                                                                                        |
| Delete All   | Delete all pictures after confirmation.                                                                                           |
| Move         | Move currently selected picture to another folder (if necessary, first choose resolution). See also <b>File Manager</b> , p. 112. |
| Move all     | See above.                                                                                                                        |
| Send via ... | Send picture by:<br>MMS (only low resolution),<br>e-mail, IrDA.                                                                   |
| Info         | Display number of shots still available.                                                                                          |
| Setup        | Set resolution:<br>Low<br>High & Low<br>Set display:<br>Full screen                                                               |

## Additional information

If the memory is full or the camera is not attached:

### Delete

Delete picture currently shown.

Toggle between reduced/full screen.

Set display lighting.

## Voice command

Functions can be started by a voice command. A maximum 20 voice recordings for voice dialing or voice commands can be saved in the phone (not on SIM card!).

## Record

**Menu** →  → **Voice command**

A list with the functions available is displayed.

Select a function.

### Record

Press.

### Yes

Confirm selected function.

### Start

Start recording.

A short signal sounds. Now say the command corresponding to the function and **repeat** it when prompted.

## Apply

Hold **down** the **plus/minus side key at the bottom** (in standby mode).

A short signal (beep) sounds and a prompt appears in the display. Now say the function.

Noisy environments may affect voice recognition.

## Voice command menu

Highlight required entry.

### Options

Open menu.

|            |                                                 |
|------------|-------------------------------------------------|
| Play       | Play back the recording belonging to the entry. |
| New sample | Start new recording for an entry.               |
| Delete     | Delete entry.                                   |
| Delete All | Delete all recordings.                          |

## Remote synchronization

**Menu** →  → Remote Sync.

You can use this function remotely to access externally filed data (addresses, calendar, etc.) and synchronize these with the data on your phone. The data can, for example, be saved on a company computer or the Internet.

## Synchronize

### Start

Computer is selected and synchronization started.

## Sync. setting

### Setup

Start synchronization.

### Sync. Profile

A number of profiles can be defined.

Select profile.

### Options

Open menu.

### Change Sett.

Select.

Highlight database areas to be synchronized:

Calendar

Contacts

Notes

Tasks

### Server Setting

Different functions are offered depending on the situation:

|                      |                                                                                                                                                               |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Sync. mode</b>    | <p><b>Fast:</b> Only data that has changed will be synchronized in both directions.</p> <p><b>Slow:</b> All data will be synchronized in both directions.</p> |
| <b>Provider</b>      | Select or set access profile (p. 84).                                                                                                                         |
| <b>Home</b>          | e. g. <a href="http://www.my-siemens.com/s56sync">http://www.my-siemens.com/s56sync</a>                                                                       |
| <b>Port:</b>         | Enter port number, e.g. 80.                                                                                                                                   |
| <b>Login name:</b>   | Enter user name (Login name).                                                                                                                                 |
| <b>Password:</b>     | Enter password (shown as a series of asterisks).                                                                                                              |
| <b>Calendar path</b> | Folder name with path details.                                                                                                                                |
| <b>Address path</b>  |                                                                                                                                                               |
| <b>Notes path</b>    |                                                                                                                                                               |
| <b>Task path</b>     |                                                                                                                                                               |
| <b>HTTP authent.</b> | Depends on server provider.                                                                                                                                   |

**Save** Save settings.

## Activate remote sync. profile

**Sync. setup** Select.

**Sync. Profile**

Select.

Select profile.

**Activate**

Activate. The current profile is selected.

### Additional information

On the Internet under

[www.my-siemens.com/SyncMI](http://www.my-siemens.com/SyncMI)

## SIM services (optional)

Your service provider may offer special applications such as mobile banking, stock prices, etc. via the SIM card.

If you have such a SIM card, the SIM services will appear in the main menu under "Extras" or directly above the control key (on the left).

Symbol for SIM services.

Where there are several applications, these are displayed in a SIM services menu.

**Menu**

→  → **SIM services**

With the SIM services menu, your phone is ready to support future additions in your service provider's user package. For further information, please contact your service provider.

The left soft key and the number keys 2 to 9 (speed dialing numbers) can each be assigned an important phone number or a function. The phone number can then be dialed or the function started at the touch of a button.

### Additional information

The left soft key may already have a function allocated by your service provider (e.g. access to  SIM card services). It may not be possible to modify this soft key assignment.

The left soft key may also sometimes be replaced automatically by  /  to access a new message.

Key assignments available:

## Left soft key

Assign a function/phone number to the left soft key for fast access.

### Edit

#### Internet

Press **briefly**.

#### Change

Scroll to application in the list.

- Assign a new application (e.g. **New SMS**) to the soft key.

- Special case **Phone Number**. Pick out a name (e.g. "Carol") from the Phonebook/Addressbook to assign to the soft key.

**Select**

Confirm setting.

## Apply

The setting "Carol" is used here only as an example.

**Carol**Hold **down**.

## Speed dialing keys

Number keys 2 to 9 can be used as speed dialing numbers for fast access. For available key assignments see p. 110. Number key 1 is reserved for the mailbox number (p. 45).

## Edit

In standby mode:

Press a number key (2–9). If the key is not yet assigned:

**Set**

Press.

**Or****New SMS**

Press **briefly** (if **New SMS** is assigned for example).

**Edit**

Scroll to application in the list.

Special case **Phone Number**. Pick out a name from the Phonebook/Addressbook for assignment to the key.

Special case **Bookmarks**. Scroll to a URL in the bookmark list for assignment to the key.

Confirm setting.

**Select**

## Apply

Select a stored phone number or start a stored application (e.g. **New SMS**).

In standby mode:

Press **briefly**.

The assignment of the number key 3 is displayed above the right soft key e.g.:

**New SMS**Hold **down**.**Or simply**Hold **down**.

To organize your files, you can use the file system like a PC file manager. The file system assigns special folders to different data types.

In order to protect content from being copied, two types of folders have been created: 1) Unprotected folders titled MyData and its sub-folders and 2) Protected folders.

Data stored in the MyData folders can be sent out of the phone using MMS or email.

Data that is received using WAP will be automatically stored in a protected folder based on the type of content, sound, graphic, etc.

**Menu** → 

A list of the folders and files is displayed.

Navigate through this list using the control key:

Scroll up and down.

Go back from folder.

**Open**

Open folder or execute file with related application

or

**Mark**

with unknown file types:  
Highlight file.

## Index structure

The file system assigns special folders to different data types.

|                           |                                                                                                                                                         |                                  |
|---------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|

## File system menu

**Options**    Open menu

**Open**    Open folder.

**Move**    Place highlighted file or folder in temporary memory.

**Copy**    Copy highlighted file to temporary memory.

**Paste**    Transfer content of temporary memory to current folder.

**Delete**    Delete current entry.

**Delete All**    Delete all entries.

**Mark**    See highlighting mode (p. 117).

**Mark All**    All entries highlighted, see highlighting mode (p. 117).

**New Folder**    Create a new folder and give it a name (only one folder depth available).

**Rename**    Change highlighted entry.

**Sort**    Set sort criteria (alphabetical, type, time).

**Attributes**    Display information on file or folder selected.

**Drive Info**    Display the capacity used and available.

The phone provides you with several methods for sending, receiving or printing texts and data via different transmission routes. Access to these functions is available in the option menu of the relevant application. These menu items can vary depending on the application. Please make sure you use the ANSI character set for transmission purposes. Your printer has to be set to the correct conversion table (code page) in order to display special characters correctly.

## IrDA (Infrared)

Activate IrDA, p. 83.

Application option:

**Send/Print... → Via IrDA**

**Send** The data is sent via the selected transmission route.

**Print** The data is sent to the connected printer.

## All via IrDA

Application option:

**Send/Print... → All via IrDA**

All entries from the Phonebook, Addressbook and organizer are sent or printed via the infrared port.

**Send** See above.

**Print** See above.

Set import mode on receiving phone.

### To receive via IrDA

Please turn on IrDA to receive (p. 83).

## Via SMS/vCard

Phonebook and Addressbook entries as well as appointments can be sent as an SMS to other suitable cell phones.

With larger items, several SMS messages may be generated and sent as a concatenated message.

## Via SMS/Text

Business cards, Addressbook entries or appointments can be sent as text messages by SMS (this may result in several being generated).

## Import

Enable transmission to receive **several** objects in succession via IrDA.

## Data objects

Files received via IrDA or SMS are stored in the file system (p. 112).

## Control codes (DTMF)

### Sending control codes

You can enter control codes (digits) during a call so that an answering machine can be controlled remotely. These digits are directly transmitted as DTMF tones (control codes).

 **menu** Open call menu.

### Send DTMF

Select.

### Use the Phonebook

Save phone numbers **and** control codes (DTMF tones) in the Phone/Addressbook like a normal entry.

Enter phone number.

Press until a "+" appears on the display (pause for connection setup).

Enter DTMF signals (digits).

If necessary enter further pauses of three seconds each to ensure correct processing at destination.

Enter a name.

 **Save**

Press.

You can also store just the DTMF tones (digits) without a phone number and send these during a call.

## Copy protection

Applications can be copy-protected. Applications protected in this way can only be executed on specially designated devices. It is possible, however, to create a backup copy of these applications on the PC at any time using the "Siemens Data Suite" (p. 123).

## Dial-up access CSD

(Circuit Switched Data)

Data transfer is made via a data connection to a default IP address of your network provider or service provider. This connection can be used for the exchange of data (e.g. for access to the Internet or for downloading games and applications as well as for using WAP services).

As long as this connection is established for using services or downloading applications from the Internet, charges for the connection accrue according to the price list of your network provider or service provider.

## Dial-up access GPRS

(General Packet Radio Service)

GPRS is a new method for transmitting data faster in the cell phone network. If you use GPRS and the network has sufficient capacity, you can be connected to the Internet permanently.

Some service providers do not yet support this service.

## EMS

(Enhanced Messaging Service)

Besides formatted texts, you can also send

- pictures (bitmaps) up to max.  
32 x 32 pixels (black and white),
- sounds,
- animations (sequence of 4 pictures)  
8 x 8 and 16 x 16 pixels (black and white),

using the EMS.

The elements listed above can be transmitted individually or together in an SMS.

With EMS, pictures and sounds can also be sent (e.g. as screensavers and ring tones).

This can result in messages exceeding the length of a single SMS. In this case individual text messages are concatenated to form a single message.

## Extending numbers in the Phonebook/Addressbook

When entering a phone number in the Phonebook/Addressbook, digits can be replaced by a question mark "?":

Hold **down**.

This placeholder must be filled before dialing (e.g. with the extension number in a telephone system).

Select the phone number to call from the Phonebook/Addressbook:

Press.

? to be replaced by digits.

Press, number is dialed.

## Highlighting mode

With some applications (e.g. Addressbook) one or more entries in a list can be highlighted, to carry out a function jointly.

**Options** Open menu.

**Mark** Activate highlighting mode.

If an **unmarked** entry is selected, this can be highlighted:

**Mark** The current entry is highlighted.

If a **highlighted** entry is selected, the highlighting can be deleted:

**Unmark** Unmark the current entry.

Highlighting function in options menu:

**Options** Open menu.

**Mark All** Highlight all entries.

**Unmark All** Delete highlighting on all marked entries.

## HTTP

(Hypertext Transfer Protocol)

HTTP is the name given to the protocol that governs data transmission in the Internet. Using HTTP connections you can download applications and games (Games & More, p. 71) as well as polyphonic ring tones from the Internet. Configure an HTTP link using the HTTP profile (p. 73).

## International dialing codes

Many international dialing codes are stored in your phone. In standby mode (0+) not necessary when dialing from the Phonebook):

Hold **down** until a "+" is displayed. This replaces the first two digits of the international dialing code.

**+List** Press.

Select the required country. The international dialing code is displayed. Now add the national number (in many countries without the first digit) and press the Call key.

## JAD ★ and JAR ★

Three file types occur when using Java™:

### The JAD file (Java Descriptor)

This file contains information on the application (JAR file) and its address for downloading. By activating a JAD file, the connection to the Internet is established and the executable application is loaded.

### The JAR file (Java archive)

This file contains the executable application. By activating a JAR file, the application is started.

### Combined files

These files result from JAR files being loaded via JAD files. In this case the JAD file is inserted into the JAR file. The display icon is the same as for JAR files.

The following icons appear when using Java™:

JAD file

JAR file

## Java™

Java™ allows you to use numerous games and applications on your cell phone. You can download these applications from the Internet and install them on your cell phone. The application can be started after installation. Please refer to the operating instructions for each application.

Siemens does not guarantee in the case of Java applications, however, that the downloaded and installed Java application will also work well with your cell phone (p. 73).

### Message memory full

The SIM memory is full when the message icon flashes. **No** more SMS messages can be received. Delete or save messages (p. 51).

## Outside your own home network

If you are outside your "home" network, your phone will automatically connect to a different GSM network (p. 88).

## Own numbers

You can enter your "own numbers" in the Phonebook (e.g. fax) for information. These numbers can be changed or deleted and also sent as an SMS.

## Performance

A full battery will deliver between 60 to 175 hours of standby time or 100 to 180 minutes of talktime.

The length of performance depends on the operating conditions:

| Operation carried out              | Time (min) | Decrease in the standby time by |
|------------------------------------|------------|---------------------------------|
| Calling                            | 1          | 30 - 60 minutes                 |
| Display back light *               | 1          | 30 minutes                      |
| Network search                     | 1          | 5 -10 minutes                   |
| * key input, games, organizer etc. |            |                                 |

Extreme temperatures reduce the standby time of the phone considerably. Avoid exposing the phone to direct sunlight or placing it on a radiator.

## Phone number/URL in SMS

Phone numbers **highlighted** in the text can be dialed or stored in the Phonebook/Addressbook. URLs (Internet addresses) can be called up directly and the HTTP download started. To do this the HTTP profile (p. 73), or the WAP profile (p. 70) must be installed and activated.

Press to dial the phone number/download.

## Phone number memo

You can type in a phone number on the keypad during a phone call. The person you are talking to will hear this. The number can be stored or dialed after the current call has ended.

## Quick menu selection

All menu functions are numbered internally. By entering these numbers one after the other, the function may be started at once.

e.g. write a new text message:

**Menu**

Press.

5 jkl

for **Messages**

1 ∞

for **New SMS**

## Service numbers

There may be numbers saved in the Phonebook (<**Special Books**>, <**Service Numb.**>, p. 36) that were put there by your service provider. You can call local or nationwide information services or use services of the service provider.

## Set Forward

**Forward**

Forwards the caller to the mailbox, for example, if the **Busy** diversion is set and the function **Call Waiting** is activated (see also p. 79).

## SIM card problems

You have inserted your SIM card. Despite this, the following message appears:

### Please insert your SIM card

Please check that the card is **correctly** inserted and the contacts are clean; if necessary, clean them with a dry cloth. If the card is damaged, please contact your service provider.

See also "Questions & Answers" p. 124.

## SMS Push

This function allows you to call up an Internet address (URL) straight from a text message. After selecting it, the URL is highlighted. By pressing the Call key, the WAP browser is automatically started and the highlighted Internet address is called up.

## SMS status report

If the phone was unable to send the message to the service center, a retry option is available. If this attempt also fails, contact your service provider.

The confirmation **Message sent!** only indicates transmission to the service center, which then tries to deliver the message within a certain time-frame.

See also "validity period", p. 63.

## Software version

To display the software version of your phone in standby mode enter:

**\* # 0 6 #**, then press **Info**.

## Switch ring tones on/off

Hold **down**.

### In standby mode

**All** sounds (including the ring tone) can be switched off and then on again. The function will end when the cell phone is switched off.

### During a call:

Switch off the ring tone only for the **current** call/alarm (not if **Any to Answer**, p. 78, is active). Accepting or refusing the call ends this function.

- The call will still be displayed.
- The silent alert remains active if it has been switched on previously.
- The sound settings will remain unchanged.

## Two phone numbers

Special settings can be given to each phone number (e.g. ring tone, call forward, etc.). Switch to the required number first.

To switch the phone number/line in standby mode:

**Line 1**

Press.

Press.

## WAP

(Wireless Application Protocol)

WAP is a technical standard that provides the basis for connecting mobile radio networks with the Internet. WAP allows you to surf the Internet using a cell phone, download games and applications and to use WAP services such as news, stock market data and information services.

### Special characters for WAP usage

Press repeatedly for:

.,?!' " 0 - ( ) @ / : \_

## WAP usage

### Start with...

You can set which functions are to be displayed after Internet access:

Open the browser menu.

**More ...** Select.

**Setup** Select.

**Start with...** Select, then select from the list:

**Start menu**

**Browser menu**

**Home**

**Resume**

**Bookmarks**

### Directly enter Internet address (URL)

A WAP page must be shown in the display (online or offline):

Open the browser menu.

**Go to URL** Select.

Enter URL and confirm.  
The connection is established.

### Changing the home page

The address of the homepage is entered in WAP profiles (p. 70).

A WAP page must be shown in the display (online or offline):

Open the browser menu.

**More ...** Press.

**Profiles** Select.

Select the profile, for example:

**e-Commerce**

Select.

The entry card is displayed.

**WAP param.**, then select **Home**.

Enter new address. Go to end of entry card.

Press.

**Bookmarks (URLs)**

The list of bookmarks can contain a maximum of 10 entries or files. Each file can contain further bookmarks or files.

**Save:**

Open the browser menu.

**Bookmarks**

Select.

**Online (save):**

**Add bookmark** The current WAP address is accepted as a bookmark.

**Offline (save):**

(Empty)

Select.

**Menu**

Open menu.

**New Entry** Select, enter name/header and URL and confirm.

**Save**

Press.

**To use:**

Open the browser menu.

**Bookmarks**

Select.

Select bookmark/file.

**Go**

The bookmark selected is dialed.

**Without SIM card**

If you switch on the phone **without a** SIM card, you can use some of the phone functions.

**Menu**

Press soft key. The functions are displayed.

**SOS**

Emergency, SOS.

The phone is supported by Xtnd Connect Synchronization SW and a modem assistant SW to use your phone as a GPRS modem. This software can also be found on the Siemens Web site.

## **Synctool (XTNDConnect® PC)**

With this module you can synchronize the Organizer databases on your phone with your PC. The software synchronizes your phone automatically with Outlook® or Lotus Notes™.

A detailed list of the PIM versions supported can be found in the online help for the **Siemens Data Suite**.

## **GPRS Modem Assistant**

The GPRS Modem Assistant enables GPRS links to be created from a laptop, which gives you Internet access with a laptop and cell phone while on the road.

If you have any questions about using your phone, visit us at [www.my-siemens.com/customer-care](http://www.my-siemens.com/customer-care) anytime. As further help we have listed below some frequently asked questions and answers.

| Problem                                     | Possible causes                           | Possible solution                                                                                                                                   |
|---------------------------------------------|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| Phone cannot be switched on.                | On/Off key not pressed long enough.       | Press On/Off key for at least two seconds.                                                                                                          |

## Exposure to radiofrequency signals

Your wireless handheld portable telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radiofrequency (RF) signals.

In August 1996, The Federal Communications Commission (FCC) adopted RF exposure guidelines with safety levels for hand-held wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

- American National Standards Institute (ANSI) C95.1 (1992)
- National Council of Radiation Protection and Measurement (NCRP) Report 86 (1986)
- International Commission of Non-Ionizing Radiation Protection (ICNIRP) 1996
- Ministry of Health (Canada) Safety Code 6

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI standard (C95.1).

The design of your phone complies with the FCC guidelines (and those standards). For additional information concerning exposure to radio

frequency signal, see the statement by the FDA at the end of this user guide.

## Technical data

|                            |                               |
|----------------------------|-------------------------------|

| SIM card:                  | 3.0 V                         |

## Trademarks

CPS is a trademark of Cambridge Positioning Systems Limited.

Your phone has been designed and crafted with great care and attention and should also be treated with care. The suggestions below will help you to enjoy your phone for many years.

- Protect your phone from moisture and humidity! Precipitation, humidity and liquids contain minerals that will corrode electronic circuits. Nevertheless, should your phone become wet, disconnect it immediately from the power supply and remove the battery!
- Do not use or store the phone in dusty, dirty areas. Its moving parts may become damaged.
- Do not store the phone in hot areas. High temperatures can shorten the life of electronic devices, damage batteries and warp or melt certain plastics.
- Do not store your phone in cold areas. When the phone warms up again (to its normal ambient temperature), moisture can form inside the phone, which may damage electronic circuit boards.
- Do not drop, knock or shake your phone. Rough handling can damage internal circuit boards!
- Do not use abrasive chemicals, cleaning solvents, or strong detergents to clean the phone!

The suggestions given above apply equally to your phone, battery, charger and all accessories. If any of these parts are not working properly, take them to your nearest qualified service outlet. The personnel there will assist you and, if necessary, repair the device.

## Phone ID

You will need the following details if you lose your phone or SIM card. Please enter here

the number of the SIM card (on the card):

.....  
the 15-digit serial number of the phone  
(under the battery):

.....  
the Customer Service number of the  
service provider:  
.....

## Lost phone

If you lose your phone or SIM card contact your service provider immediately to prevent misuse.

## Basics

### Li-Ion Polymer Battery 500 mAh EBA-520

Spare battery.

### Travel Charger

Travel Charger ETC-520

Travel charger with an extended input voltage range of 100–240 V.

### Headset PTT HHS-510

Headset with PTT key to activate voice recognition and to accept and end calls.

The Siemens logo, consisting of the word "SIEMENS" in a bold, sans-serif font inside a rectangular border.The text "Original Accessories" in a sans-serif font, with "Original" on the top line and "Accessories" on the bottom line, enclosed in a rectangular border.

Original Siemens Accessories

[www.siemens.com/us](http://www.siemens.com/us)

## Data/Applications

### Data Cable DCA-500

For connecting the phone to the serial RS232 port of the PC.

### Data Cable USB DCA-510

For connecting the phone to the USB port of the PC. With load function.

### SyncStation DSC-500

Table cradle for your cell phone. Allows data exchange and simultaneously charges the phone via the power supply unit. Features a desktop charger, a data cable (serial) and a Y adapter.

## Innovations

### Mobile Camera IQP-511

Camera that plugs into the cell phone. Allows you to take photos and send them via the cell phone to other cell phones using MMS or via email to a PC. Integrated flashlight that can be switched on or off as required.

## Car Solutions

### Car Charger ECC-500

Charger for the cigarette lighter socket in the car.

### Portable Car Kit HKP-500

Handsfree kit with integrated loudspeaker and microphone and auto answer feature. Simply plug into the cigarette lighter socket. Ideal for easy transfer between vehicles.

### Mobile Holder HMM-520

Cradle without antenna port.

### Basic Car Pack HKB-500

Allows in-car charging of your cell phone as well as handsfree talking. Contains a Car Charger, a Headset PTT and a Y adapter.

### Car Kit Plus HKC-511

Handsfree kit with first-class digital call quality and supreme ease of use. Compatible with SL56 by using Mobile Holder HMM-520.

Products can be purchased through operators or by visiting [my-siemens.com/us](http://my-siemens.com/us).

## **The U.S. Food and Drug Administration's (FDA) Center for Devices and Radiological Health Consumer Update on Mobile Phones**

FDA has been receiving inquiries about the safety of mobile phones, including cellular phones and PCS phones. The following summarizes what is known – and what remains unknown – about whether these products can pose a hazard to health, and what can be done to minimize any potential risk. This information may be used to respond to questions.

### **Why the concern?**

Mobile phones emit low levels of radio frequency energy (i.e., radio frequency radiation) in the microwave range while being used. They also emit very low levels of radio frequency energy (RF), considered non-significant, when in the stand-by mode. It is well known that high levels of RF can produce biological damage through heating effects (this is how your microwave oven is able to cook food). However, it is not known whether, to what extent, or through what mechanism, lower levels of RF might cause adverse health effects as well. Although some research has

been done to address these questions, no clear picture of the biological effects of this type of radiation has emerged to date. Thus, the available science does not allow us to conclude that mobile phones are absolutely safe, or that they are unsafe. However, the available scientific evidence does not demonstrate adverse health effects associated with the use of mobile phones.

### **What kinds of phones are in question?**

Questions have been raised about hand-held mobile phones, the kind that have a built-in antenna that is positioned close to the user's head during normal telephone conversation. These types of mobile phones are of concern because of the short distance between the phone's antenna — the primary source of the RF — and the person's head. The exposure to RF from mobile phones in which the antenna is located at greater distances from the user (on the outside of a car, for example) is drastically lower than that from hand-held phones, because a person's RF exposure decreases rapidly with distance from the source. The safety of so-called "cordless phones," which have a base unit connected to the telephone wiring in a house and which operate at far lower power levels and frequencies, has not been questioned.

**How much evidence is there that hand-held mobile phones might be harmful?**

Briefly, there is not enough evidence to know for sure, either way; however, research efforts are on-going. The existing scientific evidence is conflicting and many of the studies that have been done to date have suffered from flaws in their research methods. Animal experiments investigating the effects of RF exposures characteristic of mobile phones have yielded conflicting results. A few animal studies, however, have suggested that low levels of RF could accelerate the development of cancer in laboratory animals. In one study, mice genetically altered to be predisposed to developing one type of cancer developed more than twice as many such cancers when they were exposed to RF energy compared to controls. There is much uncertainty among scientists about whether results obtained from animal studies apply to the use of mobile phones. First, it is uncertain how to apply the results obtained in rats and mice to humans. Second, many of the studies showed increased tumor development used animals that had already been treated with cancer-causing chemicals, and other studies exposed the animals to the RF virtually continuously – up to 22 hours per day.

For the past five years in the United States, the mobile phone industry has supported research into the

safety of mobile phones. This research has resulted in two findings in particular that merit additional study:

1. In a hospital-based, case-control study, researchers looked for an association between mobile phone use and either glioma (a type of brain cancer) or acoustic neuroma (a benign tumor of the nerve sheath). No statistically significant association was found between mobile phone use and acoustic neuroma. There was also no association between mobile phone use and gliomas when all types of gliomas were considered together. It should be noted that the average length of mobile phone exposure in this study was less than three years.

When 20 types of glioma were considered separately, however, an association was found between mobile phone use and one rare type of glioma, neuroepitheliomatous tumors. It is possible with multiple comparisons of the same sample that this association occurred by chance. Moreover, the risk did not increase with how often the mobile phone was used, or the length of the calls. In fact, the risk actually decreased with cumulative hours of mobile phone use. Most cancer-causing agents increase risk with increased exposure. An ongoing study of brain cancers by the

National Cancer Institute is expected to bear on the accuracy and repeatability of these results.<sup>1</sup>

2. Researchers conducted a large battery of laboratory tests to assess the effects of exposure to mobile phone RF on genetic material. These included tests for several kinds of abnormalities, including mutations, chromosomal aberrations, DNA strand breaks, and structural changes in the genetic material of blood cells called lymphocytes. None of the tests showed any effect of the RF except for the micronucleus assay, which detects structural effects on the genetic material. The cells in this assay showed changes after exposure to simulated cell phone radiation, but only after 24 hours of exposure. It is possible that exposing the test cells to radiation for this long resulted in heating. Since this assay is known to be sensitive to heating, heat alone could have caused the abnormalities to occur. The data already in the literature on the response of the micronucleus assay to RF are conflicting. Thus follow-up research is necessary.<sup>2</sup>

FDA is currently working with government, industry, and academic groups to ensure the proper follow-up to these industry-funded research findings. Collaboration with the Cellular Telecommunications Internet Association (CTIA) in particular is expected to lead to FDA providing

research recommendations and scientific oversight of new CTIA-funded research based on such recommendations.

Two other studies of interest have been reported recently in the literature:

- Two groups of 18 people were exposed to simulated mobile phone signals under laboratory conditions while they performed cognitive function tests. There were no changes in the subjects' ability to recall words, numbers, or pictures, or in their spatial memory, but they were able to make choices more quickly in one visual test when they were exposed to simulated mobile phone signals. This was the only change noted among more than 20 variables compared.<sup>3</sup>
- In a study of 209 brain tumor cases and 425 matched controls, there was no increased risk of brain tumors associated with mobile phone use. When tumors did exist in certain locations, however, they were more likely to be on the side of the head where the mobile phone was used. Because this occurred in only a small number of cases, the increased likelihood was too small to be statistically significant.<sup>4</sup>

In summary, we do not have enough information at this point to assure the public that there are, or are not, any low incident health problems associated with use of mobile phones. FDA continues to work with all parties, including other federal agencies and industry, to assure that research is undertaken to provide

the necessary answers to the outstanding questions about the safety of mobile phones.

**What is known about cases of human cancer that have been reported in users of hand-held mobile phones?**

Some people who have used mobile phones have been diagnosed with brain cancer. But it is important to understand that this type of cancer also occurs among people who have not used mobile phones. In fact, brain cancer occurs in the U.S. population at a rate of about 6 new cases per 100,000 people each year. At that rate, assuming 80 million users of mobile phones (a number increasing at a rate of about 1 million per month), about 4800 cases of brain cancer would be expected each year among those 80 million people, whether or not they used their phones. Thus it is not possible to tell whether any individual's cancer arose because of the phone, or whether it would have happened anyway. A key question is whether the risk of getting a particular form of cancer is greater among people who use mobile phones than among the rest of the population. One way to answer that question is to compare the usage of mobile phones among people with brain cancer with the use of mobile phones among appropriately matched people without brain cancer. This is called a case-control study. The current case-control study of brain can-

cers by the National Cancer Institute, as well as the follow-up research to be sponsored by industry, will begin to generate this type of information.

**What is FDA's role concerning the safety of mobile phones?**

Under the law, FDA does not review the safety of radiation emitting consumer products such as mobile phones before marketing, as it does with new drugs or medical devices. However, the agency has authority to take action if mobile phones are shown to emit radiation at a level that is hazardous to the user. In such a case, FDA could require the manufacturers of mobile phones to notify users of the health hazard and to repair, replace or recall the phones so that the hazard no longer exists.

Although the existing scientific data do not justify FDA regulatory actions at this time, FDA has urged the mobile phone industry to take a number of steps to assure public safety. The agency has recommended that the industry:

- Support needed research into possible biological effects of RF of the type emitted by mobile phones;
- Design mobile phones in a way that minimizes any RF exposure to the user that is not necessary for device function; and

- Cooperate in providing mobile phone users with the best possible information on what is known about possible effects of mobile phone use on human health.

At the same time, FDA belongs to an interagency working group of the federal agencies that have responsibility for different aspects of mobile phone safety to ensure a coordinated effort at the federal level. These agencies are:

- National Institute for Occupational Safety and Health
- Environmental Protection Agency
- Federal Communications Commission
- Occupational Health and Safety Administration
- National Telecommunications and Information Administration

The National Institutes of Health also participates in this group.

**In the absence of conclusive information about any possible risk, what can concerned individuals do?**

If there is a risk from these products — and at this point we do not know that there is — it is probably very small. But if people are concerned about avoiding even potential risks, there are simple steps they can take to do so. For example, time is a key factor in how much exposure a person receives. Those persons who spend long periods of time on their hand-held mobile phones could consider holding lengthy conversations

on conventional phones and reserving the hand-held models for shorter conversations or for situations when other types of phones are not available.

People who must conduct extended conversations in their cars every day could switch to a type of mobile phone that places more distance between their bodies and the source of the RF, since the exposure level drops off dramatically with distance. For example, they could switch to:

- a mobile phone in which the antenna is located outside the vehicle,
- a hand-held phone with a built-in antenna connected to a different antenna mounted on the outside of the car or built into a separate package, or
- a headset with a remote antenna to a mobile phone carried at the waist.

**Where can I find additional information?**

Your phone may cause TV or radio interference (for example, when using a telephone in close proximity to receiving equipment). The FCC or Industry Canada can require you to stop using your telephone if such interference cannot be eliminated. If you require assistance, please contact your local service facility.

Your Siemens wireless phone gives you the power to communicate by voice – almost anywhere, anytime. But an important responsibility accompanies the benefits of wireless phones, one that every user must uphold.

When driving a car, driving is your first responsibility. When using your wireless phone behind the wheel of a car, practice good common sense and remember the following tips:

**Get to know your phone and its features such as speed dial and redial.**

Carefully read your instruction manual and learn to take advantage of valuable features most phones offer including, automatic redial and memory dial – most phones can store up to 99 numbers in memory dial. Also, work to memorize the phone keypad so you can use the speed dial function without taking your attention off the road.

**When available, use a hands-free device.**

A number of hands-free wireless phone accessories are readily available today. Whether you choose an installed mounted device for your phone or a speaker phone accessory, take advantage of these devices if they are available to you.

**Position your phone within easy reach.**

Make sure you place your wireless phone within easy reach and where you can grab it without removing your eyes from the road. If you get an incoming call at an inconvenient time, let your voicemail answer it for you.

**Suspend conversations during hazardous driving conditions or situations.**

Let the person you are speaking to know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions. Rain, sleet, snow and ice can be hazardous, but so is heavy traffic. As a driver, your first responsibility is to pay attention to the road.

**Do not take notes or look up phone numbers while driving.**

If you are reading an address book or business card while driving a car, or writing a "to do" list, then you are not watching where you are going. It's common sense. Don't get caught in a dangerous situation because you are reading or writing and not paying attention to the road or nearby vehicles.

**Dial sensibly and assess the traffic.**

If possible, place calls when you are not moving or before pulling into traffic. Try to plan your calls before you begin your trip, or attempt to coincide your calls with times you may be stopped at a stop sign, red light or otherwise stationary. But if you need to dial while driving, follow this simple tip – dial only a few numbers, check the road and your mirrors, then continue.

**Do not engage in stressful or emotional conversations that may be distracting.**

Stressful or emotional conversations and driving do not mix – they are distracting and even dangerous when you are behind the wheel. Make people you are talking with aware you are driving and if necessary, suspend phone conversations that have the potential to forward your attention from the road.

**Use your phone to call for help.**

Your wireless phone is one of the greatest tools you can own to protect yourself and your family in dangerous situations – with your phone at your side, help is only three numbers away. Dial 9-1-1 in the case of fire, traffic accident, road hazard, or medical emergency. Remember, it is a free call on your wireless phone.

**Use your phone to help others in emergencies.**

Your wireless phone provides you a perfect opportunity to be a "good Samaritan" in your community. If you see an auto accident, crime in progress or other serious emergencies where lives are in danger, call 9-1-1, as you would want others to do for you.

**Call roadside assistance or a special wireless non-emergency assistance number when necessary.**

Certain situations you encounter while driving may require attention, but are not urgent enough to merit a call to 9-1-1. But you can still use your wireless phone to lend a hand. If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured, or a vehicle you know to be stolen, call roadside assistance or other special non-emergency wireless numbers.

**"The wireless industry reminds you to use your phone safely when driving."**

**For more information, please call 1 (888) 901-SAFE, or visit our Web site at: [www.wow-com.com](http://www.wow-com.com)**

## Intellectual Property Restrictions

All Intellectual Property, as defined below, which is owned by or otherwise the property of Siemens Information and Communications Mobile, LLC ("Siemens"), its affiliates, partners or suppliers, relating to the Phone, including but not limited to accessories, parts or software relating thereto (the "Phone System"), is proprietary under federal laws, state laws and International treaty provisions. Intellectual Property includes, but is not limited to, inventions (patentable or unpatentable), patents, trade secrets, copyrights, software, computer programs, and related documentation and other works of authorship. You may not infringe or otherwise violate the rights secured by the Intellectual Property. Moreover, you agree that you will not (and will not attempt to) disassemble, decompile, reverse engineer, prepare derivative works from, modify or make any other effort to create source code from the software. No title to ownership in the Intellectual Property is transferred to you through purchase or possession of the Phone or its components. All applicable rights of the Intellectual Property shall remain with Siemens, its affiliates, partners or suppliers.

Siemens will have no liability with respect to any claim of patent infringement which is based upon the combination of the Product or

parts furnished hereunder with software, apparatus or devices not furnished by Siemens, nor will Siemens have any liability for the use of ancillary equipment or software not furnished by Siemens which is attached to or used in connection with the Product. The foregoing states the entire liability of Siemens with respect to infringement of patents by the Product or any parts thereof.

Laws in the United States and other countries preserve for Siemens certain exclusive rights for copyrighted Siemens software, such as the exclusive rights to reproduce and distribute copies of such Siemens software. Siemens software may be used only in the Product in which the software was originally embodied when purchased, and such software in such Product may not be replaced, copied, distributed, modified in any way, or used to produce any derivative thereof. No other use including, without limitation, alteration, modification, reproduction, distribution, or reverse engineering of such Siemens software or exercise of rights in such Siemens software is permitted. No license is granted by implication, estoppel or otherwise under Siemens patent rights or copyrights.
